GRADUATE SCHOOL

1983-1984 TUITION AND FEES

The following increases in tuition and fees will be in effect on September 1, 1983:

TUITION

Tuition, per credit hour	$ 150.00
Executive MBA Program	10,000.00
Non-credit course fee, per course	285.00
Auditor, per course	285.00

NON-REFUNDABLE FEES

Application Fee	$ 20.00
Auditor Application Fee	20.00
Registration Fee, per term	5.00
Graduate Student Council Fee, per term	3.00
Laboratory Fee	60.00
Computer Use Fee	60.00
New International Student Fee	200.00
Late Payment Fee	25.00
(PLUS 1½ percent per month of the unpaid balance as of the beginning of the 2nd week of classes)	

PLEASE NOTE: Persons entering Graduate School for the Fall Term 1983 will be subject to the rules and regulations of the 1983-84 catalog which will be available September 1, 1983.

GRADUATE SCHOOL CATALOG 1982-83

300 Orange Avenue
West Haven, Conn. 06516
(203) 934-6321

This catalog supersedes all previous bulletins, catalogs and brochures published by the Graduate School and describes academic programs to be offered during 1982-83. Graduate students admitted to the university in the fall of 1982 and thereafter are bound by the regulations published in this catalog.

The University of New Haven is committed to affirmative action and to a policy which provides for equal opportunity in employment, advancement, admission, educational opportunity and administration of financial aid to all persons on the basis of individual merit. This policy is administered without regard to race, color, national origin, age, sex, religion or disabilities not related to performance. It is the policy of the University of New Haven not to discriminate on the basis of sex in its admission, educational programs, activities or employment policies as required by Title IX of the 1972 Educational Amendments. This school is authorized under federal law to enroll non-immigrant alien students.

Inquiries regarding affirmative action, equal opportunity and Title IX may be directed to the director of equal opportunity.

The male generic terms appearing throughout this book refer to both males and females and are used for grammatical simplicity and semantic convenience.

The university reserves the right, at any time, to make whatever changes may be deemed necessary in admission requirements, fees, charges, tuition, regulations and academic programs prior to the start of any class, term, semester, trimester or session.

Volume V. No. 7 May 1982

The *Bulletin of the University of New Haven* is published eight times per year in February, April, May (2), July (2) and November (2) by the University of New Haven, 300 Orange Avenue, West Haven, Connecticut 06516. Second class postage paid at New Haven, Connecticut, publication number USPS 423-410. **Postmaster:** please send form 3579 to Office of Public Relations, University of New Haven, P.O. Box 1306, New Haven, CT 06505.

THE GRADUATE SCHOOL

The Graduate School of the University of New Haven offers master's degrees in 23 program areas at seven locations throughout Connecticut.

The main campus in West Haven offers all academic programs, and off-campus centers at Waterbury, Danbury, Trumbull, Middletown, Madison and Groton-New London offer courses leading to master's degrees in business administration, computer and information science and other programs.

Most Graduate School courses are scheduled during the late afternoon, early evenings and on Saturdays to meet the needs of part-time, employed students.

Full-time enrollment is possible in the following programs: business administration, public administration, accounting, taxation, criminal justice, environmental science, industrial engineering, industrial relations, computer and information science, forensic science, occupational safety and health management, operations research, community psychology, organizational/industrial psychology, mechanical engineering and the dual M.B.A./industrial engineering degree.

The University of New Haven is fully accredited by the New England Association of Schools and Colleges. It is also a member of the Council of Graduate Schools, the Northeastern Association of Graduate Schools, the Academy of Criminal Justice Sciences, and the National Association of Schools of Public Affairs and Administration.

Admission

Director: John O'Brien, M.B.A., University of New Haven

General Requirements

Applicants to the University of New Haven Graduate School are required to have an undergraduate degree from an accredited institution. Certain programs have additional requirements for admission to specific curricula, details of which are included in the program listings later in the catalog.

Admission decisions are based primarily on an applicant's undergraduate record. Prospective students who are currently completing their undergraduate study should submit an official transcript complete to the date of application. In most cases, an admission decision will be made on the basis of the partial transcript, contingent upon completion of the baccalaureate degree. Registration will not be permitted until a final, official transcript is submitted to the Graduate School admissions office.

In support of an application, students may submit their scores from the Graduate Record Examination (GRE), both the Aptitude Test and the Advanced Test, the Graduate Management Admission Test (GMAT) or the Miller Analogies Test. Students may be required to take one or more of these tests.

At left, the Graduate School

Procedure

An applicant for admission to the Graduate School must submit a formal application, two letters of recommendation, complete official transcripts of all previous college work and the nonrefundable application fee.

Students may be admitted for any term. Should a student be unable to enter the Graduate School during the term for which admission is granted, the acceptance will remain open for one calendar year. After one year, a new application for admission will be required.

Admission Categories

Applicants and students in the Graduate School are assigned to one of three categories: fully matriculated, provisional or special.

Fully Matriculated

Students accepted for entrance into a regular degree program are fully matriculated students.

Provisional

Applicants whose undergraduate average falls below the standard set for full matriculation may be accepted provisionally. Students accepted provisionally should seek out the advice of their coordinator or advisor so that their graduate work can be closely supervised.

Students must complete the work stipulated in their provisional acceptance before they will be evaluated for admission as fully matriculated graduate students.

Special

Special student status is reserved for students who do not wish to matriculate in a program. Registration is limited to 12 credit hours of graduate work. Should the student desire to continue graduate work, he or she must be accepted into a specific graduate program. Special students are responsible for seeing to it that prerequisite requirements for the courses they wish to take are met.

Students who wish to matriculate in a degree program, but complete their applications after the stated deadline, should register as *in-process* students to take advantage of advisement in their fields of study. These students should not apply for *special student* status.

Auditors

An auditor is allowed to attend class and is expected to participate in class discussions and complete the required assignments. An auditor receives no grade or credit toward any degree. Auditor status does not imply admission to any of the graduate degree programs. Both registered students and nonstudents are eligible to audit University of New Haven Graduate School courses.

Admission of International Students

Qualified international students are welcome as students in the Graduate School of the University of New Haven.

The major criterion for the admission of international students is the same as that used for citizens of the United States: Does the undergraduate preparation of the student qualify him or her for graduate study in a degree program at the University of New Haven? Since institutions and systems of higher education vary from country to country, the international applicant may expect that he or she will be asked to provide substantiation, not only of the courses taken and grades received, but also of the academic reputation of the undergraduate school within the educational system of the particular country. All transcripts must be provided in English.

In addition, the Graduate School requires that the applicant submit evidence of English proficiency. The Test of English as a Foreign Language (TOEFL) examination is recommended, but if undergraduate work has been completed in English or if arrangements for the TOEFL are difficult, the GRE or GMAT examinations may be substituted for the TOEFL. The Graduate School may also require that evidence of English proficiency be ascertained by an overseas interview, any charge for which must be borne by the prospective student.

Every international applicant will be evaluated carefully regarding undergraduate subject matter mastery and English proficiency. A student whose examination score falls below acceptable standards for English proficiency (which in the case of the TOEFL examination is 500-550) or whose undergraduate work does not provide necessary preparation for the particular program of study chosen in the Graduate School, may be admitted subject to the requirement that the course of study at the University of New Haven include intensive work in English and undergraduate courses, for which no graduate credit will be given.

International applicants for degree programs which require a thesis will be evaluated for English language writing skills. Further courses in writing skill development may be required.

International students will need to provide a signed financial resource statement prior to the issuance of an I-20, since the university must certify that it has checked the international student's finances. The University of New Haven does not offer financial assistance to international students.

One year's tuition, meaning the tuition for three, three-credit courses for each of three terms, is required in advance before a form I-20 will be issued. This tuition will be refunded according to usual refund policies if the I-20 is returned to the Graduate School Admission Office.

International students are required to have medical insurance, and may elect to purchase the university's student policy if they wish.

Since the review of applications from international students takes much longer than those from citizens of the United States, it is important that applications and all supporting materials be received by the Graduate School well before the stated deadline in the academic calendar.

U.S. immigration regulations require that students holding a student visa maintain adequate progress. Adequate progress means full-time study, which is generally interpreted to mean taking at least three courses each term. Prospective international students should, therefore, note that not all graduate programs are designed to permit full-time study. A complete listing of such programs is provided elsewhere in this catalog.

Upon acceptance students are invited to contact the director of housing for assistance in locating living accommodations.

The university maintains an international student advisor's office on a full-time basis. Upon their arrival at UNH, all international students must contact the director of that office within 72 hours.

Graduate students studying under an F-1 visa are allowed 24 months to complete a degree program. All F-1 visa students must register for a minimum of 9 credit hours per term. Once visa students have completed their degree program, the International Student Office will not issue an I-538 for extension of temporary stay, except for periods of practical training approved by the Graduate School and the U.S. Office of Immigration.

Registration

Registration deadlines are listed in the graduate calendar and in the class schedules that are published each term. Returning students and new students who have been admitted to programs will receive registration materials and can register by mail. Some departments have other procedures and will notify the students involved directly.

Prospective students who complete their applications after the stated deadline may register as *in-process* students. They will not receive registration materials in the mail but may register in person at the main campus or at an off-campus center. Proof that the in-process student has an undergraduate degree will be required at the time of registration, and, whenever possible, unofficial transcripts of previous course work should be provided to facilitate advisement. In-process status remains in effect for a maximum of one term, and in-process students may register for no more than six credits' work without the approval of the coordinator of the program for which they are applying.

It is the responsibility of in-process students to see to it that all materials in support of their application are received by the university in time for a matriculation decision before the next term. In-process students will not be permitted to register a second time until a matriculation decision has been made. Acceptance as an in-process student does not guarantee admission to the Graduate School.

Any student who fails to register for three consecutive terms will no longer receive registration materials. It will be the responsibility of the student to notify the Graduate Records Office of his or her desire to continue graduate study. Files for students who revert to an inactive status will be retained for two years. At the end of that period, those files will be destroyed.

No add slips will be accepted after the first week of class. A student may withdraw from a course any time prior to the last scheduled class meeting. Course additions or withdrawals may be handled in person or by mail.

The university reserves the right to change class schedules or instructors at any time. It further reserves the right to cancel any course, and, in such cases, will refund full tuition to the students.

Students with an outstanding balance will not be permitted to register. Current students who register after the registration deadline will be assessed a late registration fee.

Academic Policies

Academic Counseling

Students may request academic counseling at any time. Appointments should be scheduled through department chairmen or program coordinators. Off-campus advisement evenings are held periodically.

It is the student's responsibility to select courses in accordance with prerequisites, the advisor's recommendations, the departmental plan of study (if required) and the requirements for the degree.

A student is not required to file a formal plan of study with the Graduate School. It is the student's responsibility to meet the stated requirements for the degree.

Academic Standards

The academic standing of each student is determined on the basis of the quality point ratio earned each term.

To determine a quality point, each letter grade earned during a term is assigned a quality point value:

A — Four quality points
B — Three quality points
C — Two quality points
F — Zero quality points
P — Zero quality points
S — Zero quality points
U — Zero quality points
W — Zero quality points
I — Zero quality points
T — Zero quality points

The quality point ratio is obtained by multiplying the quality point value of each grade by the number of semester hours assigned to each course in the catalog, then dividing the total quality points carried by the total semester hours attempted.

A cumulative quality point ratio is obtained by calculating the quality point ratio for all courses attempted at the University of New Haven.

Awarding of Degrees

The University of New Haven awards degrees twice a year, at commencements in January and in June.

A quality point ratio of 3.0 is required for graduation. Students completing the requirements for a degree at the end of the fall term will receive the degree in January. Students completing the requirements for a degree at the end of the winter term will receive the degree at the June commencement. Students completing the requirements for a degree at the end of the spring term will receive the degree the following January. Students completing the requirements for a degree in July will receive a formal statement that they have completed all requirements for the degree and will formally be awarded their diploma in January.

M.B.A. students who have C's in more than three courses will not be allowed to graduate. Instead, they will be advised to repeat one or more of those courses and must achieve a grade of B or better.

Candidates for January commencement must file a petition with the Graduate Records Office no later than October 15, and for June commencement no later than March 1. Forms for this purpose are available in the Graduate School Office and in the Office of the Registrar. Payment of the graduation fee must accompany the petition.

Should a candidate not fulfill all the requirements for graduation before the deadline after having filed the petition to graduate and paid the fee, the student will have to petition again at a later date. At that time, only the refiling fee will be charged.

All financial obligations to the university must be met prior to graduation.

Full-Time Study

A full-time graduate course of study is defined as three courses per term. Under unusual circumstances, the department chairperson, the program coordinator and the Graduate School could approve a reduction in credits.

Grade Reports

Reports of the final grade in each subject will be mailed to the student soon after the close of each term.

Grading System

The Graduate School uses the following grading system:

A — Superior performance
B — Good performance
C — Passing performance
F — Failure
P — Pass – carries credit hours toward the degree
S — Satisfactory performance in a non-credit course
W — Withdrawal from a course
I — Incomplete – given on rare occasions. A grade of **I** that is not changed within one calendar year automatically reverts to a **W.**
T — Used for thesis/seminar project students who have not completed work during the term in which they originally registered for the course. Students must complete their work within the maximum allowable time for graduate work.

Some employers require that a letter grade be awarded if a student is to receive tuition reimbursement. Non-credit courses, which normally are taken on a pass/fail basis, may be assigned a letter grade instead, should the student so desire. It is the student's responsibility to inform the faculty member of his or her need for a letter grade.

Graduate School Ethics

It is Graduate School policy that all students are expected to complete all course requirements on their own initiative and endeavor, with no collaboration unless specifically authorized by an instructor. In addition, material used by students but authored by another individual, publisher, company, government or organization shall be identified as such by appropriate footnotes or references. Violations of this policy, either in fact or in spirit, will normally be handled by the faculty member involved though they may be grounds for dismissal from the Graduate School. Students wishing to appeal the decision of a faculty member should contact the Graduate School Office.

It is the responsibility of the student to meet all classes and take all exams on schedule. Faculty have the right to require a standard of attendance, even if it conflicts with professional and job-related responsibilities of students. Students whose jobs require that they be absent from class must realize that it is their responsibility to determine whether such absence is permitted by the faculty member involved, and to meet their professor's requirements for making up missed work, if the professor allows missed time to be made up.

Professors may assess a make-up examination fee when a student is permitted to take an end-of-term examination at a time other than the scheduled time except for conflicts caused by the examination schedule.

A make-up test fee is assessed when a student is permitted to make up an announced test during the term. Both these fees are paid at the Business Office.

Grievance Procedure

A formal policy for the handling of student grievances is available in the Graduate School Office.

Probation and Appeals

Any graduate student whose cumulative quality point ratio (QPR) is below 3.0, a **B** average, will be considered to be on academic probation, and may be required to obtain permission from the program coordinator before registering for additional course work. A student whose cumulative QPR is below 2.7 after completion of 24 credits will be required to withdraw from the Graduate School.

Appeals concerning directed withdrawal from the Graduate School under these circumstances should be directed to the dean of the Graduate School, who will in turn refer the appeal to the department chairman and/or the responsible administrative unit.

Repetition of Work

A student may repeat a course, with the new grade superseding the old grade in the computation of the quality point ratio. The original grade remains on the transcript.

Research Projects, Seminar Projects, and Independent Study

Some departments and academic programs require the completion of research projects, seminar projects, or independent study rather than theses. In these cases, as with a thesis, students must have the written approval of their advisors and department chairmen prior to enrolling. This is accomplished by completing the form, *Proposal for Research Projects, Seminar Projects or Independent Studies,* and securing required approvals.

Students preparing a research project, seminar project, or independent study should follow the guidelines presented in the *Manual for the Preparation of Graduate Theses and Seminar Projects,* copies of which are available in the office of the Graduate School.

Residency Requirements

Degree programs have a 30-graduate-credit residency requirement, with the exception of the M.B.A./M.S.I.E. dual degree program which has a 60-graduate-credit residency requirement. Credits toward the residency requirements may be earned at the main campus or at the off-campus centers. Students taking classes off-campus are reminded that the Graduate School strongly encourages, and scheduling limitations frequently require, that you plan on taking at least three courses at the main campus.

Thesis

A number of preliminary steps are required before registration for thesis will be accepted by the graduate registrar. The student completes the form, *Proposal for Theses,* in which the proposed subject, the methodology and the hypothesis are described. The student secures the approval signature of a faculty member who will serve as advisor. The student must also secure the approval of the proposed thesis and the thesis advisor by the program coordinator and the dean of the Graduate School. Only after the graduate registrar has received the signed proposal form will the student be permitted to register for thesis.

A thesis will carry no fewer than six academic credits taken over no fewer than two academic terms. A preliminary draft must be presented to the advisor at least 45 days prior to commencement. Upon approval by the advisor and program coordinator, two final, unbound copies are presented to the Graduate School at least three weeks before commencement. A thesis must be defended before the student's thesis committee and the dean of the Graduate School. After the dean of the Graduate School approves the thesis, credit is awarded and the thesis is deposited in the university library for binding and becomes part of the permanent collection. Additional copies may be required by the advisor or the program coordinator.

For guidance in the preparation of theses, graduate students should consult *A Manual for the Preparation of Graduate Theses and Technical Projects*, copies of which are available in the Graduate School Office. Questions not resolved by the instructions should be settled in consultation with the advisor and by reference to a standard style manual. The Graduate School participates in the University Microfilm Masters Program, and outstanding theses will be awarded this recognition upon the recommendation of the advisor, the program coordinator, or both.

Time Limit for Completion of Degree

Students must complete all the requirements for their degree within five years of the date of their initial matriculation in the program. Any extension of the time limit can be granted only by the dean of the Graduate School after consultation with the appropriate program coordinator.

Transfer Credit

Transfer credit may be given for graduate courses taken at other accredited institutions subject to the following conditions:

a. the courses were at the graduate level;
b. each grade was **B** or better; and
c. the courses did not fulfill requirements for any other degree already earned by the student.

Graduate students at the university must secure written approval before taking courses at another institution if they plan to transfer that credit into their UNH program. Course coordination forms are available in the Graduate School office for this purpose.

Waiver of Courses

Some programs.permit waivers of core courses on the basis of undergraduate courses taken at accredited institutions. Waivers of elective courses are not permitted, nor are waivers based upon experience. In such cases, substitution of a more advanced course may be allowed.

For a course to be waived, a student must first secure the written approval of the department chairman or a faculty member acting for the department chairman in the department in which the waiver is requested. Only fully matriculated students may seek waivers.

Tuition and Fees

The following are the University of New Haven tuition, fees and charges which were in effect for the 1981-82 school year. The university reserves the right, at any time, to make whatever changes may be deemed necessary in admission requirements, fees, charges, tuition, regulations and academic programs prior to the start of any class, semester, term or session.

Tuition*

Tuition, per credit hour	$121
Executive MBA program	8,000
Non-credit course fee, per course	228
Auditor, per course	228

Nonrefundable Fees

The Marvin K. Peterson Library

Application fee	20
Auditor application fee	20
Continuing registration fee	25
Graduate Student Council fee, per term	3
Graduation fee	35
Late filing fee to March 15, Oct. 31	25
Graduation refiling fee	10
Laboratory fee	.32-52
Computer use fee	.32-52
Late payment fee (after scheduled due date)**	20
Late registration fee, current students	15
Registration fee, per term	5
Senior professional certificate fee (payable upon completion of program)	10
Transcript fee, first copy	free
Additional copies	4
Fee for dropping a course	5
Make-up examination fee	5
Make-up test fee	3

*Tuition will be higher for 1982-83.
**A late fee plus a 1½% per month late penalty will be assessed on outstanding balances.

Payment

Tuition for graduate courses is due at registration. However, the university permits graduate students to pay tuition on an installment basis, paying one half with the registration form and the balance before the first day of the term. All students who have not completed tuition payments by the first day of the term will be assessed the late payment fee.

Students are responsible for payment of tuition to the university, even though they may be eligible for their employer's tuition reimbursement plan. Students are responsible for making their own arrangements with their employers for reimbursement.

The university withholds the giving of grades, the award of diplomas, the issuance of transcripts and the granting of honorable dismissal to any student whose account is in arrears.

The university accepts MasterCard and VISA for payment of tuition.

Withdrawal

To be eligible for a refund of tuition, students must formally notify the registrar of their intention to withdraw by completing the university withdrawal form and submitting it to the registrar by mail or in person. The date of the postmark on mailed withdrawal form, or the date of submission on those brought in person, determines the amount of the refund, if any, due the student.

Refunds

The refund policy for graduate students who withdraw from any course or from any program is as follows: 80 percent refund of tuition upon formal withdrawal prior to the second regularly scheduled class meeting, 60 percent refund of tuition upon formal withdrawal prior to the third regularly scheduled class meeting, 40 percent refund of tuition upon formal withdrawal prior to the fourth regularly scheduled class meeting, 20 percent refund of tuition upon formal withdrawal prior to the fifth regularly scheduled class meeting. No refund will be made after the fifth regularly scheduled class meeting.

Living Costs

Estimated costs for attending the University of New Haven Graduate School for the 1981-82 academic year are as follows:

Single Student	**6 Credits**	**9 Credits**	**12 Credits**
Tuition and Fees	$ 734.	$ 1097.	$ 1460.
Books and Materials	60.	90.	120.
Base Living Costs	2331.	2331.	2331.
Cost Per Trimester	$ 2644.	$ 3037.	$ 3430.
Cost Per Year (10 months)	$ 7932.	$ 9111.	$10,290.
Married — No Children			
Tuition and Fees	$ 734.	$ 1097.	$ 1460.
Books and Materials	60.	90.	120.
Base Living Costs	3131.	3131.	3131.
Cost Per Trimester	$ 3342.	$ 3735.	$ 4128.
Cost Per Year (10 months)	$10,026.	$11,205.	$12,384.

Budgets are adjusted for additional family members.

Additional living costs for summer:

Single	$1399.
Married	$1879.

NOTE: Living costs are based on Estimated BLS Moderate Consumption Budget Standards (20-35 age group) adjusted to December, 1981.

Financial Support

Financial support is available to graduate students in the form of assistantships, grants-in-aid, loans and work study.

Assistantships are competitive appointments. The full-time graduate assistant works 20 hours per week and receives compensation and partial tuition support. The part-time graduate assistant carries a varying work requirement of between 5 and 10 hours per week for which the assistant receives compensation, but no tuition support. These awards are generally made in the spring of the preceding academic year.

Grant-in-aid awards are based upon financial need and require that the Graduate and Professional School Financial Aid Service (GAPSFAS) application be received by the financial aid office no later than July 1, November 15 and February 15, depending upon when the student is beginning graduate study. Applications received after these dates can be acted upon only as funds permit.

The state of Connecticut and other states have established loan programs offering long-term loans at low interest rates. In Connecticut, a full-time graduate student may borrow up to a maximum of $5,000 each school year. Repayment starts six months after graduation. Federal interest benefits cover the full interest while in attendance and during the year following graduation.

Part-time employment is also available to graduate students under the college work-study program. The program enables students with financial need to work on- or off-campus for a maximum of 20 hours a week.

Application and Eligibility

A GAPSFAS application is required for all forms of support based upon need. GAPSFAS applications are available in the financial aid office and the Graduate School office.

GAPSFAS applications are mailed by the student directly to GAPSFAS for processing, after which GAPSFAS will forward the application to the university. Generally, GAPSFAS requires four weeks to process applications before forwarding to the school. Since the university must receive the processed application by the deadline date, approximately four weeks before the start of the term for which the student is seeking aid, students are encouraged to file financial applications early. A list of exact university deadlines is available from the financial aid office.

International students are not eligible for financial assistance based upon need, since they must certify availability of sufficient funds at time of entry. Students on academic probation are not eligible for financial aid.

STUDENT SERVICES

Alumni Office

Membership in the Alumni Association is acquired immediately upon graduation. Including the class of 1982 there are more than 14,000 members of the Alumni Association. The alumni director, with the assistance of the Alumni Association president, conducts the affairs of the association during the period between meetings which occur four times per year.

As a member of the Alumni Association, graduates receive an alumni card which enables them to use the university library, gymnasium facilities and the services of the Career Development Office. The card also allows admission to UNH home athletic events. *Insight*, an all-college publication, is mailed to all alumni 10 times per year. Homecoming, an annual event in the fall, and other educational and social events are open to all alumni. Alumni volunteers play an important role in the Annual Giving Campaign.

The Alumni Association is represented on the Board of Governors by a member who is elected for a term of two years. The president of the association serves on the Board of Governors as an ex-officio member.

Members of the Alumni Executive Board are elected for two-year terms. The Alumni Council numbers approximately 30 people, and is an advisory board to the university on alumni relations. Its primary objectives are to strengthen alumni relations and promote communication between the alumni and the university as a whole.

Athletics

Graduate students are encouraged to make use of the North Campus athletic complex. Facilities include three basketball courts, handball-paddleball court, weight room with universal gym, a multipurpose exercise room, steam room, fully equipped training room, six tennis courts, two softball fields, baseball diamond and combination football-soccer-lacrosse field.

Graduate students are eligible to take part in the intramural competition in touch football, badminton, bowling, three- and five-player basketball, paddleball, softball, tennis, floor hockey and volleyball.

Campus Store

The Campus Store provides all necessary texts, new and used, that are required for courses at the university. It also carries related supplies, greeting cards, imprinted clothing, gifts, candy and a selection of paperbacks, newspapers and periodicals. The Campus Store buys back used texts on a daily basis throughout the year. It also orders class rings and handles film processing for the campus community.

Special arrangements are made for students taking courses at off-campus locations to purchase required books at or near off-campus centers.

Career Development and Off-Campus Employment Office

The Career Development Office offers individual counseling; special workshops on resume preparation, interviewing skills and job research techniques; as well as a monthly professional career testing service. Many employers conduct job interviews at the Career Development Office throughout the year, and a monthly schedule is printed in the alumni publication, *Insight*.

Computer Center

The university Computer Center provides a state-of-the-art facility to both academic and administrative functions at the university. It maintains four independent processing units, each accessible from any given terminal via a network processor capable of polling for ports, both direct-connect or dial-up.

Further, two of the CPU's are networked together via ZODIAC (a Data General network support system). The center also supports six micro computers: 1) three Radio Shack TRS-80's (Level II), 2) two Apple II's (one with a graphics tablet), and 3) an ATARI.

Two of the processing units mentioned above are dedicated to administrative work only. They support both batch streams and time sharing through a total of 62 ports (48 active), as well as the capacity for RJE stations on or off campus. The main memory capacity of each system is 128K bytes. The peripherals attached to the central processing units are four disk drives (with dual porting capabilities), each drive representing approximately 200 megabytes of on-line storage, three mag tape drives, three 600 line per minute printers, two 1000 card per minute readers, one 400 card per minute punch unit and one floppy disk unit.

All data entry is made via remote terminal stations from various campus responsibility centers including Admissions, the Registrar's office, the Business office, etc. Terminal access is both hard-wired and dial-up types. Terminals are hard-copy and video display tubes. The central processing units operate under DNA's TSO with spooling and features the CYTOS-II Editor (a modified version of CYTOS developed at Yale for the IBM-360).

The academic facility's primary computers are the Data General MW/8000 and the S-140. Both are the Eclipse line. The MV/8000 is a 32 bit processor with three megabytes of real main memory and a virtual address range of four gigabytes. The CPU runs at 1.1 million instructions per second. The system has floating point hardware and functions in a multiprogramming/multitasking environment. The operating system is AOS/VS and is capable of handling 255 concurrent processes. Peripherals attached to the system are three disk drives (277 megabytes each), one 800/1600 BPI tape drive, one 600 line per minute printer, one 340 character per second printer, and one 180 character per second printer and one 180 character per second Decwriter printer. Several more printers can be attached if desired.

The system can support up to 128 terminals, and presently is utilizing 75 video-display-tubes. A full screen editor dramatically enhances program generation and throughput. All programming is interactive via the VDTs. Programs can be submitted to a batch stream if desired. This allows for continued use of terminals for other tasks while a batch is running.

Communications capabilities are superb in that networking (including such protocols as SNA, X.25, etc.) is or can readily be made available to academic users.

Software support includes ANSI languages such as COBOL, FORTRAN 77, PL/1, RPG-II, BASIC (Extended), PASCAL, APL, etc. A data-base manager (INFOS), a SORT/MERGE package, a mathematical/statistical package (IMSL) are all readily available for users. The social science package, SPSS—Version 9.0 is up and running. Many other popular software packages will be made available as time allows. Graphics packages and Raster Graphics terminals also can be supported by the system and soon will be introduced into the computing curricula. Several RJE emulators are supported on the MV/8000, including RJE 80 (2780/3780) and HASP II. Word-processing is also up and running.

The Data General S-140 is used to drive a MEGATEK Vector Refresh Graphics unit. The MEGATEK has a 4096 x 4096 screen and supports KB entry, JOY-STICK, Light-pen and tablet input. The Graphics processor includes hard-wired 3-D, Rotational/translation features and all are activated through FORTRAN Callable Routines. The S-140 is a 16 bit processor, has a ½ megabyte main memory and supports up to 5 terminals with all active at present. Other peripherals are a tape drive, 24 megabyte hard disk and a floppy disk—all DG compatible. The operating system is AOS and will be able to communicate with the MV/8000 through ZODIAC, hence allowing the S-140 to make use of 32 bit compilers on the MV/8000.

The 6 microcomputers support BASIC, in general; some support FORTRAN 77 and PASCAL; the ATARI supports a music composer, as well as the delightful game cartridges. All micros can become intelligent terminals to the networked systems. A Decwriter printer (180 cps) is mechanically switch-controlled and is available to any one of the micros.

Counseling

Individual counseling is offered to students for personal problems, for marital and domestic problems and for study and career choice problems. Students can obtain assistance for educational, vocational and general life problems.

The center offers psychological testing including vocational interest, personality assessment and academic placement.

Dining

The Student Center includes three separate student dining areas. Mary's Place, a snack bar and the Rathskeller, is located on the main floor. A full-menu dining commons and meal plan dining room are located on the ground floor. Three meal plan options are offered. A plan, while highly recommended for all students, is required for students living in the dormitory and YMCA. Meal plan contracts are available by contacting the Housing Office. This service is curtailed when the undergraduate term is not in session.

Graduate Student Council

The Graduate Student Council is a forum where graduate students can provide input to the administration in order to improve all aspects of graduate education at the university. The council schedules a number of extracurricular activities, and all graduate students are encouraged to attend.

Handicapped Services

The Office of Handicapped Services provides guidance and assistance to students with physical handicaps. The office also coordinates the university's compliance with section 504 of the H.E.W. Rehabilitation Act of 1973. All inquiries and problems concerning barrier-free access to university facilities should be addressed to this office.

Housing

The Housing Office, located in the entry area of the dormitory, will assist graduate students in finding off-campus housing accommodations. The office is open from 8:30-4:30, Monday through Friday, for any student wishing to find housing accommodations. The office has listings for apartments, houses and private rooms.

International Students

Students from a number of countries are a part of the University of New Haven student body. The Office of International Student Affairs provides assistance in the following areas: all documentation pertaining to the Immigration and Naturalization Service; school transfers from and to UNH; orientation programs for international students; referral service for agencies that assist internationals; and the friendship family program.

Library

The Marvin K. Peterson Library, named in honor of the former president of the university, was opened in 1974. It has a capacity of 300,000 bound volumes. Adjoining the Main Building, it includes special collection rooms, a music room, archives and spacious reading and reference areas. Study is made convenient by modern research facilities and equipment including microreading stations and micro-reader-printers.

The library contains more than 250,000 volumes, 95,000 U.S. government documents, 10,000 record albums, numerous corporate annual reports, pamphlet files and microfilm. The library subscribes to 1,400 periodicals, and extensive back issue files are maintained.

The resources of both the New Haven and West Haven public libraries are available to students (non-residents must pay a fee). Under a reciprocal arrangement, University of New Haven students may borrow materials from the libraries of Albertus Magnus College or Quinnipiac College by presenting a valid identity card.

Minority Student Affairs

The Office of Minority Affairs represents the needs and interests of minority students at the University of New Haven. The office works closely with minority students to ease the transition into the academic environment while enabling the student to maintain cultural pride and heritage. The office also promotes social and cultural activities which are of special interest to minority students.

Publications

Student publications include *The News*, the university student newspaper; *The Chariot*, the annual yearbook and *The Noiseless Spider*, a literary publication. Students may volunteer their services on any of the student publications.

Veterans Affairs

Since the university has one of the largest veteran enrollments in Connecticut, an Office of Veterans Affairs with a full-time staff is maintained. In addition to processing applications for various V.A. benefits, the campus Veterans Office provides a wide range of supportive services for veterans attending the university. Assistance is available in academic areas, and special help such as funding for tutorial assistance, readers for the blind and aid for the disabled is also available.

WNHU Radio

WNHU, the university's student-operated FM stereo broadcast facility, operates throughout the year on a frequency of 88.7 MHz at a power of 1,700 watts. This extracurricular activity, open to all university students, serves southern Connecticut with music, news and community affairs programming. Its sportscasters are the voice of University of New Haven Charger sport teams.

ACADEMIC PROGRAMS

Accounting

Coordinator: Anne J. Rich, C.P.A., C.M.A.; Ph.D., University of Massachusetts

The overall objective of the master of science in accounting program is to provide a framework for accounting inquiry, devised in structure and content from the entire scope and process of accounting-information-based economic decision making. The existence of such a framework is intended to provide for graduate accountants and professional practitioners an opportunity to share in the development and assessment of issues of accounting interest within a decision-making context. Accordingly, the M.S. program is structured to receive its objective and direction from the overall objective of accounting—providing information useful to the process of economic decision making.

To accomplish this objective, the M.S. program offers a structure of studies designed to provide:

- an examination of the foundations of economic decision making (foundation courses, 18 credits);
- an analysis of the role and usefulness of accounting information for economic decision making (core courses, 15 credits); and
- an opportunity for further selected specialization from the generally recognized branches or divisions of accounting inquiry (electives, 9 credits).

Each student, upon entering the program, will be assigned a faculty advisor who will assist the student throughout the program of study, particularly with the selection of suitable electives. The assigned faculty advisor will also act as, or assist in the selection of, the student's thesis advisor.

Admission Policy

Admission to the program is open to persons holding an undergraduate degree from an accredited institution, preferably, but not exclusively, in accounting or in business administration with a major in accounting. Persons holding other than the above degrees will be required to take a number of selected undergraduate courses. Admission is based primarily on an applicant's undergraduate record; however, the promise of academic success is the essential factor for admission. In support of their applications, persons may submit their scores from the GMAT. An applicant may be required to take this test.

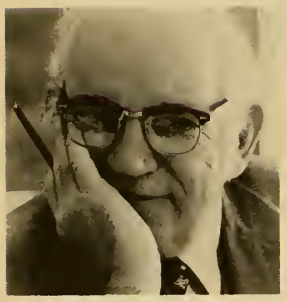
M.S., Accounting

A minimum total of 42 credits on the graduate level will be required to earn the master of science in accounting. In addition, selected undergraduate courses in accounting may be required of students not holding an undergraduate degree in accounting. Individual programs of study are determined after a conference with the coordinator.

Thesis

All students are required to write a thesis. The thesis must show ability to organize material in a clear and original manner and present well-reasoned conclusions. Students are responsible for selecting a topic, approaching a faculty member to serve as chairperson, and selecting a committee. The committee must consist of the chairperson and one other faculty member.

The complete and final manuscript must be submitted to the thesis advisor prior to the end of the fifth week of the term in which the candidate expects to complete the requirements for the degree. Thesis preparation and submission must comply with the Graduate School policy on theses detailed elsewhere in this catalog.



Required Courses

Foundation Courses

EC 604	Macroeconomic Analysis	3
EC 603	Microeconomic Analysis	3
FI 651	Portfolio Management and Capital Market Analysis	3
FI 615	Finance	3
MG 637	Management	3
QA 604	Probability and Statistics	3

Core Courses

A 650	Advanced Accounting Theory	3
A 621	Managerial Accounting or	
A 661	Managerial Accounting Seminar	3
A 654	Financial Statements: Reporting and Analysis	3
A 698	Thesis	6
	Electives	9
	Total credits	**42**

Elective Courses

Financial Accounting Specialization

A 651	Financial Accounting Seminar	3
A 652	Advanced Auditing	3
A 653	Accounting for the Not-for-Profit Organizations	3
A 656	International Accounting	3
FI 649	Security Analysis	3

Managerial Accounting Specialization

A 661	Managerial Accounting Seminar	3
A 641	Accounting Information Systems	3
A 642	Operational Auditing	3
FI 645	Corporate Financial Theory	3

Taxation Specialization

A 601	Federal Income Taxation I	3
A 602	Federal Income Taxation II	3
A 604	Corporate Income Taxation I	3

Business Administration

Coordinator: William S. Y. Pan, Associate Dean, School of Business Administration; Associate Professor of Management Science, Ph.D., Columbia University.

The general purpose of the M.B.A. program at the University of New Haven is the education of men and women at the graduate level for careers in business administration as well as other job areas requiring a sound grasp of business principles. The overall objective of the program is to enhance the student's perspective of managerial skills.

The program has been designed to develop a professional point of view in managing an organization. It further develops the student's ability to utilize the newest analytical and quantitative techniques used in corporate decision making. The student is also exposed to an in-depth analysis of various theories of business and managerial behavior, emphasizing the business organization in relation to its internal and external environment.

Another important objective of the program is to afford the student an opportunity to develop special skills by concentrating in a given study area.

M.B.A.

A total of 48 credits, with or without a thesis, is required of candidates for the M.B.A. degree.

Candidates for the M.B.A. degree are urged to write a thesis as part of the requirement for the degree. A thesis student has the opportunity to work with a faculty member on a mutually determined research project. Candidates who elect not to write a thesis must take two additional business courses in place of a thesis.

Students in the M.B.A. program are expected to be familiar with the use of computers in solving problems. The use of a computer is required in a number of courses in the M.B.A. program. Students deficient in this area should register for IE 603C, Introduction to Digital Computers: COBOL. Students wishing to learn FORTRAN should register for IE 603F. However, a student will only be granted graduate credit for either IE 603C or IE 603F, not both.

A student must complete the basic core before taking advanced courses in the M.B.A. program. The basic core consists of QA 604, QA 605 and two from among P 619, MG 637, EC 603, EC 604, EC 625 and A 621. A student whose undergraduate degree is in a non-business area may also be required, unless a waiver is granted, to take A 600, EC 600 and QA 600, which are non-credit graduate-level courses.

M.B.A. students who have C's in more than three courses will not be allowed to graduate; instead, they will be advised to repeat one or more of those courses and must achieve a grade of **B** or better.

Waiver Policy

Core courses in the M.B.A. program may be waived on the basis of undergraduate courses taken at accredited institutions. For a course to be waived, a student must first secure the written approval of the department chairman or a faculty member acting for the chairman of the department in which the course is offered.

A course that has been waived cannot be taken for elective credit.

Thesis

Students electing to write a thesis must register for thesis in the appropriate business department. The thesis must show ability to organize material in a clear and original manner and present well-reasoned conclusions.

The thesis is written under the direction of the faculty member in charge of the departmental thesis program or a faculty member with special competence in the subject matter covered by the thesis. The complete and final manuscript must be sumitted to the thesis advisor prior to the end of the tenth week of the term in which the student expects to complete the requirements for the degree. Thesis preparation and submission must comply with the Graduate School policy on theses detailed elsewhere in this catalog.

Required Courses

A 621	Managerial Accounting	3
EC 603	Microeconomic Analysis	3
EC 604	Macroeconomic Analysis	3
EC 625	Industrial Relations	3
FI 615	Finance	3
MG 637	Management*	3
MK 609	Marketing	3
P 619	Organizational Behavior	3
QA 604	Probability and Statistics	3
QA 605	Advanced Statistics	3
	Thesis**	6
	Electives	12
	Total credits	**48**

*Students in the Health Care Management Concentration take MG 640 in place of MG 637.

**Candidates who elect not to write a thesis must take two additional business courses in place of thesis.

Concentrations

Within the master of business administration program, students are allowed to concentrate their studies in a specific area. There are several structured concentrations offered by various departments.

A concentration consists of four courses taken in one area. With the permission of the advisor, students may substitute other appropriate courses for those listed as part of a concentration.

Concentration in Accounting

Advisor: Anne J. Rich, Associate Professor of Accounting, Ph.D., University of Massachusetts

A 650	Advanced Accounting Theory	3
A 661	Managerial Accounting Seminar	3
	Plus any two accounting or taxation electives	6
	Total credits	**12**

Concentration in Computer and Information Science

Advisor: William S. Gere Jr., Professor of Industrial Engineering
Ph.D., Carnegie-Mellon University

Four courses from the following:

IE 603	Introduction to Digital Computers	3
IE 604	Management Systems	3
IE 605	Advanced Business Programming	3
IE 606	Advanced Technical Programming	3
IE 610	Computer Systems Selection	3
IE 614	Data Information Systems	3
	Total credits	12

Concentration in Economic Forecasting

Advisor: John J. Teluk, Professor of Economics, M.A., Free University of Munich

EC 653	Econometrics	3
IE 603F	Introduction to Digital Computers: FORTRAN	3
QA 607	Forecasting	3

Plus one of the following:

EC 665	Urban and Regional Economic Development	3
EC 690	Research Project	3
MG 633	Managerial Economics	3
IE 606	Advanced Technical Programming	3
MK 639	Marketing Research and Information Systems	3
	Total credits	12

Concentration in Finance

Advisor: Anne J. Rich

FI 617	Financial Institutions and Capital Markets	3
FI 645	Corporate Financial Theory	3
FI 651	Portfolio Management and Capital Market Analysis	3

*Plus one of the following:**

FI 619	Monetary and Central Banking Policy	3
FI 620	Working Capital Management and Planning	3
FI 649	Security Analysis	3
FI 655	Commodity Market Analysis	3
FI 661	Real Estate: Principles and Practices	3
FI 670	Selected Topics	3
	Total credits	12

*Candidates who elect not to write a thesis must substitute with written approval two elective courses. Elective courses are to be chosen in consultation with an accounting advisor or finance advisor.

Concentration in Health Care Management

Advisor: Jessica Wolf, Assistant Professor of Public Administration; Ph.D., Yale University

MG 640	Management of Health Care Organizations (this course to be taken in place of MG 637 in the core of the M.B.A. program)	3

Plus four courses from the following:

PA 641	Financial Management of Health Care Organizations	3
PA 642	Health Care Delivery Systems	3
PA 643	Health and Institutional Planning	3
PA 644	Administration of Programs and Services for the Aged	3
PA 645	Health Care Economics and Finance	3
PA 670	Selected Topics	3
PS 635	Law and Public Health	3
	Total credits	**12**

Concentration in Hospitality Administration

Advisor: Ronald A. Usiewicz, Associate Professor of Hotel Management, Ph.D., Kent State University

Admission to the concentration in hospitality administration requires permission of the concentration advisor; certain undergraduate courses may be required.

Four courses from the following:

HM 610	Content Seminar in Hospitality/Institutional/ Tourism Administration	3
HM 625	Supervisory and Leadership Development in Tourism, Hospitality and Institutional Operations	3
HM 630	Personnel and Labor Relations in the Hospitality/ Tourism/Institutional Fields	3
HM 635	Applied Dietetics for Health Care Professionals	3
HM 640	Haute Cuisine for Hospitality Executives	3
HM 655	Development of Hotel/Restaurant/Institutional Food Services	3
HM 660	Comparative Tourism	3
HM 670	Special Topics in Hospitality, Dietetics and Tourism Administration	3
	Total credits	**12**

Concentration in Human Resource Management

Advisor: Ronald N. Wentworth, Associate Professor of Management Science, Ph.D., Purdue University

Four courses from the following:

MG 645	Management of Human Resources	3
MG 665	Compensation Administration	3
MG 678	Personnel Management Seminar	3
MG 679	Industrial Relations Seminar	3
MG 690/PA 690-1	Research in Human Resource Management	3
MG 695-6/PA 695-6	Independent Study in Human Resource Management	3
	Total credits	**12**

NOTE: Course substitutions are permitted depending on the background of the student and subject to the approval of the advisor. Among the courses which may be substituted are: P 627, P 628, P 641, PA 620, EC 625, EC 627 and EC 687.

Concentration in International Business

Advisor: Arvin F. Rodrigues, Assistant Professor of Marketing, Ph.D., Columbia University

Four courses from the following:

IB 643	International Business Operations	3
IB 644	Import and Export Business	3
IB 651	Comparative Marketing	3
IB 652	Multinational Business Operations	3
EC 641	International Economics	3
MG 660	Comparative Management	3
	Total credits	**12**

Concentration in Logistics Management

Advisor: Robert Brooks, Assistant Professor of Marketing, M.B.A., New York University

LG 660	Logistics Technology and Management	3

Plus three courses from the following:

LG 663	Logistics Management in the System Acquisition Process	3
LG 665	Integrated Logistics Support Analysis	3
LG 669	Life Cycle Cost Analysis	3
MG 638	Cost-Benefit Management	3
	Total credits	**12**

Concentration in Management and Organization

Advisor: Ronald N. Wentworth

Four courses from the following:

MG 638	Cost-Benefit Management	3
MG 660	Comparative Management	3
MG 661	Development of Management Thought	3
MG 662	Organization Theory	3
MG 663	Leadership in Organizations	3
MG 664	Organizational Effectiveness	3
MG 669	Business Policy and Strategy	3
MG 675	Readings in Management	3
MG 680	Current Topics in Business Administration	3
	Total credits	**12**

Concentration in Management Science

Advisor: Ronald N. Wentworth

IE 601	Introduction to Operations Research/ Management Science	3
IE 604	Management Systems	3
QA 606	Advanced Management Science	3
QA 607	Forecasting	3
	Total credits	**12**

Concentration in Marketing

Advisor: Arvin F. Rodrigues

MK 639	Marketing Research and Information Systems	3
MK 641	Marketing Management	3
MK 643	Product Management	3
	Plus one other course in marketing	3
	Total credits	**12**

Concentration in Media in Business

Advisor: Steven A. Raucher, Associate Professor of Communication, Ph.D., Wayne State University

Note: CO 601 is a prerequisite to CO 613.

CO 601	Basics of Business Media Production Techniques	3
CO 605	Planning Audio Visual Systems for Business	3
CO 609	Scripting the Media Presentation	3
CO 613	Media Presentations for Business	3
	Total credits	**12**

Concentration in Operations Research

Advisor: William S. Gere Jr.

IE 607	Probability Theory	3
IE 621	Linear Programming	3
IE 622	Queuing Theory	3
IE 686	Inventory Analysis	3
	Total credits	**12**

Hospitality Administration

Coordinator: Ronald A. Usiewicz, Associate Professor of Hotel Management, Tourism and Travel Administration, Ph.D., Kent State University.

This program, leading to the master of business administration degree with the hospitality administration option, is designed for those who have completed an undergraduate degree program in hospitality administration or a related major. The student who is not an undergraduate hospitality graduate will be permitted to complete the required undergraduate course work while satisfying the requirements for the M.B.A.

Admission to the option in hospitality administration requires permission of both the M.B.A. program coordinator and the advisor.

Thesis

Students electing to write a thesis must obtain the approval of the coordinator for a proposal prior to registration. The thesis must demonstrate ability to organize material in a clear and original manner and present well-reasoned conclusions.

The thesis is written under the direction of the faculty member in charge of the departmental thesis program or a faculty member with special competence in the subject matter covered by the thesis. The complete and final manuscript must be submitted to the thesis advisor prior to the end of the tenth week of the term in which the student expects to complete the requirements for the degree.

Thesis preparation and submission must comply with the Graduate School policy on theses detailed elsewhere in this catalog.

Hospitality Administration Option

Required Courses

Core Courses

HM 610	Content Seminar in Hospitality/ Institutional/Tourism Administration	3
HM 640	Haute Cuisine for Hospitality Executives	3
HM 655	Development of Hotel/Restaurant/ Institutional Food Services	3
HM 690	Research in Tourism/Hospitality/ Institutional Administration	3
HM 698–699	Thesis I and II*	3
A 621	Managerial Accounting	3
EC 603	Microeconomic Analysis	3
EC 604	Macroeconomic Analysis	3
EC 625	Industrial Relations	3
FI 615	Finance	3
MG 637	Management	3
MK 609	Marketing	3
P 619	Organizational Behavior	3
QA 604	Probability and Statistics	3
	Electives**	3
	Total credits	**48**

Elective Courses**

HM 625	Supervisory and Leadership Development in Tourism, Hospitality, and Institutional Operations	3
HM 630	Personnel and Labor Relations in the Hospitality/Tourism/Institutional Fields	3
HM 635	Applied Dietetics for Health Care Professionals	3
HM 660	Comparative Tourism	3
HM 670	Special Topics in Hospitality, Dietetics and Tourism Administration	3
HM 695	Independent Study I	3
HM 696	Independent Study II	3

*Candidates who elect not to write a thesis may substitute HM 625 and HM 630.
**Elective courses are to be chosen in consultation with an advisor.

Possible Additional Undergraduate Course Requirements

Those candidates who have not completed undergraduate hospitality degree programs will be required to complete 24 to 36 credits of undergraduate hospitality administration courses. These courses will depend upon background in the field, work experience and related course work completed.

The undergraduate catalog of the university lists descriptions of these courses.

Business Administration/ Industrial Engineering Dual Degree Program

Coordinator: William S. Gere Jr., Professor of Industrial Engineering, Ph.D., Carnegie-Mellon University.

The Graduate School has always encouraged inter-disciplinary studies. To foster a broader expertise in the areas of business administration and industrial engineering, a student can now earn both the master of business administration and the master of science in industrial engineering by successfully completing this dual degree program.

The program is intended for students with undergraduate engineering or technical degrees from schools accredited by the Accrediting Board for Engineering and Technology. Applicants with degrees in fields other than industrial engineering will be required to take a number of undergraduate courses or otherwise demonstrate proficiency in several areas normally included in an industrial engineering program.

M.B.A./M.S., Industrial Engineering Dual Degree

The basic M.B.A./M.S.I.E. program consists of 72 credit hours. Up to 12 of these credit hours may be waived on the basis of undergraduate course work, leaving a minimum requirement of 60 credit hours. All waivers must be approved in writing by the appropriate department and are conditional upon subsequent academic performance.

Graduate credit may be transferred from other accredited institutions subject to the Graduate School policy on transfer credit detailed elsewhere in this catalog. In all cases, the residence requirement for the two degrees shall be 60 credit hours completed at the University of New Haven. In addition, a minimum of 21 credit hours must be earned in business courses and a minimum of 21 credit hours must be earned in engineering courses.

Thesis

All students must write either a thesis or a seminar project. The thesis or project must show ability to organize material in a clear and original manner and present well-reasoned conclusions.

The thesis/project is written under the direction of the faculty member in charge of the departmental program or a faculty member with special competence in the subject matter covered by the thesis/project. The complete and final manuscript must be submitted to the thesis/project advisor prior to the end of the tenth week of the term in which the candidate expects to complete the requirements for the degree.

Thesis preparation and submission must comply with Graduate School policy on thesis requirements detailed elsewhere in this catalog.

Required Courses

IE 601	Introduction to Operations Research/ Management Science	3
IE 603F	Introduction to Digital Computers (FORTRAN)	3
IE 604	Management Systems	3
IE 607	Probability Theory	3
IE 621	Linear Programming	3

IE 624	Quality Analysis	3
IE 651	Human Engineering I	3
IE 686	Inventory Analysis	3
A 621	Managerial Accounting	3
EC 603	Microeconomic Analysis	3
EC 604	Macroeconomic Analysis	3
EC 625	Industrial Relations	3
FI 615	Finance	3
MG 637	Management	3
MK 609	Marketing	3
P 619	Organizational Behavior, *or*	3
P 620	Industrial Psychology	3
QA 605	Advanced Statistics	3
	Electives (Business)	6
	Electives (IE or Math)	6
	Plus either:	
	Project (Business or IE)	3
	Electives (Unrestricted)	6
	Or:	
	Thesis	6
	Electives (Unrestricted)	3
	Total credits	**72**

Community Psychology

Coordinator: Robert J. Hoffnung, Professor of Psychology, Ph.D., University of Cincinnati

Community psychology begins with the assumption that human problems occur within a social context and that the most effective interventions into these problems are those that take place within a community framework.

Accordingly, the M.A. program in community psychology provides broad training in current approaches to preventing and treating psychological distress at the level of social institutions, organizations and groups rather than just the individual. Methods of community analysis, consultation and crisis intervention are considered as well as program development, administration and evaluation.

Classroom study is closely integrated with supervised field experiences in a variety of human service organizations and community settings.

Graduates are able to assume positions of responsibility in a broad range of human service settings, such as mental health programs, youth service bureaus, community houses, child development programs, municipal services, halfway houses, senior citizens centers, private agencies, health care systems and community action programs.

We welcome full- and part-time students with varying degrees of human service experience.

Admission Policy

An undergraduate degree from an accredited institution is required. A major in psychology is preferred but not required. However, all students are expected to have at least an introductory level understanding of psychological concepts, principles and methods before entering. Students who have not had an undergraduate course in statistical methods will be required to take one before entry into P 609. We prefer students with strong academic records but welcome applications from students whose work and related experiences suggest potential for success in community psychology.

Applicants are required to submit materials directly to the Graduate School. They may be required to submit scores from either the Miller Analogies Test or the Graduate Record Examinations Aptitude Test, at the discretion of the department. Students intending to go on for further graduate work are strongly encouraged to take the GRE early in the first year.

Practicum Seminars and Field Work

Supervised field experience in a variety of settings represents a major component of the M.A. program in community psychology. Students plan their field work activities under the guidance of both the program's field placement coordinator and their superviser from the field setting. In order to maximize the potential for learning inherent in these experiences, all students take practicum seminars whose content reflects the focus of their field work activities. These seminars enable students to conceptualize issues that they encounter in the field within a broader theoretical framework.

Students with a year or more of appropriate full-time human service experience in a particular field work area will be allowed to substitute an elective for the field work, contingent upon approval of the program coordinator. All students are required to take the three practicum seminars.

Thesis

Students who elect to write a thesis must register for P 698, Thesis I, and P 699, Thesis II. The thesis must show ability to organize materials in a clear and original manner and present well-reasoned conclusions. A thesis is strongly recommended for students wishing to pursue doctoral training after graduation.

The thesis is written under the direction of the faculty member in charge of the thesis seminar or a faculty member with special competence in the subject area of the thesis. The complete and final manuscript must be submitted to the thesis advisor prior to the end of the tenth week of the term in which the candidate expects to complete the requirements for the degree.

Transfer Credit

Transfer credit may be given for graduate course work completed at other accredited institutions, subject to the Graduate School policy detailed elsewhere in this catalog.

M.A., Community Psychology

The program consists of 42 credit hours, 27 of which are of the core curriculum completed by all students and 12 of which constitute one of two areas of concentration. On entering the program, each student chooses one of the concentration options. Typically, students complete most of the core requirements before focusing on their concentration.

Each of concentration areas is designed to enable the student to specialize in one major component of the core curriculum. The Community Organization and Program Administration Concentration emphasizes social system analysis and change, grass roots organizing, and the development and administration of traditional and non-traditional programs and service settings. The Community Mental Health Concentration focuses on the interplay between direct, clinically-oriented services and indirect services, with special stress on the comprehensive community mental health center and the psychological clinic as service delivery settings.

Required Courses

P 605	Survey of Community Psychology	3
P 607	Special Problems in Community Psychology	3
P 609	Research Methods	3
P 610	Program Evaluation	3
P 611	Practicum Seminar I: The Dyadic Relationship	3
P 612	Practicum Seminar II: Models of Consultation	3
P 613	Practicum Seminar III: Systems Intervention	3
P 614	Field Work I	2
P 615	Field Work II	2
P 616	Field Work III	2
	Elective	3
	Concentration	12
	Total credits	**42**

Concentration in Community Organization and Program Administration*

P 619	Organizational Behavior	3
P 623	Psychology of the Small Group	3
P 631	Social Psychology	3
P 642	Organizational Change and Development	3
P 650	Ecological Psychology	3
PA 604	Communities and Social Change	3
	Total credits	**12**

Concentration in Community Mental Health*

P 621	Behavior Modification	3
P 625	Developmental Psychology	3
P 628	The Interview	3
P 629	Introduction to Counseling	3
P 632	Group Dynamics and Group Treatment	3
P 634	Personality Assessment	3
P 636	Abnormal Psychology	3
	Total credits	**12**

*Students will choose 4 courses from those offered within a single concentration.

Computer and Information Science

Coordinator: William S. Gere Jr., Professor of Industrial Engineering, Ph.D., Carnegie-Mellon University

The master of science in computer and information science curriculum is an interdisciplinary program with a software orientation. It is designed to provide a high-level academic background for CIS managers and systems analysts in all career areas. A wide selection of electives allows students to concentrate in either technical or business applications.

M.S., Computer and Information Science

The basic program consists of 48 credit hours. Required courses may be waived on the basis of undergraduate courses taken at accredited institutions.

All waivers must be approved in writing by the industrial engineering department and are conditional upon subsequent academic performance. The transfer of credit from other institutions will be permitted subject to the Graduate School policy on transfer credit detailed elsewhere in this catalog.

For students with little background in computers and programming (no more than one prior course), IE 602 Computing Fundamentals is required; elective credit will be awarded for the course.

Seminar Project

The program requires all students to complete IE 690 Seminar Project. This requirement is met by the preparation of a relevant seminar project report, prepared under the direction of a faculty advisor. The complete and final manuscript must be submitted to the project advisor prior to the end of the tenth week of the term in which the candidate expects to complete the requirements for the degree. For further specifications, see *Research Projects, Seminar Projects and Independent Study Requirements* detailed elsewhere in this catalog. It is suggested that a student begin work on the seminar project after having completed at least 15 credit hours.

In certain cases, students who routinely complete projects similar to the required seminar project as a part of their professional duties may petition to satisfy the seminar project requirement by taking two advanced industrial engineering electives in place of the project. Such a substitution must have the prior written approval of the program coordinator.

Required Courses

IE 601	Introduction to Operations Research/ Management Science	3
IE 603C	Introduction to Digital Computers (COBOL), *or*	
IE 603F	Introduction to Digital Computers (FORTRAN)	3
IE 604	Management Systems	3
IE 605	Advanced Business Programming, *or*	
IE 606	Advanced Technical Programming	3
IE 610	Computer Systems Selection	3

IE 614	Data Information Systems	3
IE 690	Seminar Project	3
EE 615	Introduction to Computer Logic	3
M 610	Fundamentals of Calculus and Linear Algebra	3
	Electives (I.E., Math, or E.E.)	9
	Electives	12
	Total credits	**48**

Criminal Justice

Director: Richard E. Farmer, Assistant Professor of Criminal Justice, Ed. D., Boston University

The President's Commission on Law Enforcement and Administration of Justice assigned a high priority to the task of improving the education and training of personnel entrusted with the administration of criminal justice in the United States.

A key objective of the master of science in criminal justice program is the training and education of men and women planning careers in the field of criminal justice as well as the advanced training and education of the men and women who staff the agencies and institutions of the criminal justice system.

The university views the criminal justice system as one continuous integrated process from a study of the nature of deviant behavior to the role of rehabilitation and parole.

The program stresses a broad understanding of the social and behavioral sciences, the institutions of the criminal justice system, and the development of methodological tools and skills. This is done somewhat at the expense of courses that are narrowly professional in the belief that the field of criminal justice is dynamic and that a broad understanding of the social and behavioral sciences and the methodological skills and tools will prove more valuable to a student's career in the long run than narrow professional training.

The broad fields of the criminal justice program at the university are social and behavioral science, the institutions of the criminal justice system and methodological tools and skills.

The courses in the area of social and behavioral science stress the theories of the behavior of man in a social order and the sanctions imposed by different societies to control the social behavior of their members.

Courses in the area of criminal justice institutions stress the study of the existing system from the police, through the courts, the penitentiaries, and the system of probation and parole.

The methodological courses expose students to the tools of research and analysis and the contribution of systems analysis to the efficient administration of the criminal justice system.

Admission Policy

In addition to the general Graduate School admission requirements, all criminal justice applicants must take the Aptitude Test of the Graduate Record Examination or the Miller Analogies Test as part of the admission procedure. GRE applications are available in the Graduate School office or by writing directly to the Educational Testing Service, Princeton, N.J. Miller Analogies Test may be taken at the UNH Counseling Center. Applicants are also required to complete a questionnaire to be submitted directly to the Graduate School.

M.S., Criminal Justice

A total of 45 credit hours is required of candidates for the degree of master of science of criminal justice.

Candidates must complete required credit hours of required courses in the core curriculum. After consultation with their advisor, students select credit hours of electives from approved courses in the departments of criminal justice, economics, psychology, political science, sociology, industrial engineering and management science.

The transfer of credit from other institutions will be permitted subject to the Graduate School policy on transfer credit detailed elsewhere in this catalog.

Thesis

Students electing to write a thesis must register for thesis credit with the department. The thesis must show ability to organize material in a clear and original manner and present well-reasoned conclusions.

The thesis is written under the direction of the faculty member in charge of the departmental thesis program or a faculty member with special competence in the subject matter covered by the thesis. The complete and final manuscript must be submitted to the thesis advisor prior to the end of the tenth week of the term in which the student expects to complete the requirements for the degree.

Thesis preparation and submission must comply with the Graduate School policy on theses detailed elsewhere in this catalog.

Required Courses

CJ 601	Seminar in Interpersonal Relations	3
CJ 605	Social Deviance	3
CJ 610	Administration of Justice	3
CJ 628	Introduction to Systems Theory	3
CJ 635	Statistics in the Public Sector	3
CJ 637	Contemporary Issues in Criminal Justice	3
CJ 642	Research Techniques in the Social Sciences	3
	Electives (Approved)	24
	Total credits	**45**

Concentrations

In addition to the master of science degree program in criminal justice, there are two concentrations that a student may choose to elect—criminal justice management and correctional counseling.

Concentration in Criminal Justice Management

This concentration is designed for those individuals wishing to pursue a career in the management of a criminal justice agency. Courses are offered jointly between the Division of Criminal Justice and the Department of Public Administration.

CJ 601	Seminar in Interpersonal Relations	3
CJ 610	Administration of Justice	3
CJ 612	Criminal Justice Management	3
CJ 628	Introduction to Systems Theory	3
CJ 635	Statistics in the Public Sector	3
CJ 642	Research Techniques in the Social Sciences	3
CJ 655	Bureaucratic Organization of Criminal Justice	3
PA 602	Public Policy Formulation and Implementation	3
PA 604	Communities and Social Change	3
PA 620	Personnel Administration and Collective Bargaining in the Public Sector	3
PA 632	Public Finance and Budgeting	3
	Electives (Approved)	12
	Total credits	**45**

Concentration in Correctional Counseling

This program, offered jointly between the Division of Criminal Justice and the Department of Psychology, is designed for those individuals currently in correctional counseling positions or those who anticipate a career in correctional counseling.

CJ 601	Seminar in Interpersonal Relations	3
CJ 610	Administration of Justice	3
CJ 622	Learning Theory: Applications in Criminal Justice	3
CJ 624	Group Process in Criminal Justice	3
CJ 693	Criminal Justice Internship I	3
P 611	Practicum Seminar I: The Dyadic Relationship	3
P 618	Community Mental Health Philosophy and Concepts	3
P 628	The Interview	3
P 629	Introduction to Counseling	3
	Electives*—Criminal Justice	9
	Electives*—Psychology	9
	Total credits	**45**

*Electives will be chosen by consent of advisor. Students may be required to take CJ 694—Internship II, depending upon experience, ability, and background.

Electrical Engineering

Coordinator: Gerald J. Kirwin, Professor of Electrical Engineering, Ph.D., Syracuse University

This program is intended to meet the needs of professionally employed engineers and scientists for academic work beyond the baccalaureate level. It has been designed to deepen the understanding of modern analysis and synthesis techniques as they apply to engineering design. A major goal of this program is to provide a discussion of the characteristics of the latest devices and systems and of their applications in current engineering design. Both analytical and numerical procedures are developed with particular emphasis on the use of computers for problem solving and as elements in larger systems.

The program centers on a core sequence which all students are expected to take. The core courses contain advanced methods of analysis and design which are of common interest to electrical engineers. Each student completes a program by electing courses that are particularly suited to current personal interests. In general the elective courses must be courses from those listed below. Early in the program the student, with the help and approval of an advisor, prepares a detailed plan ensuring an overall educational experience that is integrated and logical. All decisions regarding both core and elective courses are subject to the final approval of the student's advisor.

Admission Policy

Admission to the program is open to persons holding an undergraduate engineering degree from an institution accredited by the Accrediting Board for Engineering and Technology. Though admission decisions are based primarily on an applicant's undergraduate record, the promise of academic success is the essential factor for admission.

M.S., Electrical Engineering

A minimum total of 39 credit hours must be completed to earn the master of science in electrical engineering degree. The transfer of credit from other institutions will be permitted subject to the Graduate School policy on transfer credit detailed elsewhere in this catalog.

Thesis

There is no specific thesis requirement for the master of science in electrical engineering. However, students are encouraged to submit a thesis proposal covering applied research in an area of mutual interest to the student and a supervising member of the faculty. If a proposal shows promise of yielding a worthwhile contribution to the professional objectives of the student, and a faculty member accepts the role of supervisor, the student may embark upon the research and earn six elective credits. Students electing to do a thesis project will be expected to make an oral presentation of the results of the project.

The complete and final manuscript must be submitted to the thesis advisor prior to the end of the tenth week of the term in which the candidate expects to complete the requirements for the degree. Thesis preparation and submission must comply with the Graduate School policy on theses detailed elsewhere in this catalog.

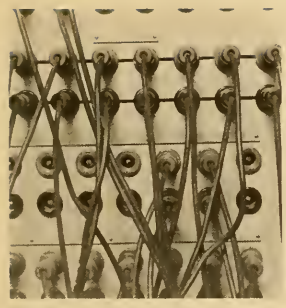
The thesis is deposited permanently in the library. Students are required to submit two copies of the thesis for the library. Additional copies of the thesis are usually required. For this requirement and other regulations regarding the preparation of a thesis, students should consult the *Manual for the Preparation of Graduate Theses and Seminar Projects.* Copies of the manual are available in the Graduate School office.

Required Courses

EE 603	Discrete and Continuous Systems I	3
EE 604	Discrete and Continuous Systems II	3
EE 630	Electronic Instrumentation I	3
EE 640	Computer Engineering I	3
EE 650	Random Signal Analysis	3
IE 685	Theory of Optimization	3
M 620	Numerical Analysis	3
M 624	Applied Mathematics	3
M 632	Methods of Complex Analysis	3
	Electives (Approved)	12
	Total credits	**39**

Elective Courses

EE 605	Modern Control Systems	3
EE 608	Computer Aided Design	3
EE 631	Electronic Instrumentation II	3
EE 634	Digital Signal Processing I	3
EE 635	Digital Signal Processing II	3
EE 641	Computer Engineering II	3
EE 645	Power Systems Engineering I	3
EE 646	Power Systems Engineering II	3
EE 658	Microprocessors—Theory and Applications	3
EE 670	Special Topics—Electrical Engineering	3
EE 695	Independent Study I	3
EE 696	Independent Study II	3
EE 698-699	Thesis I and II	6



Environmental Engineering

Coordinator: George R. Carson, Associate Professor of Civil Engineering, M.S.C.E., Columbia University

The environmental engineering program is intended to meet the needs of engineers for academic work beyond the baccalaureate level. The program is interdisciplinary in nature and incorporates both engineering and science courses.

There exists today a need for a substantial number of engineers knowledgeable in environmental areas. Industries that are required to control the pollution of air and water need environmental engineers. Federal, state and local governments must hire employees and consultants to assist them in environmental matters. Other new vistas will undoubtedly open to the environmental engineers in the future. Environmental engineers will be in increasingly greater demand with the continually increasing problems of pollution.

The recognition and solution of environmental problems are largely the responsibility of engineers and scientists. To perform effectively in this massive effort, they must be technically competent as well as knowledgeable in social and economic matters.

This program provides the advanced educational skills necessary to meet the ever increasing need for engineers with an environmental background. It is designed to offer vigorous, professionally oriented, engineering and science courses in the areas of solid waste, water and air pollution.

Approximately two-thirds of the program consists of a required sequence of courses which each student must complete. The balance of the program consists of courses selected from the list of electives. Selection will be based on the student's principal field of interest. Each student, upon entering this program, will be assigned a faculty advisor who will consult with the student during the program of study and will assist the student in selection of suitable electives. The faculty advisor will also act as the student's research project advisor.

Admission Policy

Candidates for admission in the environmental engineering program are expected to have an engineering degree from an institution accredited by the Accrediting Board for Engineering and Technology.

M.S., Environmental Engineering

A total of 39 credit hours must be completed to earn the master of science in environmental engineering degree. The transfer of credit from other institutions will be permitted subject to the Graduate School policy on transfer credit detailed elsewhere in this catalog.

Required Courses

CE 601	Water Treatment	3
CE 602	Wastewater Treatment	3
CE 605	Solid Waste Management	3
CE 606	Environmental Law and Legislation, *or*	
CE 612	Advanced Wastewater Treatment	3
CE 613	Industrial Wastewater Control	3
CE 690	Research Project	3
CH 601	Environmental Chemistry	3
EC 608	Economics for Public Administrators	3
SC 601	Ecology for Environmental Engineers	3
SC 602	Pollutants and the Aquatic Environment, *or*	
SC 603	Air Pollution	3
	Elective (CE)	3
	Electives (Approved)	6
	Total credits	**39**

Environmental Sciences

Coordinator: Charles L. Vigue, Assistant Professor of Science and Biology, Ph.D., North Carolina State University

The environmental sciences program is intended to meet the needs of scientists for academic work in environmental studies beyond the baccalaureate level. The program is interdisciplinary in nature and incorporates science and engineering courses. This program is designed to accommodate the student with a degree in one of the natural sciences.

There exists today a need for a substantial number of scientists knowledgeable in environmental areas. Industries that are required to control the pollution of air and water need environmental scientists. Federal, state and local governments must hire employees and consultants to assist them in environmental matters. Other new vistas will undoubtedly open to the environmental scientists of the future. Environmental scientists will be in increasingly greater demand with the continually increasing problems of pollution.

The recognition and solution of environmental problems are largely the responsibility of scientists and engineers. To perform effectively in this massive effort, they must be technically competent as well as knowledgeable in social and economic matters.

This program provides the advanced educational skills necessary to meet the ever increasing need for scientists with an environmental background. It is designed to offer vigorous, professionally oriented science and engineering courses in the areas of solid waste, water and air pollution.

Approximately two-thirds of the program consists of a required sequence of courses that each student must complete. The balance of the program consists of courses selected from a list of electives. Selection will be based on the student's principal field of interest. Each student, upon entering this program, will be assigned a faculty advisor who will consult with the student during the program of study and will assist in selection of suitable electives.

Admission Policy

Candidates for admission to the environmental sciences program would be expected to have a degree in one of the natural sciences in which certain prerequisite courses have been completed. Students without these courses would be admitted to the program after completing these prerequisites.

M.S., Environmental Sciences

A total of 42 credit hours must be completed to earn the master of science in environmental sciences degree. The transfer of credit earned at other institutions will be permitted subject to the Graduate School policy on transfer credit detailed elsewhere in this catalog.

Required Courses

CE 601	Water Treatment, *or*	
CE 602	Wastewater Treatment	3
CE 605	Solid Waste Management	3
CE 606	Environmental Law and Legislation, *or*

	Electives (approved)	9
	Total credits	**42**

Executive Master of Business Administration

Director: John Moore, Assistant Professor of Management Science, Ph.D., Southern Illinois University

The Graduate School and the School of Business offer an executive master of business administration (EMBA) degree for high-level executives with extensive managerial experience. The program is designed specifically in consideration of managerial responsibilities and existing time constraints.

The EMBA degree program is a two-year, part-time degree program organized to meet the educational needs and executive responsibilities of corporate and institutional leaders. Individual participation is emphasized through class discussions and cooperation with others in the class. Each class is generally limited to between 15 and 20 students. Class members commence and conclude the program as a group.

No graduate transfer credit is accepted into the EMBA program. Admission to the EMBA degree program is by special application, the form for which may be obtained from the EMBA program director. Classes commence in September and January, providing a sufficient number of qualified applicants have applied from which proper selection may be made. An admission committee screens the applications to insure proper selection. A personal interview with the admissions committee is required. Factors such as current position, length of top-management experience, and prior formal education are important factors in the selection process. The selection committee attempts to provide from among the applicants those individuals who will bring a diverse grouping of managerial skills and experiences, thereby allowing the students to learn from each other as well as from the faculty.

Upon completion of the program, participants will be awarded the degree of master of business administration (the executive program).

Information concerning admission procedures and the academic calendar may be obtained by writing to the EMBA program director.

Executive M.B.A.

The program consists of twenty courses scheduled into two ten-month academic calendar years. Each course is four sessions in length. All classes meet one afternoon/early evening per week in designated off-campus conference facilities for participant convenience. Participants must agree in advance to attend all classes except for emergencies. Students must be prepared to devote additional time for class preparation and reading assignments.

Required Courses

The courses in the Executive M.B.A. program are listed below in the order in which they are taken.

EXID 903 The Communication Process 1½

Quantitative Group

EXID 936 Statistics and Forecasting 1½
EXID 915 Quantitative Decision Making 1½
EXID 918 Managerial Economics 1½
EXID 939 Operations Research and Management 1½

EXID 960	Computers and Management	1½

Industrial Relations Group

EXID 909	Business & Government Relations	1½
EXID 948	Labor and Management Relations	1½
EXID 945	Human Resources Management	1½

Finance Group

EXID 924	Financial Management I	1½
EXID 927	Financial Management II	1½
EXID 912	Financial Accounting	1½
EXID 942	Managerial Accounting	1½

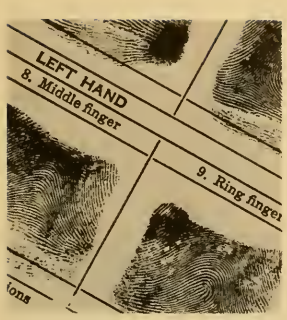
Marketing Group

EXID 930	Marketing Management	1½
EXID 933	International Business	1½
EXID 951	Marketing Management Seminar	1½

Management Group

EXID 906	The Management Process	1½
EXID 954	Organizational Development	1½
EXID 957	Corporate Policy and Strategy	1½
EXID 921	Executive Development Seminar	1½
	Total credits	**30**

Forensic Science



Director: Robert E. Gaensslen, Professor of Criminal Justice, Ph.D., Cornell University

Forensic science is a broad interdisciplinary field in which the natural sciences are employed to analyze and evaluate physical evidence related to matters of law. The interdisciplinary forensic science program provides the advanced technical background for professionals in the forensic science field as well as for those in allied fields such as pathology, law, criminal justice administration, security, various areas of investigation in crime, fire and insurance, environmental studies and chemistry, for whom knowledge of the concepts and methods of forensic science is vital for the advancement of their professional performance.

The master of science in forensic science program stresses not only up-to-date analytical and scientific methods, but also the broad and understanding of forensic science concepts. The program centers on a core sequence of courses which all students are expected to complete. Students may then concentrate in either criminalistics or administration.

Admission Policy

For admission to the master of science in forensic science program, a student must have an undergraduate degree in a natural or related science. Applicants with deficiencies in one or more areas may be provisionally accepted and will be required to complete the appropriate

background courses during the early stage of the program before being fully matriculated. Applicants must take the aptitude test of the Graduate Record Examination or the Miller Analogies Test, and complete a questionnaire to be submitted directly to the Graduate School.

M.S., Forensic Science

Candidates are required to complete 40 credit hours of graduate work, which may include an internship in a forensic science laboratory or equivalent work with other related agencies. The transfer of credit from other institutions will be permitted subject to the Graduate School policy on transfer credit detailed elsewhere in this catalog.

Thesis

Students electing to write a thesis must register for thesis credit with the department. The thesis must show an ability to organize material in a clear and original manner, and present well-reasoned conclusions. Thesis preparation and submission must comply with Graduate School regulations detailed elsewhere in this catalog.

The forensic science laboratory of the university is available for research, and the laboratory maintains close contact with various laboratories in the area to afford students the opportunity to observe, study and learn from many outstanding forensic scientists.

Required Courses

CJ 647	Advanced Criminalistics I	4
CJ 648	Advanced Criminalistics II	4
CJ 657	Physical Analysis in Forensic Science	4
CJ 659	Biomedical Methods in Forensic Science	4
	Electives	24
	Total credits	**40**

Basic Science Electives

CH 611	Special Topics in Advanced Organic Chemistry	3
CH 621	Chemical Forensic Analysis with Laboratory	4
CH 631	Advanced Analytical Chemistry	3
CJ 660	Forensic Microscopy	4
CJ 661	Medicolegal Investigation and Identification	3
CJ 662	Forensic Toxicology	4
CJ 663	Advanced Forensic Serology	4

Criminal Justice Electives

CJ 608	Law and Evidence	3
CJ 610	Administration of Justice	3
CJ 615	Forensic Science in the Administration of Justice	3
CJ 628	Introduction to Systems Theory	3
CJ 637	Contemporary Issues in Criminal Justice	3
CJ 690	Research Project I	1-3
CJ 691	Research Project II	1-3
CJ 693	Criminal Justice Internship I	3
CJ 694	Criminal Justice Internship II	3
CJ 695	Independent Study	1-3

Other Electives

Up to nine credits of electives may be chosen from related areas within the graduate curriculum.

Gerontology

Coordinator: Judith Bograd Gordon, Associate Professor of Sociology, Ph.D., University of Michigan

The gerontology program is designed for both the practicing professional and those interested in the field of gerontology.

Gerontology is an interdisciplinary field. The core curriculum exposes students to the fundamental insights and perspectives of sociology, social welfare, political science, psychology and administration, and aids students to compare and contrast these disciplines. The program is designed to expose students to crucial skills necessary to function effectively as gerontological professionals and to prepare them to pursue leadership roles in the field.

The gerontology program is suitable for government employees, health care professionals and program administrators working in the field of aging, and for those considering such careers now or in the future.

Admission Requirements

Prospective students must fulfill the admission requirements of the Graduate School. In addition, they may be required to fulfill additional requirements set by the Committee on Studies in Gerontology.

M.A., Gerontology

Each degree candidate will complete an 18-hour core curriculum, and either the 21-hour concentration in psycho-social studies or the 21-hour concentration in administrative studies. A total of 39 credit hours is required for the degree. The transfer of credit from other institutions will be permitted subject to the Graduate School policy on transfer credit detailed elsewhere in this catalog. All waivers must be approved in writing by the program coordinator.

Required Courses

SO 651	Social Gerontology*	3
SO 652	Seminar in Gerontology*	3
P 672	Psychology of the Middle and Later Years	3
PA 644	Administration of Programs and Services for the Aged	3
PS 633	The Political Process and the Aged	3
SC 642	Physical Aging	3
	Concentration	21
	Total credits	**39**

*Students are expected to take SO 651 Social Gerontology early in their studies and SO 652 toward the end of the program.

Concentrations

Concentration in Administrative Studies**

P 619	Organizational Behavior	3
PA 604	Communities and Social Change	3
PA 641	Financial Management of Health Care Organizations	3
PA 643	Health and Institutional Planning	3
	A management science elective, by advisement	3
	Electives, by advisement	6
	Total credits	**21**

**Students with no prior supervised working experience in gerontology are strongly advised to undertake a field work practicum.

Concentration in Psycho-social Relations**

SO 641	Death and Suicide	3
SW 651	Social Work with the Elderly I: Individuals, Families and Groups	3
SW 652	Human Services with the Elderly II: Programs, Planning, Policies	3
	Plus three courses from the following:	
P 623	Psychology of the Group	3
P 625	Developmental Psychology	3
P 630	Psychology of Personality	3
P 632	Group Dynamics and Group Treatment	3
P 636	Abnormal Psychology	3
	Electives	3
	Total credits	**21**

Humanities

Coordinator: David E. E. Sloane, Associate Professor, English, Ph.D., Duke University

The program leading to a master of arts degree in humanities develops an understanding of the range of social, practical, and artistic creativity; an appreciation of the cultural achievements of our past; and an increased sensitivity to the involvement of past achievement, present activity and future aspirations—the constituents of human culture.

The curriculum is interdisciplinary, designed for the adult seeking intellectual challenge. Colloquia are conducted by two faculty members from different academic areas, and are concerned with an historical period or a seminal idea. Seminars are given by a single instructor and are more particular in focus. Independent study enables students to pursue their own interests. All courses are conducted as part of a continuing dialogue between students and faculty, stressing the relevance of our cultural tradition to the problems and issues of contemporary American life.

Although the orientation of the program is toward Western thought, opportunity to pursue threads of investigation into other cultures is available and is encouraged.

M.A., Humanities

To earn the M.A. in humanities, students must accumulate 45 hours of credit including the writing of a thesis or the presentation of an acceptable portfolio for students in the arts. Transfer credit will be given when appropriate.

The normal program includes at least eight seminars and colloquia. Past seminars have covered such topics as Culture and Ethics in the Modern Age, Technology and Human Values, Nationalism in Nineteenth Century Art, Mark Twain and American Social Values, Twentieth Century Theatre and more.

Required Courses

HU 606	Humanism and Its Methodology	3
HU 601-689	Seminars and Colloquia	30
HU 691-695	Independent Study	6
HU 698-699	Thesis I and II	6
	Total credits	**45**

1982-83 Seminars and Colloquia

HU 601-602 Themes in Western Thought and Culture: Greece, Rome
Special Topic: Urban Welfare in Classical Greece and Rome
HU 661 Historical Views and Views of History
Special topic: History and Public Policy and Law
HU 621 The Age of Enlightenment
Special topic: American Philosophy and Mechanism—New Haven 1798-1826
HU 661-669 Topics in History
Special topic: Religion and Revolution: 1750-1850

Industrial Engineering

The School of Engineering

Coordinator: William S. Gere Jr., Professor of Industrial Engineering, Ph.D., Carnegie-Mellon University

The master of science in industrial engineering is considered a fifth-year or professional degree, and is designed to provide a broad background in operations research, man-machine systems and human factor analysis.

Admission Policy

Admission to the program is open to persons holding an undergraduate degree in engineering from a program accredited by the Accreditation Board for Engineering and Technology (ABET). In some cases, an applicant with a degree in a related field may be considered for admission. Applicants with degrees in fields other than industrial engineering will be required to take a number of undergraduate courses or otherwise demonstrate proficiency in several areas normally included in an industrial engineering program.

Though admission decisions are based primarily on an applicant's undergraduate record, the promise of academic success is the essential factor for admission.

M.S., Industrial Engineering

The basic program consists of 48 credit hours. The transfer of credit from other institutions will be permitted subject to the Graduate School policy on transfer credit detailed elsewhere in this catalog. Required courses may be waived on the basis of undergraduate courses taken at accredited institutions. All waivers must be approved in writing by the Department of Industrial Engineering and are conditional upon subsequent academic performance. In some cases, the program coordinator may permit substitution of relevant courses in place of the required courses.

Seminar Project

The program requires all students to complete IE 690 Seminar Project. This requirement is met by the preparation of a relevant seminar project report, prepared under the direction of a faculty advisor. The complete and final manuscript must be submitted to the project advisor prior to the end of the tenth week of the term in which the candidate expects to complete the requirements for the degree. For further specifications see *Research Projects, Seminar Projects and Independent Study* requirements detailed elsewhere in this catalog. It is suggested that a student begin work on the seminar project after having completed at least 15 credit hours.

In certain cases, students who routinely complete projects similar to the required seminar project as a part of their professional duties may petition to satisfy the seminar project requirement by taking two advanced industrial engineering electives in place of the project. Such a substitution must have the prior written approval of the program coordinator.

Required Courses

IE 601	Introduction to Operations Research/ Management Science	3
IE 603F	Introduction to Digital Computers (FORTRAN)	3
IE 607	Probability Theory	3
IE 624	Quality Analysis	3
IE 651	Human Engineering I	3
IE 690	Seminar Project	3
EC 603	Microeconomic Analysis, *or*	
EC 604	Macroeconomic Analysis	3
EC 625	Industrial Relations	3
P 619	Organizational Behavior, *or*	
P 620	Industrial Psychology	3
	Electives (IE or Math Courses)	9
	Electives	12
	Total credits	**48**

Industrial Relations

Coordinator: Frank A. Scalia, Professor of Management Science, Ph.D., Carnegie-Mellon University

Industrial relations, as a social and behavioral science discipline, is the field of study concerned with all aspects, both macro and micro, of the employment relationship. As an applied organizational and societal function, industrial relations is the profession concerned with the management of the aggregate manpower resources available for, or engaged in, the employment relationship.

As both an academic discipline and a profession, industrial relations is an interdisciplinary, problem-solving field that attempts to maintain harmony and resolve conflicts among four major parties to the employment relationship—employers, employees, unions and government.

The field of industrial relations has been growing rapidly and is becoming increasingly important for the effective functioning of almost all kinds of organizations. More and more companies and institutions have created activities requiring the services of personnel conversant with the large body of tools and knowledge that has been generated in the field in the past two decades.

The program will aim to present the knowledge and the skill needed to provide employment opportunities in various kinds of organizations in the fields of employee procurement, training and development, wage and salary administration, employee services and benefits, safety, labor-management relations, job and organization structuring, labor economics, supervision and manpower planning. The program will also establish the foundation for advanced study and research.

The interdisciplinary orientation of the M.S. in industrial relations program is emphasized in the required courses, which are drawn from economics, management and psychology. It is further supported in the program's concentration electives, which is drawn from economics, industrial engineering, management, political science, psychology, public administration and quantitative analysis.

Admission Policy

Admission is open to individuals holding a baccalaureate degree from an accredited institution of higher education. The undergraduate degree should preferably, but not exclusively, be in a social or behavioral science (i.e., economics, history, political science, psychology, or sociology), business administration or public administration. Admission is also open to full-time employed professionals in personnel and industrial relations holding a baccalaureate degree in any field from an accredited institution.

Though admission decisions are based primarily on an applicant's undergraduate record, the promise of academic success is the essential factor for admission. Any applicant may be required to complete selected undergraduate courses with a grade of **B** or better as a condition of admission. Before matriculating, a student may be required to submit scores from either the Graduate Management Admissions Test (GMAT) or the Graduate Record Examination (GRE). To demonstrate that they have acceptable communication skills, persons may be required to submit a writing sample and to have a personal interview with the industrial relations program coordinator. Finally, applicants are expected to possess personal attributes that will support success in the personnel and industrial relations profession.

M.S., Industrial Relations

A minimum total of 39 graduate credit hours is required for the master of science degree in industrial relations. Of these 39 graduate credit hours, 21 graduate credit hours are in approved industrial relations elective courses.

A list of approved industrial relations elective courses is available from the industrial relations program coordinator. Students wishing to take courses not on the list must secure the approval of the coordinator before registering for the course. The considerable flexibility in the choice of elective courses makes it possible for the student to tailor his or her individual program of study to specific functions of human resources management that the student finds to be of interest.

Candidates for the M.S. in industrial relations must be familiar with the use of statistics in solving problems and decision making. Knowledge of statistics is assumed in the advanced courses in the industrial relations program. Students without this background may be required to take credit and/or non-credit courses in quantitative analysis.

Required Courses

EC 625	Industrial Relations	3
EC 627	Economics of Labor Relations	3
EC 687	Collective Bargaining	3
MG 637	Management	3
MG 678	Personnel Management Seminar	3
MG 679	Industrial Relations Seminar	3
P 619	Organizational Behavior	3
	Electives (Approved)	18
	Total credits	**39**

Legal Studies

Coordinator: Franz B. Gross, Professor of Political Science, Ph.D., Harvard University

In view of the increasing importance and complexity of law in society and its relevance to non-lawyers, the program is designed to provide expanded knowledge and understanding of the origins and applications of law in the modern world.

The program will explore the theoretical foundations of law and the structural foundations of American and international law, as well as more specific and technical application affecting modern institutions, corporations, and individuals. In addition, electives will permit concentrations in two major areas of law—Law and the Public Sector and Law and the Industrial Process.

The interdisciplinary program will examine the creation and functioning of law at the global, national and state levels among administrative bodies, regulatory agencies, legislatures, and the courts. Among the issue-areas covered are legislative law-making, lobbying, contracts, torts, occupational health and safety, collective bargaining, taxation, equal employment opportunity, and affirmative action.

M.A., Legal Studies

All students in the master of arts in legal studies program must earn a minimum of 42 credit hours, including 24 credits of required core courses. They should select 18 credits in a concentration, either Law and the Public Sector or Law and the Industrial Sector as outlined below.

Each student is expected to write a thesis or take a comprehensive examination in the last year of graduate study. Additional concentrations may be available in 1982 and 1983. Students wishing to coordinate new concentrations with existing concentrations may do so upon the approval and advice of the coordinator.

Required Courses

PS 601	Constitutional Law	3
PS 602	Civil Liberties and Rights	3
PS 603	International Law	3
PS 610	Legal Methods I	3
PS 615	Jurisprudence	3
PS 625	Transnational Legal Structure	3
PS 655	Conflict Resolution	3
LA 673	Business Law I: Contracts and Sales	3
	Concentration	18
	Total credits	**42**

Concentrations

Concentration I: Law and the Public Sector

PS 608	The Legislative Process	3
	Plus five of the following courses:	
PS 604	Human Rights and the Law	3
PS 605	Criminal Law	3
PS 613	Political Justice	3
PS 616	Urban Government	3
PS 628	Change and Government	3
PS 633	The Political Process and the Aged	3
PS 635	Law and Public Health	3
PS 652	Legal Administration	3
PS 670	Special Topics	3
PS 698-99	Thesis I and II	6
CE 606	Environmental Law and Legislation	3
HU 631	Culture and Ethics in the Modern Age	3
PA 650	Administrative Law	3
SO 649	Seminar in Health and Social Policy	3
	Total credits	**18**

Concentration II: Law and the Industrial Sector

PS 626	Decision Making in the Political Process	3
	Plus five of the following courses:	
PS 612	Contracts, Torts and the Practice of Law	3
PS 617	Law, Science and Ethics	3
PS 645	Government and the Industrial Sector	3
PS 670	Special Topics	3
PS 698-99	Thesis I and II	6
PA 650	Administrative Law	3
A 601	Federal Income Taxation I	3
A 604	Corporate Income Taxation I	3
A 609	State and Local Taxation	3
A 614	Federal Tax Practice and Procedure	3
EC 629	Public Policies Toward Business	3
EC 687	Collective Bargaining	3
HU 641	Technology and Human Values	3
LA 674	Business Law II: Business Organizations and Negotiable Instruments	3
MG 665	Compensation Administration	3
SH 620	Occupational Safety and Health Law	3
SH 630	Product Safety and Liability	3
	Total credits	**18**

Logistics

Coordinator: Robert Brooks, Assistant Professor, Marketing, M.B.A., New York University

The master of science in logistics is designed to provide the degree candidate with a sound specialized knowledge of logistics. The program is based upon the definition of logistics as the science of designing and operating complex systems that acquire, distribute, maintain, recycle and dispose of all types of resources over the lifetime of a product, system or service. Logistics is thus a multidisciplinary field with relevance to high-technology defense industries, non-defense private enterprise and the transportation industry.

In order to provide flexibility and specialization in terms of various career fields within the scope of logistics, the program is designed with a series of common courses in statistics and operations research, systems theory and simulation, and logistics management and support analysis. These courses provide the background for concentrations that provide specialized training in particular career fields: logistics management, logistics engineering and business logistics.

Admission Policy

Admission to the master of science in logistics program is open to persons who hold an undergraduate degree from an accredited institution. An undergraduate grade point average of at least 3.0 (on a 4.0 scale) is required for full matriculation. Students with a grade point average between 2.5 and 3.0 may be considered for provisional accept-

ance. All applicants must take the Graduate Record Examination as part of the admission procedure. Admission is based on an applicant's undergraduate record and GRE score. However, the promise of academic success is the essential factor for admission. Students are admitted to the program during the fall and winter trimesters.

M.S., Logistics

A total of 48 credits is required of candidates for the M.S. in logistics degree. Candidates for the M.S. in logistics program are expected to have a sound background in calculus and matrix algebra, FORTRAN, microeconomics and management. Students who show deficiencies in these areas will be required to take additional coursework in these areas before admission as a degree candidate. Required courses in the core may be waived on the basis of undergraduate courses taken at accredited institutions. All waivers must be approved in writing by the program coordinator and are conditional upon subsequent academic performance.

Seminar Project

The program requires all students to complete LG 690 Seminar Project. This requirement is met by the preparation of a relevant seminar project report under the direction of a faculty advisor. The complete and final manuscript must be submitted to the project advisor prior to the end of the tenth week of the term in which the candidate expects to complete the requirements for the degree. For further specifications, see *Research Project, Seminar Projects and Independent Study* requirements detailed elsewhere in this catalog. It is suggested that a student begin work on the seminar project after having completed at least 15 credit hours.

In certain cases, students who routinely complete projects similar to the required seminar project as part of their professional duties may petition to satisfy the seminar project requirements by taking advanced electives in place of the project. Such a substitution must have the prior written approval of the program coordinator.

Required Courses

IE 601	Introduction to Operations Research/ Management Science	3
IE 604	Management Systems	3
IE 681	System Simulation	3
IE 686	Inventory Analysis	3
LG 660	Logistics Technology and Management	3
LG 665	Integrated Logistics Support Analysis	3
QA 605	Advanced Statistics	3
QA 606	Advanced Management Science	3
QA 607	Forecasting	3
	Concentration	21
	Total credits	48

Concentration in Logistics Management

LG 669	Life Cycle Cost Analysis	3
LG 690	Seminar Project	3
MG 638	Cost-Benefit Management	3
MG 635	Purchasing and Materials Management	3
MG 641	Contract Administration	3
	Restricted electives	6
	Total credits	21

Concentration in Logistics Engineering

IE 643	Reliability and Maintainability	3
IE 624	Quality Analysis	3
LG 669	Life Cycle Cost Analysis	3
LG 690	Seminar Project	3
	Restricted electives	9
	Total credits	**21**

Concentration in Business Logistics

IE 615	Transportation and Distribution	3
LG 690	Seminar Project	3
MG 625	Systems Techniques in Business Administration	3
MG 635	Purchasing and Materials Management	3
MK 645	Distribution Strategy	3
	Restricted electives	6
	Total credits	**21**

Mechanical Engineering

Coordinator: Richard J. Greet, Professor of Mechanical Engineering, Ph.D., Harvard University

This program is intended to meet the needs of professionally employed engineers and scientists for academic work beyond the baccalaureate level. It has been designed to increase competence in modern analysis and synthesis techniques as they apply to engineering design.

The program centers on a core sequence which all students are expected to take. The core courses contain advanced methods of analysis and design which are of common interest in engineering work. Students complete the program by electing a series of courses in mechanical engineering that is particularly suited to their current professional interests. Early in the program, students, with the approval of their advisors, prepare a detailed plan insuring an overall educational experience that is integrated and logical.

All decisions regarding both core and elective requirement are subject to final approval of the student's advisor.

M.S., Mechanical Engineering

A minimum of 39 credits must be completed to earn the master of science degree in mechanical engineering. The transfer credit from other institutions will be permitted subject to the Graduate School policy on transfer credit. Thesis topics should be approved by the faculty advisor when the student has completed 18-21 graduate credits. Thesis preparation and submission must comply with Graduate School policy on theses. The final manuscript must be submitted to the advisor prior to the end of the tenth week of the term in which the candidate expects to complete the requirements for the degree.

Required Courses

M 624	Applied Mathematics	3
ME 602	Boundary Value Problems	3
ME 603	Approximation Methods	3
ME 604	Numerical Methods, *or*	
M 620	Numerical Analysis	3
ME 615	Theory of Elasticity	3
ME 625	Mechanics of Continua	3
ME 630	Advanced Fluid Mechanics	3
ME 698-699	Thesis I and II	6
	Electives	12
	Total credits	**39**

Elective Courses

ME 610	Advanced Dynamics	3
ME 611	System Vibrations	3
ME 620	Classical Thermodynamics	3
ME 622	Statistical Mechanics	3
ME 628	Modern Materials	3
ME 632	Advanced Heat Transfer	3
ME 645	Computational Fluid Dynamics and Heat Transfer	3
ME 670	Special Topics—Mechanical Engineering	3
ME 695	Independent Study I	3
ME 696	Independent Study II	3

Occupational Safety and Health Management

Coordinator: Abdul H. Qazi, Associate Professor of Occupational Safety and Health Management, Ph.D., Environmental Health and Industrial Hygiene, University of Oklahoma

The master in science in occupational safety and health management is designed to provide the core technical knowledge in the OSH field and the managerial skills to administrate a safety and health program, particularly at the corporate level.

The program is designed to accommodate both the active practitioner in the OSH field as well as the novice who aspires to a career in this dynamic occupation. This flexibility is provided through a program sequence of 30 credit hours of core courses and 18 credit hours of elective courses offered in science/engineering and management areas.

Admissions Policy

Admission to the master of science in occupational safety and health management program is open to persons who hold a baccalaureate degree from an accredited institution. An undergraduate grade point average of at least 2.5 on a 4.0 scale is required for provisional acceptance, 3.0 for full matriculation. Undergraduate courses in general chemistry, general physics, biology, statistics, psychology, and accounting are required. The degree candidate may be required to submit scores from the Graduate Record Examination. Students who do not meet all requirements will be evaluated on an individual basis.

M.S., Occupational Safety and Health Management

Candidates are required to complete 48 credit hours of graduate work. Transfer of credit from other institutions will be permitted subject to the Graduate School policy on transfer credit noted elsewhere in this catalog. Consideration for waiver of core courses on the basis of undergraduate experience is at the discretion of the program coordinator.

The student has the option of selecting nine credit hours in electives with the approval of the faculty advisor. In order to graduate, students also must elect either six hours from SH 693/694 Internship, SH 695/696 Independent Study, or SH 698/699 Thesis in accordance with the Graduate School requirements on theses detailed elsewhere in this catalog.

Required Courses

SH 602	Safety Organization and Administration	3
SH 605	Industrial Safety Engineering	3
SH 608	Industrial Hygiene Practices	3
SH 611	OSH Seminar	1
SH 615	Industrial Toxicology	3
SH 620	Occupational Safety and Health Law	2
SH 630	Product Safety and Liability	3
IE 651	Human Engineering I	3
MG 637	Management	3
P 619	Organizational Behavior	3
QA 604	Probability and Statistics	3
	Electives*	18
	Total credits	**48**

Elective Courses

CE 602	Wastewater Treatment	3
CH 601	Environmental Chemistry	3
IE 612	Managerial Interactions I	3
MG 664	Organizational Effectiveness	3
MG 678	Personnel Management Seminar	3
P 640	Industrial Motivation and Morale	3
SC 603	Air Pollution	3
SC 610	General Environmental Health	3
SH 660	Industrial Ventilation	3
SH 670	Selected Topics	3
SH 690-691	Research Project I and II	1-3 each
SH 693-694	OSH Internship I and II	1-3 each
SH 695-696	Independent Study I and II	1-3 each
SH 698-699	Thesis I and II	6

*Subject to faculty approval, three elective credits will become required credits.

Operations Research

Coordinator: William S. Gere Jr., Professor of Industrial Engineering, Ph.D., Carnegie-Mellon University

The master of science in operations research curriculum provides thorough coverage of the theory, methodology and application of the techniques of operations research and systems analysis. The program is designed to prepare qualified applicants from diverse backgrounds to deal with major social, industrial and business problems.

M.S., Operations Research

The basic program consists of 48 credit hours. The transfer of credit from other institutions will be permitted subject to the Graduate School policy on transfer credit detailed elsewhere in this catalog. Required courses may be waived on the basis of undergraduate courses taken at accredited institutions. All waivers must be approved in writing by the Department of Industrial Engineering and are contingent upon subsequent academic performance. In some cases, the coordinator may permit substitution of relevant courses in place of the required courses.

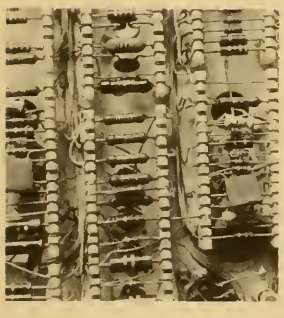
Seminar Project

The master of science in operations research program requires all students to complete IE 690 Seminar Project. This requirement is met by the preparation of a relevant seminar project report, prepared under the direction of a faculty advisor. The complete and final manuscript must be submitted to the project advisor prior to the end of the tenth week of the term in which the candidate expects to complete the requirements for his degree. For further specification see *Research Projects, Seminar Projects and Independent Study* requirements detailed elsewhere in this catalog. It is suggested that a student begin work on the seminar project after having completed at least 15 credit hours.

In certain cases, students who routinely complete projects similar to the required seminar project as a part of their professional duties may petition to satisfy the seminar project requirement by taking two advanced industrial engineering electives in place of the project. Such a substitution must have the prior written approval of the program coordinator.

Required Courses

IE 601	Introduction to Operations Research/ Management Science	3
IE 603F	Introduction to Digital Computers (FORTRAN)	3
IE 607	Probability Theory	3
IE 621	Linear Programming	3
IE 622	Queuing Theory	3
IE 685	Theory of Optimization	3
IE 686	Inventory Analysis	3
IE 688	Design of Experiments	3
IE 690	Seminar Project	3
EC 603	Microeconomic Analysis, *or*	3
EC 604	Macroeconomic Analysis	3
M 610	Fundamentals of Calculus and Linear Algebra	3
	Electives (IE, Math, or EE)	6
	Electives	9
	Total credits	**48**



Organizational/Industrial Psychology

Coordinator: Robert D. Dugan, Associate Professor of Psychology, Ph.D., Ohio State University

The master of arts in organizational/industrial psychology is designed as an interdisciplinary program leading to the development of expertise in the application of psychology for men and women involved in supervisory roles and for those planning such professional careers. The program emphasizes both the principles and procedures of psychology and the perspectives of other disciplines in preparing the student to meet organizational problems in their full complexity.

The program further strives to:

- familiarize the student with contemporary research and publications concerned with mutual relationships between organizational characteristics and the employee's behavior;
- provide the student with an improved understanding of psychological findings relating to personnel counseling, test administration and interpretation for selection, transfer, and promotion as well as management development;
- enhance the student's knowledge of current psychological information and skills relating to human-need satisfaction, executive training, organizational climate, problem solving and decision making, effective organizational change, and the study of organizationally induced stress;
- familiarize the student with current psychological theory and findings relating to attitude measurement, personnel policy evaluation and development and management development programs;
- meet the increasing needs of organizations for individuals with specialized research and human relations skills; and
- provide graduate study on a late afternoon and early evening basis for the full-time employee.

Admission Policy

Applicants are expected to possess social and interpersonal characteristics that will support success in organizational settings.

Students who give evidence of a mature interest in the application of psychological principles to organizational problems and who hold an undergraduate degree from an accredited college or university are eligible for admission.

Applicants are required to complete a questionnaire and submit it directly to the Graduate School and may be required to submit scores from either the Miller Analogies Test or the Graduate Record Examination Aptitude Test. An undergraduate major in psychology is not specifically required as a basis for consideration. However, all students are expected to have at least an introductory level understanding of psychological concepts, principles, and methods before taking courses in the master of arts in organizational/industrial psychology program.

M.A., Organizational/ Industrial Psychology

A total of 39 credit hours is required of candidates for the degree of master of arts in organizational/industrial psychology. Candidates for this degree are required to complete 18 credit hours of required courses in the core curriculum. Another 21 credit hours of electives are chosen after consultation with the program coordinator, or a representative, in light of the student's academic and professional goals. Students may not complete more than nine credit hours of electives until they have satisfied the core requirements. Up to nine credit hours of electives may be taken in other departments, such as industrial engineering, economics, management, marketing, public administration or criminal justice.

Transfer Credit

The transfer of credit from other institutions will be permitted subject to the Graduate School policy on transfer of credit detailed elsewhere in this catalog.

Thesis

Students electing to write a thesis must register for P 698 Thesis I, and P 699 Thesis II. The thesis must show ability to organize materials in a clear and original manner and present well-reasoned conclusions.

The thesis is written under the direction of the faculty member in charge of the thesis seminar or a faculty member with special competence in the subject matter of the thesis. The complete and final manuscript must be submitted to the thesis advisor prior to the end of the tenth week of the term in which the candidate expects to complete the requirements for the degree. Thesis preparation and submission must comply with the Graduate School policy on thesis/seminar project requirements detailed elsewhere in this catalog.

Program Options

In response to the different needs and levels of preparation of students in the program, the four following options are available:

Option 1 is recommended for an individual currently employed in a managerial or supervisory position. The practicum seminars will allow the student to investigate a specific job-related problem under expert faculty supervision.

Option 2 affords the student with limited work experience an opportunity to serve an industrial internship, providing the student the chance to observe organizational/industrial situations to be analyzed and discussed with a faculty supervisor.

Option 3 will provide the student planning to pursue doctoral studies with an essential tool—the ability to do empirical research and report writing through the preparation of a thesis.

Option 4 consists of elective courses selected under faculty advisement. The choice of electives is intended to provide the student with a broad interdisciplinary background, complementing the student's own academic training and interest.

Normally, the student should not begin work on any of the first three options until he/she has completed at least four core courses.

Required Courses

EC 625	Industrial Relations	3
P 609	Research Methods	3
P 619	Organizational Behavior	3
P 635	Assessment of Human Performance with Standardized Tests	3
P 640	Industrial Motivation and Morale	3
P 645	Seminar in Organizational/Industrial Psychology	3
	Elective options (see below)*	21
	Total credits	**39**

Elective Options

Option 1

P 678	Practicum I	3
P 679	Practicum II	3
	Electives*	15

Option 2

P 693	Organizational Internship I	3
P 694	Organizational Internship II	3
	Electives*	15

Option 3

P 698	Thesis I	3
P 699	Thesis II	3
	Electives*	15

Option 4

	Electives*	21

*The choice of electives is made in consultation with a departmental advisor in light of the student's academic and professional goals.

Public Administration

Coordinator: Kenneth Fox, Associate Professor of Public Administration, Ph.D., University of Pennsylvania

The general purpose of the master of public administration degree at the University of New Haven is the training of men and women at the graduate level for public service careers. Specifically, the program strives to:

- equip students with modern analytical and quantitative tools of decision making and their application to complex problems of government and non-profit organizations;
- expose students to the wide range of administrative and managerial problems and responsibilities in the public sector; and
- increase the student's knowledge and skills in the particular management functions of budgeting, planning, public policy formulation, public finance, public personnel administration, collective bargaining and research.

M.P.A.

Forty-five graduate credit hours are required of candidates for this degree. Of the 15 credit hours of electives in the M.P.A. program, six credit hours may be taken in graduate courses offered in other programs such as psychology, criminal justice, economics, and industrial engineering.

Required Courses

PA 601	Principles of Public Administration	3
PA 602	Public Policy Formulation and Implementation	3
PA 604	Communities and Social Change	3
PA 611	Research Methods in Public Administration	3
PA 620	Personnel Administration and Collective Bargaining in the Public Sector	3
PA 625	Administrative Behavior	3
PA 632	Public Finance and Budgeting	3
PA 690	Research Seminar	3
PA 693	Public Administration Internship	3
EC 608	Economics for Public Administrators	3
	Electives	15
	Total credits	**45**

Concentrations

Concentrations in the master of public administration program are designed to provide career-oriented structure for students with well-formed career interests. The concentration in health care management is the first concentration introduced into the program. The department expects to develop additional concentrations over the next several years.

Concentration in Health Care Management

Advisor: Jessica Wolf, Assistant Professor of Public Administration, Ph.D., Yale University

Students following the health care concentration will take the core curriculum of 10 courses and follow the health care concentration of five courses for their five elective courses.

MG 640	Management of Health Care Organizations	3
PA 641	Financial Management of Health Care Organizations	3
PA 643	Health and Institutional Planning	3
PS 635	Law and Public Health	3
	Plus one course chosen from among the following:	
PA 642	Health Care Delivery Systems	3
PA 644	Administration of Programs and Services for the Aged	3
PA 645	Health Care Economics and Finance	3
PA 670	Selected Topics	3
	Total credits	**15**

Taxation

Coordinator: Martin H. Zern, Associate Professor of Accounting, C.P.A., J.D., LL.M., New York University

The decision to pursue through the instrument of governmental policy a variety of economic and social goals has led to the development of a complex body of "tax law." Given the dynamic state of society's economic and social goals, the body of "tax law" characteristically exists in a continual state of change.

The complexity of the "tax law" is significant not only because of its impact upon accomplishing society's goals but also because of its influence upon the economic decision-making process. Tax consequences have been and will continue to be an important financial consideration.

Program Objectives

In recognition of the above, a need to prepare technically competent individuals for careers in the field of taxation has developed. Owing to the complex and dynamic nature of "tax law," it appears appropriate to conduct this preparation at an advanced level of inquiry with an emphasis upon examining the issues of current interest in taxation. Accordingly, the master of science program in taxation has been designed as a framework to accomplish the following structure of objectives:

- To prepare students for technical competence in understanding and interpreting tax law.
- To familiarize students with the administrative structure and procedures of the Internal Revenue Service.
- To inform students about approaches to independent research in the field of tax law.
- To offer an understanding of the role tax law plays in social and economic policy.

Given the above objectives, the master of science program in taxation provides a framework through which advanced and timely tax training can be acquired by experienced professionals (accountants and attorneys) practicing in the field of taxation, as well as individuals seeking to prepare themselves for entry into career positions in taxation.

Admission Policy

Admission to matriculation in the program is available to CPA's, attorneys, and persons holding an undergraduate degree from an accredited institution, preferably, but not exclusively, in accounting or in business administration with a major in accounting. Persons holding other than the above degrees will be required to take a number of selected undergraduate courses as a condition for admission. Admission is based primarily on an applicant's undergraduate record; however, the promise of academic success is the essential factor for admission. In support of their application, persons may submit their scores from the Graduate Management Admissions Test (GMAT). An applicant may be required to take this test.

M.S., Taxation

A minimum total of 36 credits is required for the master of science in taxation. The 36 credits will include 24 credits from required core courses and 12 credits from electives. The transfer of credit from other institutions will be permitted subject to the Graduate School policy on transfer credit detailed elsewhere in this catalog.

Required Courses

A 601	Federal Income Taxation I	3
A 602	Federal Income Taxation II	3
A 604	Corporate Income Taxation I	3
A 605	Corporate Income Taxation II	3
A 607	Tax Accounting	3
A 608	Estate and Gift Taxation	3
A 614	Federal Tax Practice and Procedure	3
A 615	Research Project in Federal Income Taxation	3
	Electives	12
	Total credits	**36**

Elective Courses

A 603	Federal Income Taxation III	3
A 606	Corporate Income Taxation III	3
A 609	State and Local Taxation	3
A 610	Consolidated Returns	3
A 611	Income Taxation of Estates and Trusts	3
A 612	International Taxation	3
A 613	Taxation of Partnerships and Partners	3

Senior Professional Certificates

This program is limited to those already holding an advanced degree who want additional graduate study in a coherent program, but do not want to work toward another advanced degree.

Since the senior professional certificate is not a degree, a student may transfer credits earned for a certificate into a master's program at any time, subject to the requirements of the master's degree and the decision of the coordinator of the master's program, and to acceptance in the master's program.

Students completing work in a certificate program do not attend commencement but will receive a certificate. A petition for certification must be filed with the graduate registrar and the appropriate fee paid. When the course work is reviewed and found complete, the certificate will be mailed to the student.

Requirements for the Certificate

The program consists of 15 or 18 credits, depending upon the area chosen. Students, having chosen their area of study, should contact the advisor who is listed for that particular area.

Programs of Study

Twelve different certificates are offered. Three certificate programs allow options to choose a particular speciality. The programs are the following:

Accounting and Taxation
- I: Financial Accounting
- II: Managerial Accounting
- III: Accounting Information Systems
- IV: Taxation of Individuals
- V: Taxation of Corporations
- VI: Finance

Applications of Psychology
Computer Applications and Information Systems
Economic Forecasting
Finance
General Management
Human Resources Management
International Business
Marketing
- I: Marketing
- II: Quantitative Techniques in Marketing

Media for Business
Public Management
- I: Survey of the Field
- II: Urban and Regional Planning and Management
- III: Public Personnel Management

Quantitative Analysis

Certificate in Accounting and Taxation

Advisor: Anne J. Rich, Associate Professor of Accounting, C.P.A., C.M.A., Ph.D., University of Massachusetts

Option I: Financial Accounting*

Any five from the following:

A 650	Advanced Accounting Theory	3
A 651	Financial Accounting Seminar	3
A 652	Advanced Auditing	3
A 653	Accounting for Not-for-Profit Organization	3
A 654	Financial Statements: Reporting and Analysis	3
A 656	International Accounting	3
	Total credits	**15**

Option II: Managerial Accounting*

Any five from the following:

A 621	Managerial Accounting	3
A 641	Accounting Information Systems	3
A 642	Operational Auditing	3
A 661	Managerial Accounting Seminar	3
FI 615	Finance	3
FI 645	Corporate Financial Theory	3
FI 651	Portfolio Management and Capital Market Analysis	3
	Total credits	**15**

*Other courses may be substituted by consent of the coordinator of the program.

Option III: Accounting Information Systems*

A 641	Accounting Information Systems	3
A 642	Operational Auditing	3
A 652	Advanced Auditing	3
	Plus any two accounting systems or computer science courses	6
	Total credits	**15**

Option IV: Taxation of Individuals*

A 601	Federal Income Taxation I	3
A 602	Federal Income Taxation II	3
A 603	Federal Income Taxation III	3
A 608	Estate and Gift Taxation	3
	Plus one taxation elective	3
	Total credits	**15**

Option V: Taxation of Corporations*

A 604	Corporate Income Taxation I	3
A 605	Corporate Income Taxation II	3
A 606	Corporate Income Taxation III	3
A 610	Consolidated Returns	3
	Plus one taxation elective	3
	Total credits	**15**

Option VI: Finance*

Choose any five from the following:

FI 615	Finance	3
FI 617	Financial Institutions and Capital Markets	3
FI 619	Monetary and Central Banking Policy	3
FI 620	Working Capital Management and Planning	3
FI 645	Corporate Financial Theory	3
FI 649	Security Analysis	3
FI 651	Portfolio Theory and Capital Market	3
	Total credits	**15**

*Other courses may be substituted by consent of the coordinator of the program.

Certificate in Applications of Psychology

Advisor: Thomas L. Mentzer, Acting Chairman, Professor of Psychology, Ph.D., Brown University

Students are expected to plan a sequence of courses with the faculty advisor at the start of the program. Five courses will be selected depending upon a student's interests, career objectives and academic preparation; courses are usually limited to the following:

P 610	Program Evaluation	3
P 621	Behavior Modification	3
P 623	Psychology of the Small Group	3
P 627	Attitude and Opinion Measurement	3
P 628	The Interview	3
P 629	Introduction to Counseling	3

P 630	Psychology of Personality	3
P 631	Social Psychology	3
P 632	Group Dynamics and Group Treatment	3
P 633	Problems of Drug Abuse	3
P 636	Abnormal Psychology	3
P 638	Psychology of Communication and Opinion Change	3
P 641	Personnel Development and Training	3
P 642	Organizational Change and Development	3
P 650	Ecological Psychology	3
	Total credits	**15**

Certificate in Computer Applications and Information Systems

Advisor: William S. Gere Jr., Professor of Industrial Engineering, Ph.D., Carnegie-Mellon University

IE 604	Management Systems	3
IE 605	Advanced Business Programming	3
IE 610	Computer Systems Selection	3
IE 614	Data Information Systems	3
IE 684	Multiprogramming Systems	3
	Total credits	**15**

Certificate in Economic Forecasting

Advisor: John J. Teluk, Professor of Economics, M.A., Free University, Munich

EC 604	Macroeconomic Analysis	3
EC 635	Comparative Economic Systems	3
EC 645	Seminar in Macroeconomic Policy	3
EC 653	Econometrics	3
QA 607	Forecasting	3
	Total credits	**15**

Certificate in General Management

Advisor: Ronald N. Wentworth Associate Professor of Management Science, Ph.D., Purdue University

Choose any six from the following:

MG 660	Comparative Management	3
MG 661	Development of Management Thought	3
MG 662	Organization Theory	3
MG 663	Leadership in Organizations	3
MG 664	Organizational Effectiveness	3
MG 669	Business Policy and Strategy	3
MG 675	Readings in Management	3
MG 680	Current Topics in Business Administration	3
	Total credits	**18**

Certificate in Human Resources Management

Advisor: Ronald N. Wentworth

The following four courses:

MG 645	Management of Human Resources	3
MG 665	Compensation Administration	3
MG 678	Personnel Management Seminar	3
MG 679	Industrial Relations Seminar	3

Plus any two from the following:

MG 690/PA 690-1	Research in Human Resources Management	3
MG 695-6/PA 695-6	Independent Study: Human Resources Management	3
P 627	Attitude and Opinion Measurement	3
P 628	The Interview	3
P 641	Personnel Development and Training	3
PA 620	Personnel Administration and Collective Bargaining in the Public Sector	3
EC 625	Industrial Relations	3
EC 627	Economics of Labor Relations	3
EC 687	Collective Bargaining	3
	Total credits	**18**

Certificate in International Business

Advisor: Arvin F. Rodrigues, Assistant Professor of Marketing, Ph.D., Columbia University

IB 643	International Business Operations	3

Plus any four from the following:

IB 644	Import and Export Business	3
IB 645	Structure of World Markets	3
IB 651	Comparative Marketing	3
IB 652	Multinational Business Operations	3
MG 660	Comparative Management	3
PS 603	International Law	3
	Total credits	**15**

Certificate in Marketing

Advisor: Arvin F. Rodriques

Option I: Marketing

MK 609	Marketing	3

Plus any four from the following:

IB 643	International Business Operations	3
IB 644	Import and Export Business	3
IB 651	Comparative Marketing	3
MK 616	Buyer Behavior	3
MK 639	Marketing Research and Information Systems	3
MK 641	Marketing Management	3
MK 643	Product Management	3
MK 644	Consumerism	3
MK 645	Distribution Strategy	3
MK 680	Marketing Workshop	3
	Total credits	**15**

Option II: Quantitative Techniques in Marketing

IE 603F	Introduction to Digital Computers: FORTRAN	3
QA 604	Probability & Statistics	3

Plus any three from the following:

IE 615	Transportation and Distribution	3
MK 639	Marketing Research and Information Systems	3
MK 641	Marketing Management	3
QA 607	Forecasting	3
	Total credits	**15**

Certificate in Media for Business

Advisor: Steven Raucher, Associate Professor of Communication, Ph.D., Wayne State University

CO 601	Basics of Business Media Production Techniques	3
CO 605	Planning Audio Visual Systems for Business	3
CO 609	Scripting the Media Presentation	3
CO 613	Media Presentations for Business	3
CO 621	The Communication Process	3
	Total credits	**15**

Note: CO 601 is a prerequisite to CO 613.

Certificate in Public Management

Advisor: Kenneth Fox, Associate Professor of Public Administration; Ph.D., University of Pennsylvania

Option: I: Survey of the Field

Choose any five from the following:

EC 665	Urban and Regional Economic Development	3
PS 608	The Legislative Process	3
PA 611	Research Methods in Public Administration	3
PA 620	Personnel Administration and Collective Bargaining in the Public Sector	3
PA 625	Administrative Behavior	3
PA 630	Governmental Accounting	3
PA 632	Public Finance and Budgeting	3
PA 660	Urban Planning: Theory and Practice	3
	Total credits	**15**

Option II: Urban and Regional Planning and Management

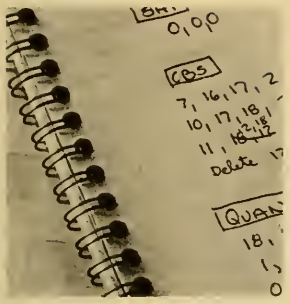
Choose any five from the following:

EC 665	Urban and Regional Economic Development	3
PA 630	Governmental Accounting	3
PA 634	Problems of Municipal Management	3
PA 660	Urban Planning: Theory and Practice	3
PA 661	Problems of Metropolitan Areas	3
PS 616	Urban Government and Politics	3
	Total credits	**15**

Option III: Public Personnel Management

EC 625	Industrial Relations	3
MG 645	Management of Human Resources	3
PA 620	Personnel Administration and Collective Bargaining in the Public Sector	3
PA 625	Administrative Behavior	3
	and one from the following:	
MG 665	Compensation Administration	3
P 627	Attitude and Opinion Measurement	3
P 635	Assessment of Human Performance with Standardized Tests	3
	Total credits	**15**

Certificate in Quantitative Analysis



Advisor: Ronald N. Wentworth

IE 604	Management Systems	3
QA 604	Probability and Statistics	3
QA 605	Advanced Statistics	3
QA 606	Advanced Management Science	3
QA 607	Forecasting	3
	Total credits	**15**

COURSE DESCRIPTIONS

Accounting (A) **76**
Civil and Environmental Engineering (CE) **78**
Chemistry (CH) **79**
Criminal Justice (CJ) **79**
Communication (CO) **82**
English (E) **82**
Economics (EC) **82**

Science (SC) **106**
Occupational Safety and Health Management (SH) **107**
Sociology (SO) **108**
Social Welfare (SW) **109**

COURSES

Unless otherwise indicated, all graduate courses carry three credit hours.

Department of Accounting

A 600 Accounting
The principles and procedures underlying the generation of financial accounting information. No credit.

A 601 Federal Income Taxation I
A study of tax policy and the basic principles of the federal income tax law taught at an advanced level of inquiry. Coverage entails the key concepts of gross income, adjusted gross income, deductions, exemptions, credits, and special tax computations, with special attention given to the provisions of the Internal Revenue Code affecting individual taxpayers.

A 602 Federal Income Taxation II
Prerequisite: A 601. A continuation of Federal Income Taxation I emphasizing the basic provisions concerning dispositions of property: analysis of basis, recognition of gain or loss, capital asset transactions and nonrecognition exchanges. Coverage extended to deferred payment sales and depreciation recapture.

A 603 Federal Income Taxation III
Prerequisite: A 602. An examination of the fundamentals of the federal taxation of deferred compensation. The course will focus on qualified and nonqualified retirement plans, individual and self-employed retirement plans and tax deferred annuities as developed by the Employment Retirement Income Security Act of 1974, and subsequent legislation. Deferred executive compensation arrangements, stock options, restricted property and various employee benefit plans will also be analyzed.

A 604 Corporate Income Taxation I
Prerequisite: A 602. A foundation course analyzing the basic federal income tax provisions affecting corporations and shareholders. Course coverage includes organization of the corporation, corporate capital structure, corporate distributions, stock redemptions, bail-out techniques and liquidations.

A 605 Corporate Income Taxation II
Prerequisite: A 604. A detailed analysis of the federal income tax rules covering corporate reorganizations and divisions. Also discussed are some of the nontax aspects of corporate reorganizations such as S.E.C., anti-trust, and business reasons for choice of particular method.

A 606 Corporate Income Taxation III
Prerequisite: A 605. Advanced study in the corporate tax area including subchapter S corporations, collapsible corporations, accumulated earnings tax, affiliated corporations and carryover of corporate tax attributes.

A 607 Tax Accounting
Prerequisite: A 601. Investigation of such areas as: problems of allocating income and deductions to the proper tax year, permissible tax accounting methods, depreciation, inventory methods, individual net operating losses, change in accounting method and comparison of business and tax accounting principles.

A 608 Estate and Gift Taxation
A comprehensive introduction to, and analysis of, the federal estate and gift tax laws including basic principles of estate planning. Procedures for preparation of the estate and gift tax returns are treated. Coverage is also given to state death and inheritance taxes.

A 609 State and Local Taxation
The tax problems encountered at the state and local level by businesses engaged in interstate commerce. Federal limitations on the taxation of multistate enterprises and jurisdictional problems are examined. Specific areas covered are: license to do business, net income, franchise, gross receipts, property, and sales and use taxes. Apportionment problems are examined in detail.

A 610 Consolidated Returns
Prerequisite: A 604. A thorough analysis of the federal consolidated tax return provisions including eligibility and whether to file a consolidated return; intercompany transactions and deferral concepts; basis in the disposition of stock of a subsidiary; computation of earnings and profits; and mechanics of preparing the consolidated return.

A 611 Income Taxation of Estates and Trusts

Prerequisite: A 602. Federal income taxation of estates, trusts, grantors, and beneficiaries. Topics are simple and complex trusts, throwback rules, taxable and distributable net income, assignment of income concepts and income in respect of a decedent, preparation of the estate and trust returns.

A 612 International Taxation

Prerequisite: A 604. Consideration of the federal income tax treatment of nonresident aliens and foreign corporations and the foreign income of U.S. residents and domestic corporations; comparison of alternative methods of engaging in operations abroad; foreign tax credit; allocations under code Section 482; Section 367 rulings; and the effect of tax treaties.

A 613 Taxation of Partnerships and Partners

Prerequisite: A 602. A study of the federal income tax problems encountered in the formation and operation of a partnership, including computations of taxable income, sale of a partnership interest, withdrawal of a partner, death or retirement of a partner, distribution of partnership assets, and basis adjustments.

A 614 Federal Tax Practice and Procedure

Prerequisite: A 601. A study of the history and organization of the Internal Revenue Service, the selection of returns for audit and the review steps at the administrative level. Code provisions covered will include: filing requirements, statutory notices, restriction on assessment, statute of limitations, refund procedures, waivers, closing agreements, protests and rulings.

A 615 Research Project in Federal Income Taxation

Prerequisite: 15 graduate hours in taxation. This course is devoted to a study of the techniques and tools of tax research. Reference sources include tax looseleaf services, I.R.S. cumulative bulletins, court cases, congressional committee reports, textbooks, published articles. A significant research paper devoted to a subject of topical interest is required.

A 621 Managerial Accounting

Prerequisite: A 600 or 6 credits in financial accounting. Accounting analysis for the managerial functions of planning, controlling and evaluating the performance of the business firm.

A 641 Accounting Information Systems

Prerequisite: A 621. An examination of the function and limitations of internal accounting information systems and their relationship to other decision-oriented business information systems.

A 642 Operational Auditing

Prerequisite: A 621. An analysis of the principles underlying and the procedures applying the function of auditing the results of firm-related business decisions.

A 650 Advanced Accounting Theory

Prerequisite: 6 hrs. of intermediate accounting. Considers the theoretical aspects of accepted accounting principles and their significance as a frame of reference for the evaluation of accounting practices. Considerable attention is focused on the role of regulatory agencies and professional accounting organizations with regard to their influences upon accounting theory and practice.

A 651 Financial Accounting Seminar

Prerequisite: A 650. An examination and evaluation of current literature in external accounting issues and related fields.

A 652 Advanced Auditing

Prerequisite: 3 hours of auditing. An analysis of the contemporary problems surrounding the attest function performed by the professional independent auditor. EDP auditing is examined in depth.

A 653 Accounting for the Not-for-Profit Organization

Prerequisite: 6 hrs. of intermediate accounting. An intensive examination of the contemporary views toward financial reporting for the not-for-profit organizations.

A 654 Financial Statements: Reporting and Analysis

Prerequisite: Fl 651. An examination of financial reporting practices for financial statement analyses in view of modern theoretical and empirical financial decision-making research.

A 656 International Accounting

Prerequisite: 6 hrs. of intermediate accounting. An analysis of the literature related to the current and growing interest in the development of accounting standards for business enterprises throughout the world.

A 661 Managerial Accounting Seminar

Prerequisite: A 621. An examination and evaluation of current literature in internal accounting issues and related fields.

A 670 Selected Topics

A study of selected issues of particular interest to the students and instructor. May be taken more than once.

COURSES

A 690 Research Project
Prerequisite: 15 graduate hours or permission of the instructor. Independent study under the supervision of an advisor.

A 695 Independent Study I
A planned program of individual study under the supervision of a member of the faculty.

A 696 Independent Study II
A continuation of Independent Study I.

A 698 Thesis I
Prerequisite: 15 graduate hours. Periodic meetings and discussions of the individual student's progress in the preparation of a thesis.

A 699 Thesis II
A continuation of Thesis I.

Department of Civil and Environmental Engineering

CE 601 Water Treatment
Advanced design principles and practices in water treatment processes; study of unit processes and operations; water treatment plant design; methods of population projection; water distribution systems.

CE 602 Wastewater Treatment
Advanced design principles and practices in sewage treatment processes; study of unit processes and operations; secondary sewage treatment plant design; sludge handling and disposal; sewage collection systems; introduction to advanced treatment methods.

CE 605 Solid Waste Management
Characteristics, volumes, collection and disposal of solid waste and refuse. Design of processing, recycling, and recovery equipment, landfill design and operation, resource recovery, incineration.

CE 606 Environmental Law and Legislation
Review and techniques of enforcement of state and federal pollution control laws and regulations; effects on waste treatment criteria and design and evaluation of municipal ordinances; preparation of environmental assessments and impact statements.

CE 612 Advanced Wastewater Treatment
Prerequisite: CH 601, which may be taken concurrently. Theories and principles of advanced sewage treatment including nutrient removal, demineralization; distillation, ozonation, carbon filtration, ion exchange, nitrification; design of facilities; upgrading secondary plants.

CE 613 Industrial Wastewater Control
Prerequisite: CH 601. Characteristics of industrial wastes, volumes, sources, types; methods of volume reduction, waste segregation, recovery, recycle, and waste treatment.

CE 616 Ground Water Waste Disposal
Study of effects of disposal of wastewaters in ground waters; travel of pollutants through soil; removal of nutrients and pollutants by soil interactions; leachate identification and control from refuse disposal areas.

CE 670 Special Topics-Civil Engineering
A study of related topics of particular interest to students and instructor. Course may be taken more than once.

CE 690 Research Project
Prerequisite: 18 graduate hours or permission of chairman of the Department of Civil Engineering and advisor. Independent study under the guidance of an advisor into an area of mutual interest, each study terminating in a technical report of academic merit. Research may be in such environmental areas as water resources, stream pollution, solid waste management or air pollution.

CE 695 Independent Study in Environmental Engineering I
Prerequisite: permission of program coordinator. Independent study under the guidance of an advisor into an area designated by the program coordinator.

CE 696 Independent Study II
A continuation of Independent Study I.

CE 698 Thesis I
Prerequisite: 15 graduate hours. Periodic meetings and discussions of the individual student's progress in the preparation of a thesis.

CE 699 Thesis II
A continuation of Thesis I.

Department of Chemistry

CH 601 Environmental Chemistry
Advanced study of the chemical reactions necessary to understand the impact that man's activities have on the environment. Areas considered include water and air pollution, power generation, and the release and use of industrial organic chemicals.

CH 611 Special Topics in Advanced Organic Chemistry
Advanced course dealing with topics such as stereochemistry, photochemistry, natural products and mechanisms of organic reactions.

CH 621 Chemical Forensic Analysis with Laboratory
A course intended to present advanced techniques and new developments in the identification of various materials such as pigments, dyestuffs, food additives, pharmaceutical preparations, polymers, synthetic fibers, and inorganic material products. Laboratory fee required. 4 credit hours.

CH 631 Advances In Analytical Chemistry
A course intended to provide background for the recent advances made in instrumentation and current analytical techniques.

CH 670 Selected Topics
A study of selected issues of particular interest to the students and instructor. May be taken more than once.

CH 695 Independent Study I
A planned program of individual study under the supervision of a member of the faculty.

CH 696 Independent Study II
A continuation of Independent Study I.

CH 698 Thesis I
Prerequisite: Completion of 15 credits of graduate work. Periodic meetings and discussion of the individual student's progress in the preparation of a thesis.

CH 699 Thesis II
A continuation of Thesis I.

Division of Criminal Justice

CJ 601 Seminar in Interpersonal Relations
Interpersonal communication in teaching, supervision and in various work relationships. The criminal justice worker as a resource person and facilitator of others is stressed. Humanistic psychology and interpersonal psychology provide the theoretical base.

CJ 602 Seminar in Social Control
An examination of the formal and informal mechanism of controlling or conditioning the social behavior of man vis-a-vis the system of social norms, laws and institutions. The implication of organizing the system of justice under a punishment or rehabilitative ethic will be considered.

CJ 604 Seminar in Theory and Philosophy of Law
The theory and philosophy of law and the relationship between law and society. Emphasis on the nature of the judicial process, the issues of law and personal morality, nonvictim crimes, and the relationship of enforcement agencies to the rules of law.

CJ 605 Social Deviance
A survey of theories relating to the scope and nature of the crime problem. Consideration of the problems of deviancy, including social norms deviancy, mental disturbances, juvenile crime, and the various possible and actual responses to deviancy. Various approaches to the problem of rehabilitation.

CJ 607 Seminar in Criminal Justice Institutions
The machinery of justice in theory and practice. The rule of law and its exceptions in the actual administration of justice. Emphasis on the progressive changes in the development of children's and adolescents' courts, probation and classification clinics. Crime prevention and reforms of the criminal law. Special problems of justice and the poor. Administrative denials of justice, the insane offender, the white-collar criminal and social reconstruction through law.

CJ 608 Law and Evidence
Comprehensive analysis of the rules of evidence. Topics include judicial notice, presumptions, the nature of real and circumstantial evidence, hearsay evidence, confessions and admissions and witnesses. Emphasis on evidence in criminal cases.

CJ 609 Criminological Theory
An analytical review of the multidisciplinary theories of criminal behavior. The impact of various theoretical constructs and concepts on practice will be critically evaluated.

COURSES

CJ 610 Administration of Justice
A study of all the steps of the criminal justice system from the time the accused is arrested until sentencing to a correctional facility with an objective to review all the problems which arise during this process and to consider some possible solutions which will benefit the individual being processed without subverting the purposes of the process.

CJ 612 Criminal Justice Management
The development of the theory and practice of criminal justice management in the United States. Significant developments and ideas of those who have made major contributions to American criminal justice management.

CJ 615 Forensic Science in the Administration of Justice
The role of natural science in the administration of justice in its broadest aspects. Current concepts, present status and future needs of the forensic sciences. Specific topics in the forensic sciences and their interrelationships with legal issues will also be included.

CJ 618 Probation and Parole: Theory and Practice
The philosophy, theory and methods employed in probation, parole and institutional treatment of the offender. The role of authority, casework, classification, treatment policy and administrative organization in determining the consequences of correctional practice.

CJ 619 Seminar in Comparative Criminal Justice Systems
Prerequisite: CJ 610. A cross-cultural study of police, court and correctional systems and methods.

CJ 622 Learning Theory: Applications in Criminal Justice
Applications of the psychology of learning to police and correction settings.

CJ 624 Group Process in Criminal Justice
Small group interaction; both theoretical and experimental facets of group process are presented. Group counseling and encounter groups.

CJ 628 Introduction to Systems Theory
Concepts of systems theory and systems analysis in contemporary socio-technical environments.

CJ 630 Delinquency and Juvenile Crime
Prerequisite: CJ 610. A general introduction to the field of delinquency and crime, including all aspects of the social, legal and personal matrix out of which these forms of behavior emerge. Special emphasis will be given to the process and implications of delinquency labeling.

CJ 635 Statistics in the Public Sector
Statistical techniques applied to the public sector. Descriptive statistics: measures of central tendency and variability. Introduction to statistical inference including sampling distributions and tests of significance. Some techniques of nonparametric statistics, multiple regression and elementary decision theory. Analysis of variance and covariance.

CJ 637 Contemporary Issues in Criminal Justice
Topics selected by students relating to current issues and concerns in the field of criminal justice. Each student will be required to write a paper and deliver an oral presentation on a selected topic.

CJ 642 Research Techniques in the Social Sciences
Research methodology as applied to problems and issues in the field of criminal justice.

CJ 644 Police in Urban Society
An introduction to some of the current thinking and problems of policing in urban society. The course will examine such issues as the historical growth of the police, the role and mission of the police, measurement of the police tasks, police corruption and other topics of interest to the seminar members. The course will stress the development of analytic thinking in defining and dealing with police problems.

CJ 647 Advanced Criminalistics I
The comparison and individualization of physical evidence by biological and chemical properties is presented in lectures and carried out in the laboratory. The theories and practice of microscopic, biological, immunological and chemical analysis are applied to the examination of blood, saliva, semenal fluid, hair, tissues, botanical evidence and other material of forensic interest. Laboratory fee required. 4 credit hours.

CJ 648 Advanced Criminalistics II
Advanced microscopic, chemical and instrumental methods will be introduced with extensive "hands-on" experience provided by a laboratory section. Principles and methods of analysis of microscopic and macroscopic evidence such as glass, soil, papers, inks, dyes, paints, varnishes, explosives, fibers, drugs and other potential physical traces will be discussed in class. Laboratory fee required. 4 credit hours.

CJ 651 Problems in the Administration of Justice
A study of the interaction between the law enforcement official and the accused beginning with detention and/or arrest, during which time the official is seeking to secure incriminating evidence effectively while still protecting the Fourth, Fifth and Sixth Amendment constitutional rights of the "presumed innocent" accused.

CJ 655 Bureaucratic Organization of Criminal Justice
Prerequisite: CJ 610. Through an application of modern organizational theory, a critical analysis of criminal justice agencies will be made. Emphasis will be placed on viewing criminal justice in theoretical perspective. Linkages between theory and operationalization of principles will be made.

CJ 657 Physical Analysis in Forensic Science
The classic firearms examination, classification and comparison of bullets and cartridges, toolmarks comparison and striation analysis, serial number restoration, document examination, voice print identification, fingerprints and polygraphy examination. Laboratory fee required. 4 credit hours.

CJ 658 Psychiatry and the Law
An examination of issues that relate to the interaction between the law and mental illness and the general role of forensic psychiatry.

CJ 659 Biomedical Methods in Forensic Science
Methods and application of modern toxicology, biochemistry, pathology, dentistry and medicine in forensic science. Laboratory fee required. 4 credit hours.

CJ 660 Forensic Microscopy
Basic techniques of optical microscopy and the development of operational skills for the use of the microscope as a tool of evidence detection and evaluation. Microscopical measurements and analytical methods will be covered. Laboratory fee required. 4 credit hours.

CJ 661 Medicolegal Investigation and Identification
An introduction to procedures and techniques for medicolegal investigation of questioned death, and identification of deceased persons, including autopsy technique, odontological procedures and anthropological approaches.

CJ 662 Forensic Toxicology
An in-depth analysis of forensic toxi procedures and methods, determination of metallic, volatile and soluble poisons, analysis for narcotic drugs, other drugs of abuse, and dosage form or from drugs that are commonly abused. Laboratory fee required. 4 credit hours.

CJ 663 Advanced Forensic Serology
Prerequisite: CJ 647. A detailed study of quantitative procedures for the biochemical identification of body fluid traces; advanced blood grouping procedures in Rh and other blood groups other than ABO; detailed discussion of and procedures for isoenzyme and serum protein polymorphism phenotyping in stain samples. Laboratory fee required. 4 credit hours.

CJ 670 Selected Issues
A study of selected issues of particular interest to the students and instructor. May be taken more than once.

CJ 672 Innovative Treatment Programs in Corrections
The theory and practice of a wide range of innovative correctional treatment modalities will be analyzed. Students will be given the opportunity to participate in various experiential exercises and to develop and propose new treatment approaches.

CJ 690 Research Project I
Individual guidance on a research endeavor. 1-3 credits.

CJ 691 Research Project II
Prerequisite: CJ 690. 1-3 credits.

CJ 693 Criminal Justice Internship I
The student's formal educational development will be complemented by field placement experience in various criminal justice settings or agencies. Field experience will be supervised by designated agency and departmental personnel.

CJ 694 Criminal Justice Internship II
Prerequisite: CJ 693.

CJ 695 Independent Study
Student will engage in a directed independent learning experience, the topic and format to be agreed upon by the student and supervising faculty. 1-3 credits.

CJ 697 Thesis I
Prerequisite: 15 graduate hours. Periodic meetings and discussions of the individual student's progress toward the completion of the thesis.

CJ 698 Thesis II
Prerequisite: CJ 697. A continuation of Thesis I.

CJ 699 Thesis III
A continuation of Thesis II.

COURSES

Department of Communication

CO 601 Basics of Business Media Production Techniques
This course will provide a survey of the implementation of various media in the production of instructional and promotional materials specifically for the small and medium business and corporate media departments. The course will emphasize both theoretical and practical problems of audio and visual systems available to the business situation, paying particular attention to the vocabulary and skills which make it possible to transfer an idea from the board room to an effective media presentation. Laboratory fee required.

CO 605 Planning Audio Visual Systems for Business
Prerequisite: CO 601. This course will use the technology learned in the basic course, and apply this to the planning of an audiovisual center within a business or corporation setting. Students will be involved in projects of design and budget.

CO 609 Scripting the Media Presentation
This course is designed to show the student how to select the medium appropriate to the message, write a treatment, develop a story board, script the message and use proper format.

CO 613 Media Presentations for Business
Prerequisite: CO 601, CO 609. This course is designed to provide the student with an opportunity to produce a major instructional or promotional media project for a specific business or corporation. The student will be responsible for finding a sponsor for this project which will be produced in one or any of the audio/visual formats discussed and practiced in prerequisite courses. Laboratory fee required.

CO 621 The Communication Process
Major emphasis on the role of communication in a democracy and the effects of communication content. Brief treatment of content analysis techniques, person-to-person communication and barriers to the flow of communication.

CO 670 Selected Topics
Prerequisite: permission of the advisor. An in-depth examination of a topic in the field of communication which reflects the special research of a faculty member, or the special interest of a group of students. May be taken more than once.

CO 693 Internship
A program of field experience set up by the student and approved by the program advisor under the tutelage of a professional in the field.

CO 695 Independent Study I
A planned program of individual study or research in communication under the supervision of a member of the faculty.

CO 696 Independent Study II
A continuation of Independent Study I.

CO 698 Thesis I
Prerequisite: 15 graduate hours. Periodic meetings with the advisor of the individual student's progress in the preparation of a thesis.

CO 699 Thesis II
A continuation of Thesis I.

Department of English

E 600 The Uses of Language
Limited to qualified international students who speak a language other than English. Emphasis upon conversation, pronunciation, composition and laboratory work in the English language. No credit.

Department of Economics

EC 600 Basic Economics
A basic theoretical foundation for students who have a deficiency in economics. The course is a review and refresher of basic economic principles. No credit.

EC 603 Microeconomic Analysis
Prerequisite: undergraduate Principles of Economics or EC 600, Basic Economics. Topics in resource allocation and price determination. Theories of choice of consumers, firms, resource owners under monopoly, monopsony, competition and alternative market forms.

EC 604 Macroeconomic Analysis
Prerequisite: undergraduate Principles of Economics or EC 600, Basic Economics. An examination of the roles of consumption, investment, government finance and money influencing national income and output, employment, the price level and rate of growth. Policies for economic stability and growth.

EC 608 Economics for Public Administrators
An examination of the roles of consumption, investment, government expenditure and money influencing national income, output, employment and price level, and growth rate. Special emphasis upon the roles of fiscal and monetary policy and the economics of contemporary social problems.

EC 625 Industrial Relations
A survey of the problems, strategies and policies of management and unions in conflict situations and in harmonizing labor-management relations. Labor legislation, collective bargaining and alternative strategies, productivity and other problem areas in labor-management relations are examined.

EC 627 Economics of Labor Relations
A survey of labor economics and the economics of labor relations using both the tools of economic analysis and institutional analysis. The emphasis is on the application of economics to labor problems and labor-management relations.

EC 629 Public Policies Toward Business
A survey of the economic aspects of governmental and business relations. Emphasizes the concept of public control over certain types of business and certain forms of business activity. Combination movements, pricing procedures, anti-trust laws and agencies enforcing them, regulation of transportation and public utilities, rate-making for transport, pricing public utility services, consumer protection and social responsibility.

EC 630 Structure of American Industry
An examination of several major U.S. industries such as automobiles, steel, petroleum, defense and agriculture. Some contemporary problems are analyzed. A study of the powerful economic forces acting on these industries and how firms react to these forces.

EC 635 Comparative Economic Systems
Prerequisite: EC 603-604. Capitalism, Socialism, Communism and other economic systems will be examined with respect to their theoretical foundations and practical applications, including the interrelationships among economic, political and social institutions.

EC 641 International Economics
Prerequisite: EC 603-604. A study of the basic theory and major institutions of international economic relations. Examines critically the techniques and background of protectionism and free trade, and the analysis of customs, unions and price and exchange rate changes. The theory of comparative advantage; the gains from trade and the terms of trade. The balance of payments and national income. Capital movements and economic growth. The evolution of the world economy and international economic institutions. Effects of growth on trade, and trade on growth. Monopolistic practices in international trade. The international monetary system and international monetary reforms.

EC 645 Seminar in Macroeconomic Policy
Prerequisite: EC 603-604. The impact of fiscal and monetary policy upon employment, output and prices. An analysis of past and current economic controls and their impact upon the economy.

EC 650 Economics of Petroleum
Prerequisite: undergraduate Principles of Economics. A survey of the economic development and growth of the American oil industry as part of the international oil industry. Economic aspects of the energy crisis, oil reserves, conservation, OPEC, U.S. energy conservation program, oil pricing, and oil substitutes. Policies of oil exporting nations, oil companies and oil consumer nations throughout the world will be given special attention.

COURSES

EC 653 Econometrics
Prerequisites: EC 603-604, QA 604-605, or permission of the instructor. A presentation of the important statistical concepts used in econometrics. Topics covered are regression theory, multiple regression, regression extensions, correlation, serial correlation, correlated regressor and error, the identification problem, selected estimating techniques.

EC 658 Transportation Economics
Prerequisite: EC 603-604. A study of the principal economic problems arising in connection with the development and regulation of railroads and other modes of transport.

EC 665 Urban and Regional Economic Development
Prerequisite: EC 603-604. Structure of the urban and regional economy; goals, processes, problems and policy in urban and regional economic development.

EC 668 Economics of Crime
Prerequisite: EC 603-604. Topics include the economic costs of crime; the costs of preventing crime; the impact of white collar crime on American society.

EC 670 Selected Topics
A study of selected issues of particular interest to the students and instructor. May be taken more than once.

EC 687 Collective Bargaining
Prerequisite: EC 625. Emphasis on the negotiating process. The labor contract as it involves wages, worker security, management authority and handling of grievances arising during the life of the contract.

EC 690 Research Project
Prerequisite: 15 graduate hours or permission of the instructor. Independent study under the supervision of an advisor.

EC 692 Readings in Economics

EC 695 Independent Study I
A planned program of individual study under the supervision of a member of the faculty.

EC 696 Independent Study II
A continuation of Independent Study I.

EC 698 Thesis I
Prerequisite: 15 graduate hours. Periodic meetings and discussions of the individual student's progress in the preparation of a thesis.

EC 699 Thesis II
A continuation of Thesis I.

Department of Electrical Engineering

EE 603 Discrete and Continuous Systems I
Prerequisite: M 624. Discrete and continuous linear system models. State variable representation and transfer function representation. Feedback control systems, stability, performance and design criteria. State variable and compensation synthesis. Nonlinear systems, describing functions and phase plane techniques. Stability methods of Liapunov.

EE 604 Discrete and Continuous Systems II
Prerequisite: EE 603.

EE 605 Modern Control Systems
Prerequisite: EE 604. Advanced topics in control systems. May include optimal control, dynamic programming, variational approaches, adaptive control, sampled data systems, signal modulated systems, random signal methods.

EE 608 Computer-Aided Design
Prerequisite: M 624. Numerical algorithms for engineering systems analysis. The design problem and performance measures. Optimization of networks and filters. Parameter sensitivities. Device modeling and equivalent circuits.

EE 615 Introduction to Computer Logic
Prerequisite: IE 603 (or equivalent). Introduction to logic elements and to their application in digital networks for processing numerical data. The course deals with analysis and design techniques of combinational and sequential networks and includes a discussion of logic variables, switching functions, optimal realizations, multivariable systems. Design examples will include logic circuits for addition, multiplication, counting, parity generation and detection.

EE 630 Electronic Instrumentation I
Prerequisite: permission of instructor. Design of modern electronic instrumentation. Circuit and system examples, evaluation and design techniques. Emphasis on practical applications including design theory and the circuit techniques used in linear integrated devices. Variety of electronic instrumentation including computer interfaces, signal conditioners, waveform generators and shapers, filters, V/F, A/D, D/A converters and other special purpose circuits.

EE 631 Electronic Instrumentation II
Prerequisite: EE 630.

EE 634 Digital Signal Processing I
Prerequisite: EE 603. A study of the theories of digital signal processing and their applications. Topics include discrete time signals, Z transform, the discrete Fourier Transform, the FFT, digital filter design techniques, homomorphic signal processing and various applications of digital signal processing.

EE 635 Digital Signal Processing II
Prerequisite: EE 634.

EE 640 Computer Engineering I
A study of computer structure and organization. Peripheral devices, addressing memory, assembler instruction set, programmed requests, real-time software modules, assembler language programming.

EE 641 Computer Engineering II
Prerequisite: EE 640. Applications of computers to physical systems for monitor control functions. Interfacing using hardware modules. Case studies may include synchronous motor transient studies, shock wave phenomena, dynamic chemical reaction monitoring and control, signal processing, sampled data control systems. Students must complete a project.

EE 645 Power Systems Engineering I
Prerequisite: permission of instructor. Concepts and methods of analysis and design of modern power systems will be treated. This will include the network representation of power systems, matrix methods, symmetrical components and the use of the computer in the solution of problems such as short circuit fault calculations, load flow study, economic load dispatching and stability. Other topics may include protection, relaying or transmission system design.

EE 646 Power Systems Engineering II
Prerequisite: EE 645.

EE 650 Random Signal Analysis
A study of the theory of random signals and processes. Topics include a review of probability, random signals, auto and cross correlation, power density, spectral analysis of random signals.

EE 658 Microprocessors — Theory & Applications
Prerequisite: EE 640. A study of the techniques and methods of designing digital systems using a microprocessor as the basic unit. Microcomputer assembly language, operating systems, input/output devices, programmable read-only memories and interfacing.

EE 670 Special Topics — Electrical Engineering
Prerequisite: permission of instructor. A study of selected topics of particular interest to students and instructor. Course may be taken more than once.

EE 695 Independent Study I
Prerequisite: permission of instructor. A planned program of individual study or research under the supervision of a faculty member.

EE 696 Independent Study II
A continuation of Independent Study I.

EE 698 Thesis I
Prerequisite: completion of 15 credits of graduate work. Individual student project under supervision of faculty advisor. Written and oral report required. Student must enroll in 6 credits of thesis.

EE 699 Thesis II
A continuation of Thesis I.

Executive M.B.A. Program

The program consists of twenty (20) courses, each four sessions in length. The courses are grouped into logically interrelated clusters, i.e., The Quantitative Group, The Industrial Relations Group, The Finance Group, The Marketing Group, and the Management Group.

EXID 903 The Communication Process
Communication needs in corporate staff development, cohesion, cooperation, and consensus through effective communication management. The role of communication in thought processes and problem solving.

COURSES

Quantitative Group

EXID 936 Statistics and Forecasting
Examination of the utility and method of traditional statistical techniques as aids in the decision making process. Topics include descriptive and inferential statistics, regression, time series and an introduction to forecasting.

EXID 915 Quantitative Decision Making
Examination of statistical methods and their relevance to decision making under uncertainty. Includes an introduction to probability, elements of statistical decision theory and Bayesian analysis.

EXID 918 Managerial Economics
Application of economic analysis to business forecasting planning and policy formation. Topics include cost-benefit analysis, cost estimation and break-even analysis.

EXID 939 Operations Research and Management
Analysis of management science techniques from the executive perspective. Focus on understanding the value of inventory and systems models, forecasting methods and simulation techniques.

EXID 960 Computers and Management
Analysis of the uses and abuses of management information systems as well as hardware and software acquisition.

Industrial Relations Group

EXID 909 Business and Government Relations
Recent developments and future directions of the business and government interface. Includes contracts, affirmative action, labor negotiation machinery, regulatory agencies and anti-trust legislation.

EXID 948 Labor and Management Relations
Contemporary issues in labor-management relations are analyzed including collective bargaining, grievance-arbitration procedures and the expanding impact of organized labor on manpower management.

EXID 945 Human Resources Management
The effective management of the aggregate human resource in the modern organization. Analysis of personnel policies and procedures, manpower planning and employee training and policies.

Finance Group

EXID 924 Financial Management I
Analysis of financial decision models for investment, financing and dividend decisions of the profit-oriented firm. Includes capital budgeting, capital structure and the cost of capital and dividend policy.

EXID 927 Financial Management II
Analysis of financial decision models for the management of working capital. The management of current assets and the related financing mixture.

EXID 912 Financial Accounting
Analysis of the objectives, standards and methods embodied in the financial accounting information system. Emphasis is upon financial reporting standards as they relate to financial position, results of operations and changes in financial position.

EXID 942 Managerial Accounting
Examination of accounting tools for planning, controlling and evaluating the economic performance of the firm. Topics include budgeting, flexible budgets, standard costs, contribution reporting, responsibility accounting and decision analysis.

Marketing Group

EXID 930 Marketing Management
The marketing concept and corporate decision making with respect to product planning, advertising and promotion, sales management, distribution channels and price policies.

EXID 933 International Business
Examination of the theory of international trade, exporting and importing, cultural dynamics and comparative management and marketing systems.

EXID 951 Marketing Management Seminar
Current issues and topics in marketing management. Includes recent regulatory rulings, consumerism and related areas.

Management Group

EXID 906 The Management Process

The role of executives and managers in administrative and operational processes. Topics include organizational goals and structure, planning and performance controls and resource management.

EXID 954 Organizational Development

Various methods for effective organizational development in contemporary environments. Analysis of means to improve existing organizations in consideration of past history and changing value structures.

EXID 957 Corporate Policy and Strategy

Analytical frameworks are developed through the study of major corporate policies and strategies. Focus is upon the total organization and comprehensive operation procedures of the complex corporation.

EXID 921 Executive Development Seminar

Examination of a variety of methods of executive development. Role-playing, business games, sensitivity training and transactional analysis.

Finance

Department of Accounting

FI 615 Finance

Prerequisites: EC 603-604, QA 604, A 600 or equivalent. The investment, financing and valuation of business firms. Topics include: discounted cash flow, return on investment, investment decisions under uncertainty, long- and short-term sources of funds, optimal financial structure, cost of capital, dividend policy. (Expansion, merger, working capital management and failure and reorganization may also be covered.)

FI 617 Financial Institutions and Capital Markets

Prerequisites: FI 651, FI 615. This course stresses the financial management of financial institutions and capital market. Analyzes the institutional and theoretical structure of monetary change and the manner in which financial institutions and markets transmit and influence the impact of monetary policy. Special attention to the role of non-monetary financial intermediaries, the structure and regulation of capital markets, and the functions of market yields as the price mechanism that allocates saving to various categories of economic investments.

FI 619 Monetary and Central Banking Policy

Prerequisite: FI 615. The impact of monetary change upon employment, output and prices; the formulation and execution of Federal Reserve policy designed to regulate money, credit and interest rates.

FI 620 Working Capital Management and Planning

Prerequisite: FI 615. The examination and understanding of working capital management, leasing, mergers, and acquisitions and overview of multinational finance.

FI 645 Corporate Financial Theory

Prerequisite: FI 617. An analysis of the theoretical structure supporting optimum financial decision making by the business firm. Emphasis is placed upon the determination of the combination of investment, financing and dividend decisions that maximizes the valuation of the firm within a security market context.

FI 649 Security Analysis

Prerequisite: FI 651. An analysis of the determinants of valuation for fixed income securities, common stocks, convertible securities and common stock warrants. Emphasis is placed upon the information and techniques relevant to security valuation and selection and the structure and workings of the securities markets.

FI 651 Portfolio Management and Capital Market Analysis

Prerequisites: FI 615, QA 605 or permission of instructor. Considers the theoretical structure for the procedures (security analysis, portfolio analysis and portfolio selection) which constitute the process of portfolio management, as well as their limitations in practice. Additional attention is placed upon the logical implications of portfolio analysis for capital market theory.

COURSES

FI 655 Commodity Market Analysis
Prerequisite: FI 617. A conceptual and operational examination of the markets in which commodities are traded, the participants and major exchanges including an analysis of the major commodities traded and the factors influencing their prices.

FI 661 Real Estate: Principles and Practices
Prerequisite: FI 615. Real estate from the investor's point of view. Impact of taxation on real estate investments. Emphasis on commercial land use through the use of case studies and problems.

FI 670 Selected Topics
A study of selected issues of particular interest to the students and instructor. May be taken more than once.

FI 690 Research Project
Prerequisite: 15 graduate hours or permission of the instructor. Independent study under the supervision of an advisor.

FI 695 Independent Study I
A planned program of individual study under the supervision of a member of the faculty.

FI 696 Independent Study II
A continuation of Independent Study I.

FI 698 Thesis I
Prerequisite: 15 graduate hours. Periodic meetings and discussions of the individual student's progress in the preparation of a thesis.

FI 699 Thesis II
A continuation of Thesis I.

Department of Hospitality Administration

HM 610 Content Seminar in Hospitality/Institutional/Tourism Administration
Detailed analysis of recent developments in tourism, mass food service and lodgings administration.

HM 625 Supervisory and Leadership Development in Tourism, Hospitality and Institutional Operations
An incident approach is used to provide a cross section of supervisory situations in hospitality management. Emphasis is given to particular situations involving leadership developments, ethical behavior and formal and informal organizations of social behavior.

HM 630 Personnel and Labor Relations in the Hospitality/Tourism/Institutional Fields
Topics include organizational behavior, personnel selection, placement, supervision, job evaluation, wage and salary administration, motivation morale and union-management relations. Case studies and role playing are integral parts of the course.

HM 635 Applied Dietetics for Health Care Professionals
Examines the competencies necessary to produce a wholesome, nutritionally sound menu for health care and community food service operations. Topics covered are the U.S. Recommended Daily Dietary allowances for vitamins, minerals, proteins, fats and carbohydrates as well as the adjustment of calorie needs for people according to age, build, ambulatory or sedentary needs and special diets.

HM 640 Haute Cuisine for Hospitality Executives
An advanced course which covers the study and preparation of classical food items and service of the major world cuisines, culminated with the serving of a formal banquet. Laboratory fee required.

HM 655 Development of Hotel/Restaurant/Institutional Food Services
Examines the processes for developing profitable hotel, restaurant and institutional services. Some of the characteristics, opportunities, risks and decisions involved in starting hospitality and travel enterprises and institutional food services are studied. Emphasis is on alternative financing.

HM 660 Comparative Tourism
A detailed study of tourism developments in Connecticut compared with similar developments in a foreign state. Arrangements will be made for an on-site visit to a foreign country to facilitate the comparative study.

HM 670 Special Topics in Hospitality, Dietetics and Tourism Administration
An in-depth examination of topics in the field of hotel, restaurant, dietetics and tourism which reflects the special interest of a group of students.

HM 690 Research in Tourism/Hospitality/Institutional Administration
Independent study under the supervision of a faculty member.

HM 695 Independent Study I
A planned program of individual study under the supervision of a faculty member.

HM 696 Independent Study II
A continuation of Independent Study I.

HM 698 Thesis I
Prerequisite: 15 graduate hours, permission of an advisor. Periodic meetings and discussions of the individual student's progress in the preparation of a thesis.

HM 699 Thesis II
Prerequisite: HM 698. A continuation of HM 698, Thesis I.

Department of Humanities

Colloquia:

HU 601-602 Themes in Western Thought and Culture: Greece, Rome
Readings in primary sources of some of the classics in Western thought from Homer to the Renaissance. The place of these selected works in the development of Western ideas.

HU 606 Humanism and Its Methodology
A classic idea, work of art, musical composition, work of literature, historical event, and the variety of the critical appraisals of it.

HU 611 Historical Views and Views of History
A survey of modern Western Historiography with particular attention to the methodology of recent and contemporary historians.

HU 616 Art and Thought of the Renaissance
A study of the achievements of some of the major figures of the Renaissance in art, music, philosophy, natural science, literature, drama.

HU 621 The Age of the Enlightenment
Philosophical background of the Age of Reason and its effects upon the art, music, and literature of the period.

HU 626 The Age of Darwin
Scientific thought of the period and its effect upon religious and philosophical ideas, upon art and literature, and upon the development of sociological thought.

HU 631 Culture and Ethics in the Modern Age
Popular attitudes and rational concepts that determine the structure of contemporary America.

HU 636 Philosophical Thought
An examination of the changes in meaning and use of such enduring themes as certainty, existence, God, justice, knowledge, law, right, good.

HU 638 Structuralism and Structural Linguistics
An introduction to the basic principles of structuralism, with special emphasis given to elements of language and linguistic theory.

HU 641 Technology and Human Values
The influence of applied science and technology on our conceptions of ourselves, our society, and our environment.

HU 646 The Social Sciences in Our Time
How the social sciences are related to the humanities, estimates of the human condition in the light of developments in sociology, history, political science, psychology and economics.

Seminars:

HU 651-689 Seminars
Study of a variety of current subjects and specialized areas of study within the designated field. Students may take more than one seminar in the same general area.

HU 651-659 Topics in Humanities

HU 661-669 Topics in History

HU 671-679 Topics in Philosophy

HU 681-689 Topics in the Natural, Physical and Social Sciences

HU 691-695 Independent Study
A planned program of individual study or research under the supervision of a member of the faculty.

HU 698 Thesis I
Prerequisite: 15 graduate hours. Periodic meetings and discussions of the individual student's progress in the preparation of a thesis or portfolio.

HU 699 Thesis II
A continuation of Thesis I.

International Business

Department of Marketing

IB 643 International Business Operations
Prerequisites: EC 603-604. A summary of the economic, foreign environment and instructional concepts and constraints encountered by international business, and how they apply to decisions by managers of business operations and makers of official policy.

COURSES

IB 644 Import and Export Business
Prerequisites: MK 609, IB 643. A managerial approach to international marketing; emphasis on controllable and uncontrollable variables affecting marketing strategies, evaluation of foreign suppliers, methods of financing imports and exports, and documentation for import and export marketing.

IB 645 Structure of World Markets
Prerequisites: MK 609, IB 643. An intensive study of Asia, western and eastern Europe and South America as a complementary trade region for the United States firm. The area is surveyed as a present and potential market as well as an import source. Consideration is given to the historical and racial background of the people; their political, social and educational development; the resources and economic development of the countries in the area; and business practices unique to the area and its countries.

IB 651 Comparative Marketing
Prerequisites: MK 609, IB 643. A systematic study of the national and regional basis of socioeconomic conditions and of distributive business activities. The analysis of international similarities and differences in marketing functions, structures, processes, and factors as related to the physical, economic, political, social and cultural environments. The dynamic changes under way in marketing systems are also considered.

IB 652 Multinational Business Operations
Prerequisites: MK 609, IB 643. Managerial problems and strategies in foreign operations; structuring international operations through acquisition, licensing, or joint venture; the assessment of local competition; the impact of foreign environments; and legal, political and cultural problems facing the multinational firm in its relationship with its host countries.

IB 670 Selected Issues
A study of selected issues of particular interest to the students and instructor. May be taken more than once.

IB 690 Research Project
Prerequisite: 15 graduate hours and permission of the instructor. Independent study under the supervision of an advisor.

IB 695 Independent Study I
A planned program of individual study under the supervision of a member of the faculty.

IB 696 Independent Study II
A continuation of Independent Study I.

IB 698 Thesis I
Prerequisite: 15 graduate hours. Periodic meetings and discussions of the individual student's progress in the preparation of a thesis.

IB 699 Thesis II
A continuation of Thesis I.

Department of Industrial Engineering

IE 601 Introduction to Operations Research/Management Science
Prerequisites: M 610, IE 607 or QA 604 or equivalent. Introduction to the techniques and philosophies of management science and operations research. Topics include linear programming, inventory analysis, queuing theory, dynamic programming, decision analysis and other management techniques.

IE 602 Computing Fundamentals
An introduction to computing, including consideration of basic concepts and technology, history of automatic computation, algorithms, and flowcharts, number systems, system organization, software systems, survey of programming languages and of special computer applications.

IE 603C Introduction to Digital Computers: COBOL
An introduction to the basic elements of computer science including computer hardware, software, information and data processing. Programming concepts are introduced using COBOL, a common business-oriented language. A student who has taken IE 603F will not be given credit for IE 603C. Laboratory fee required.

IE 603F Introduction to Digital Computers: FORTRAN
An introduction to the basic elements of computer science including computer hardware, software, information and data processing. Programming concepts are introduced using FORTRAN, a common language that is well-suited for scientific and technical work. A student who has taken IE 603C will not be given credit for IE 603F. Laboratory fee required.

IE 604 Management Systems
Techniques of industrial and governmental systems management including general systems and organizational theory.

IE 605 Advanced Business Programming
Prerequisites: IE 603C or proficiency in language similar to COBOL. Advanced programming in COBOL or other business-oriented language within an applied business systems context. Laboratory fee required.

IE 606 Advanced Technical Programming
Prerequisites: IE 603F or proficiency in a language similar to FORTRAN. Advanced programming in FORTRAN or other technically-oriented language with emphasis on scientific and technical applications. Laboratory fee required.

IE 607 Probability Theory
Prerequisite: M 610 or equivalent. Probability of events. Random variables and expectations; discrete and continuous distributions; important standard distributions and applications; moment generating functions; central limit theorem.

IE 608 Assembler Language
Prerequisite: IE 603 or equivalent. Description of the general functional characteristics of a computer's main storage and peripheral units. Interrupt philosophy and interrupt service routines. Discussion of the general philosophy of assembler instructions, code conversion of I/O to and from main memory and familiarization with appropriate reference manuals. Micro instructions will be introduced to allow for writing and running of assembler programs. Macro instructions will be developed to demonstrate techniques for reduced programming time. Laboratory fee required.

IE 610 Computer Systems Selection
Prerequisites: IE 605 or IE 606, IE 614. Techniques for selecting, installing, and operating computer systems and their peripheral equipment. Concepts of decisions with respect to compiler and hardware selection. Development of operating procedures, form design, systems charting and documentation.

IE 611 Budgeting and Control
Prerequisite: A 600. An analytic approach as applied to the principles and policies of operational budgeting and control of expense and capital investments. Includes forecasting techniques, development of totally integrated systems with traditional financial statements and controls from top management to first-line supervision.

IE 612 Managerial Interactions I
An interdisciplinary systems approach to human behavior in organizations with emphasis on the impact of industrial engineering methods on organizational performance. The first course will deal with individual motivation and face-to-face interaction in managerial roles; the second concentrates on organizational development, job enrichment, and modern work attitudes.

IE 613 Managerial Interactions II
Prerequisite: IE 612.

IE 614 Data Information Systems
Prerequisites: IE 603 or equivalent, IE 604. Introduction to automated information systems planning and operations and their impact on management decision making, control functions and communication capabilities. An overview of concepts and procedures with applications in urban environments, large organizations and governmental agencies. Techniques presented include PERT/CPM, Gantt charting, cost-benefit analysis.

IE 615 Transportation and Distribution
Prerequisite: IE 601. Introduction to transportation science with emphasis on physical distribution problems. Survey of operations research models and optimization strategies and their roles in transportation systems management.

IE 621 Linear Programming
Prerequisites: M 610 or equivalent, IE 601 or equivalent. Thorough coverage of the techniques and applications of linear programming, a powerful operations research tool for optimal allocation of limited resources in linear systems.

COURSES

IE 622 Queuing Theory
Prerequisites: IE 601, IE 607. Elements of queuing theory including finite and infinite cases. Single server and multiple server parallel channels, series queues and special cases are analyzed. Experimental methods, including simulation, are presented in the context of industrial environments.

IE 623 Decision Analysis
Prerequisite: QA 605 or IE 607. Decision theory, game theory, and stochastic decision processes. Benefit-cost analyses under uncertainty.

IE 624 Quality Analysis
Prerequisite: IE 607. Concepts of quality and statistical quality analysis. Sampling techniques and decision processes.

IE 643 Reliability and Maintainability
Prerequisites: IE 602, IE 607 or QA 604. The basic theory and methodology of reliability and maintainability, including application of discrete and continuous distributions and statistical designs. Reliability, estimation, structure models and growth models.

IE 648 Data Structures
Prerequisite: IE 603 or equivalent. An examination of data structures and their associated computing algorithms. Topics will include: arrays, linked lists, trees, stacks, queues, hashing techniques; algorithms such as sorting and searching, insertion and deletion; analysis of computational complexity. Some programming will be required; proficiency in a high-level programming language is required.

IE 651 Human Engineering I
A broad coverage of the physiological, psychological, and sociological aspects of man and the society in which he lives and works. Special topics include human factors, motivation, group dynamics and ekistics.

IE 652 Human Engineering II
Prerequisite: IE 651. Continuation of Human Engineering I.

IE 658 Data-Base Systems
Prerequisite: IE 648. A survey of data-base (DB) systems, their purpose, structure, capabilities, uses. Topics will include: an overview of DB systems, their advantages and shortcomings; technical considerations, internal data storage methods; DB languages, data definition and manipulation; privacy and security in DB's; typical data-bases and their use.

IE 670 Current Topics in Computer and Information Science
Prerequisites: IE 601, IE 603, or permission of the instructor. An examination of new developments or current practices in computer and information science. A topic will be selected for thorough study; possible subject areas include data structures, recent hardware or software advances, specialized applications. Content may vary from trimester to trimester.

IE 671 Current Topics in Operations Research
Prerequisites: IE 601, IE 607, IE 621 or permission of the instructor. An examination of new developments or current practices in operations research. A topic will be selected for thorough study; possible subject areas include non-linear programming, network theory, scheduling techniques, specialized applications. Content may vary from trimester to trimester.

IE 672 Current Topics in Industrial Engineering
Prerequisite: IE 601 or permission of the instructor. An examination of new developments or current practices in industrial engineering. A topic will be selected for thorough study—possible subject areas include reliability, production engineering, human factors, specialized applications. Content may vary from trimester to trimester.

IE 681 System Simulation
Prerequisites: IE 601 or equivalent, IE 606 or equivalent. A study of the behavior of systems using computer simulation models of their organizational structure and decision criteria. Laboratory fee required.

IE 682 Compiler Design
Prerequisite: IE 605 or IE 606 or permission of the instructor. Design and operation of assemblers and macroprocessors. Introduction to compiler design. Metalanguage. Lexical and syntactic analysis. Interpretive systems. Control of translation, loading and execution. Relocating loaders and overlay generation. Symbolic coding systems.

IE 683 Systems Analysis
Prerequisites: IE 601 or QA 605, IE 614. Techniques and philosophies defining the concept of systems analysis are presented in detail and illustrated with large scale case studies. Diverse systems are analyzed covering the social, urban, industrial and military spheres. Techniques presented include utility theory, decision analysis, and technological forecasting.

IE 684 Multiprogramming Systems
Prerequisite: IE 605 or IE 606 or permission of the instructor. Topics in the areas of operating systems and computer architecture. Multiprogramming and multiprocessor systems. Dynamic storage allocation and virtual memory systems. Time-sharing systems. On-line, real-time systems.

IE 685 Theory of Optimization
Prerequisites: calculus, IE 603F or equivalent. Nonlinear and dynamic programming with special reference to computer analysis of optimization problems.

IE 686 Inventory Analysis
Prerequisites: IE 601, IE 607 or QA 605. Inventory theory and practical applications in operating inventory systems. Model construction, optimization and computer simulation.

IE 688 Design of Experiments
Prerequisite: IE 689 or three credit hours of statistical inference. Principles of modern statistical experimentation and practice in use of basic designs for scientific and industrial experiments; single factor experiments, randomized blocks, latin squares; factorial and fractional factorial experiments; surface fitting designs.

IE 689 Descriptive and Inferential Statistics
Prerequisite: IE 607 or equivalent. Inferential statistical designs, including basic statistical tests and analysis of variance. Statistical theories and application of correlation analysis, multiple linear regression, nonlinear regression, and analysis of covariance.

IE 690 Seminar Project
Prerequisites: 15 credit hours and permission of the program coordinator. Independent study under the guidance of an advisor into an area of mutual interest, such study terminating in a technical report of academic merit. Research may constitute a survey of a technical area in industrial engineering, operations research or computer science, or may involve the solution of an actual or hypothetical technical problem.

IE 695 Independent Study I
Prerequisite: permission of the program coordinator. Independent study under the guidance of an advisor into an area designated by the program coordinator.

IE 696 Independent Study II
A continuation of Independent Study I.

IE 698 Thesis I
Prerequisite: 15 graduate hours. Periodic meetings and discussion of the individual student's progress in the preparation of a thesis.

IE 699 Thesis II
A continuation of Thesis I.

Business Law

Department of Accounting

LA 673 Business Law I: Contracts and Sales
A study of the legal aspects of contracts and the results of contractual obligations. Legal problems stemming from the sale of goods, including the rights and duties of buyers and sellers and the remedies available to them.

LA 674 Business Law II: Business Organizations and Negotiable Instruments
Prerequisite: LA 673. Introduction to problems of formation and operation of legal groups with particular emphasis on the law of agencies, partnerships and corporations. Course coverage also will include the law of negotiable instruments.

LA 670 Selected Topics
A study of selected issues of particular interest to the students and instructor. May be taken more than once.

LA 690 Research Project
Prerequisite: 15 graduate hours or permission of the instructor. Independent study under the supervision of an advisor.

LA 695 Independent Study I
A planned program of individual study under the supervision of a member of the faculty.

LA 696 Independent Study II
A continuation of Independent Study I.

LA 698 Thesis I
Prerequisite: 15 graduate hours. Periodic meetings and discussions of the individual student's progress in the preparation of a thesis.

LA 699 Thesis II
A continuation of Thesis I.

COURSES

Logistics Management

Department of Management Science

LG 660 Logistics Technology and Management

Designed to provide to the student a broad survey of the wide range of logistics activities. Subjects covered: the concepts of the integrated logistics management system, customer interfaces, inventory management and support of spares and supplies, physical distribution management as well as the logistical organization, planning and administration. Discussion in the courses includes also the quantitative analytical techniques and computational tools commonly used in the logistical decision-making process.

LG 663 Logistics Management in the System Acquisition Process

Designed to provide students a general knowledge of the management process for the acquisition of equipment and material. Subject topics are: test and evaluations, specifications as a procurement instrument, procurement methods, type of contracts, etc.

LG 665 Integrated Logistics Support Analysis

Designed to provide students an opportunity to understand the concept of Integrated Logistics Support (ILS), and an overview of each of the elements of logistics specialties, their interface and interaction, as well as the integration of the separate logistics specialties into a coherent effort and output. Topics covered in this course are reliability, maintainability, life cycle cost, ILS management and major ILS decisions involved, test and support equipment, personnel and training, warranties, etc.

LG 669 Life Cycle Cost Analysis

A study of Life Cycle Cost Analysis (LCCA), a new state-of-the-art management tool used in the defense industry to assist and advise decision-makers to identify a preferred choice among all possible alternatives in acquisition of a new equipment and/or system. Topics discussed will be techniques and concepts such as the total cost concept (e.g., acquisition cost plus the cost of ownership including both the operating cost and the support cost); the fixed cost criterion (e.g., greatest effectiveness); the fixed effectiveness criterion (e.g., least cost) and the marginal utility criterion (e.g., least cost per unit of effectiveness), etc.

LG 670 Selected Topics

A study of selected issues of particular interest to the students and instructor. May be taken more than once.

LG 690 Research Project

Prerequisite: 15 graduate hours or permission of the instructor. Independent study under the supervision of an advisor.

LG 695 Independent Study I

A planned program of individual study under the supervision of a member of the faculty.

LG 696 Independent Study II

A continuation of Independent Study I.

LG 698 Thesis I

Prerequisite: 15 graduate hours. Periodic meetings and discussions of the individual student's progress in the preparation of a thesis.

LG 699 Thesis II

A continuation of Thesis I.

Department of Mathematics

M 610 Fundamentals of Calculus and Linear Algebra

Prerequisite: M 115 or equivalent. Review of algebra. Topics from calculus, including differentiation and integration methods, applied to problems in science, business, and the social sciences. Linear algebra, systems of linear equations and matrix methods.

M 620 Numerical Analysis

Prerequisite: 9 credit hours of calculus and programming ability in FORTRAN or permission of the instructor. Algorithms for obtaining numerical solutions on computers. Topics include: solution of determinants, solution of systems of linear equations by direct and iterative methods numerical integration, differentiation and solution of differential by finite difference methods. Laboratory fee required.

M 624 Applied Mathematics

Topics in applied mathematics including power series solutions of ordinary differential equations, special functions, matrix theory, and integral transforms.

M 632 Methods of Complex Analysis

Prerequisite: graduate standing in engineering or mathematics. This course is a study of the applications of the methods of complex variables to engineering and physical sciences. Topics include analytic function theory, contour integration and conformal mapping.

M 670 Special Topics in Mathematics

Prerequisite: permission of the instructor. A study of selected topics of particular interest to students and instructor. Course may be taken more than once.

M 690 Research Project
Prerequisite: 15 graduate hours or permission of the instructor. Independent study under the supervision of an advisor.

M 695 Independent Study I
A planned program of individual study under the supervision of a member of the faculty.

M 696 Independent Study II
A continuation of Independent Study I.

M 698 Thesis I
Prerequisite: 15 graduate hours. Periodic meetings and discussions of the individual student's progress in the preparation of a thesis.

M 699 Thesis II
A continuation of Thesis I.

Department of Mechanical Engineering

ME 602 Boundary Value Problems
Prerequisite: M 624. Topics in complex variables, evaluation of integrals via residue theorem, special functions, solution of partial differential evaluation by separation of variables, integral transform methods for partial differential equations, Green's function.

ME 603 Approximation Methods
Prerequisite: ME 602. Techniques for realizing engineering solutions to complex systems. Asymptotic expansions and perturbation methods among topics.

ME 604 Numerical Methods
Prerequisite: knowledge of FORTRAN. Quantitative techniques adaptable for computer solutions to engineering problems. Curve fitting, transcendental equations, simultaneous equations and numerical integration and differentiation.

ME 610 Advanced Dynamics
Kinematics and dynamics of particles and systems of particles. Lagrange's equations. Hamilton's principles and canonical transformation theory. The inertia tensor and rigid body motion.

ME 611 System Vibrations
Advanced techniques for analysis of vibrations in mechanical systems. Multiple degrees of freedom, random noise inputs among topics.

ME 615 Theory of Elasticity
Index notation, Cartesian tensors and coordinate transformation, stress tensor and field equation, analysis of stress and strain in two and three dimensions, airy stress function, applications to problems of torsion and bending, experimental methods.

ME 620 Classical Thermodynamics
Phenomenological equilibrium and nonequilibrium thermodynamics. Formulation and application of fundamental laws and concepts, chemical thermodynamics.

ME 622 Statistical Mechanics
Development of the molecular theory of matter; classical and quantum statistical results of equilibrium and kinetic properties of solids, liquids and gases.

ME 625 Mechanics of Continua
Prerequisite: ME 615 or permission of the instructor. Tensor analysis, the stress vector and the stress tensor, kinematics of deformation, material derivative, fundamental laws of continuum mechanics, conservation theorems, constitutive laws, and representative applications.

ME 628 Modern Materials
Survey of the forefront of current engineering materials and processing techniques. Representative topics might include composites, superalloys, laser fabrication and continuous casting techniques.

ME 630 Advanced Fluid Mechanics
Advanced topics chosen from among the following areas: perfect fluids, viscous fluids, turbulence, boundary layer theory, surface phenomena, shock waves, and gas dynamics.

ME 632 Advanced Heat Transfer
Review of the basic concepts of conduction and radiation. Detailed treatment of laminar, turbulent, free and forced convectional flows. Computational projects.

ME 645 Computational Fluid Dynamics and Heat Transfer
Prerequisite: ME 630; corequisite: ME 604 or M 620. Current methods of computer solutions of the conservation equations of fluid dynamics. Viscous, incompressible, compressible and shock flows. Real gas equations of state. Computer projects.

ME 670 Special Topics—Mechanical Engineering
Prerequisite: permission of the instructor. A study of selected topics of particular interest to students and instructor. Course may be taken more than once.

COURSES

ME 695 Independent Study I
Prerequisite: permission of program coordinator. Independent study under the guidance of an adviser into an area designated by the program coordinator.

ME 696 Independent Study II
A continuation of Independent Study I.

ME 698 Thesis I
Prerequisite: 15 graduate hours. Periodic meetings and discussions of the individual student's progress in the preparation of a thesis.

ME 699 Thesis II
A continuation of Thesis I.

Department of Management Science

MG 625 Systems Techniques in Business Administration
An integrated study of the techniques for solving administrative problems, including the analysis and improvement of organizational structures, office procedures, forms design, records management, reports and equipment standards. The conduct of a comprehensive systems survey using these techniques is explored in depth as are flow charting and the preparation of manuals.

MG 633 Managerial Economics
Prerequisites: EC 603-604, QA 604-605. A study of the application of the major tools of economic analysis to the problems encountered by management in the organization of the firm. Topics include the theory and measurement of consumer demand, measurement and control of costs, the effects of public policy upon mangerial decisions and pricing techniques and the allocation of capital within the firm.

MG 635 Purchasing and Materials Management
This course deals with the management of materials and the procurement function in a business enterprise. The fundamentals auxiliary functions, and management of materials activities provide introduction to an increasingly specialized field of business administration.

MG 637 Management
A study of the functions of management planning, organizing, directing, controlling, coordinating.

MG 638 Cost Benefit Management
Prerequisites: QA 604, EC 603. This course will provide students with an introduction and overview to the field of cost/benefit management. Fundamental theoretical evaluation of cost/benefit of a project will be covered. Other topics discussed include: the selection of the best investment criteria, the external environmental spillover effects, and the application of cost/benefit management in decision making under uncertainty.

MG 640 Management of Health Care Organizations
Identification of the characteristics of health care organizations and the dimensions of management in such organizations. Examination and application of the principles of management necessary for the successful operations of health care organizations. M.B.A. students in the Health Care concentration take MG 640 in place of MG 637 in the core.

MG 641 Contract Administration
Prerequisite: QA 600 or equivalent. The administrative aspects of the contract, modification, evaluation, and sub-contracting. Importance is given to value analysis as it effects government property and affects by action of the contractor and the government. Other issues are covered such as financial and pattern rights.

MG 645 Management of Human Resources
A study of organizational practices in the management of human resources. Manpower planning, recruitment, selection, training, compensation and contemporary problems of the field.

MG 650 Venture Management
Prerequisites: A 621, FI 615, MG 637, MK 609, or permission of the instructor. Deals with the establishment of a new business venture, covering such topics as site development, market analysis, staffing, inventory control, personnel relations and funding.

MG 660 Comparative Management
Prerequisite: MG 637. The main focus of this course is to develop an understanding of managerial practices in different organizations and systems. A conceptual framework is developed for the analysis of interaction between managerial processes and cultural factors as they affect the management of enterprises in various organizations and systems.

MG 661 Development of Management Thought

Prerequisite: MG 637. Study of the literature from various disciplines in order to determine the thinking and practices of leaders of organizations, past and present. The historical perspective of management thought will be developed. The contributions of religion, philosophy, economics, sociology and psychology to management thought and practice will be examined. Emphasis on pioneering works in the management of organizations. Case studies of the thinking and practices of famous leaders of American business enterprises.

MG 662 Organization Theory

Prerequisite: MG 637. A survey of the literature on theories of organization with emphasis on contemporary theories. Application of the theories to management and organizational problems will be attempted. Difficulties arising between theory and practice will be examined.

MG 663 Leadership in Organizations

Prerequisite: MG 637. Examination of theories and research findings from the behavioral sciences that are relevant to leadership in organizations. The role of the leader within the organization; the prerequisites, knowledge and practices required for successful leadership will be studied. Programs for the development of leaders will be explored.

MG 664 Organizational Effectiveness

Prerequisite: MG 637. Identification of the criteria necessary for developing and maintaining effective organizations. A study of the concepts that may be utilized in the management of these criteria. Approaches that may be examined and applied to problem situations through cases and role playing.

MG 665 Compensation Administration

Prerequisites: MG 645 and EC 635. A study of the compensation function in organizations. Establishing wages and salaries, fringe benefits and incentives.

MG 669 Business Policy and Strategy

Prerequisites: MG 637 and 3 credit hours of 600-level MG course work. Management policies and strategies for the complex organization operating in a dynamic environment are examined from the viewpoint of the top-level executives of the organization. Develops analytical frameworks for the management of numerous elements involved in assuring the fulfillment of the goals of the total organization. Integrates the student's general business knowledge with the required courses in the M.B.A. program. Emphasis is placed on the development of oral and written skills by the examination and discussion of cases.

MG 670 Selected Topics

A study of selected issues of particular interest to the students and instructor. May be taken more than once.

MG 675 Readings in Management

A seminar. Examines the literature in selected areas of management.

MG 678 Personnel Management Seminar

Prerequisites: MG 637, MG 645, P 619 & EC 625. A seminar in the personnel and manpower management function of the modern work organization. The use of an integrated behavioral, quantitative, and systems approach permits an applied multidisciplinary synthesis of the various aggregate manpower management subsystems required in the modern work organization.

MG 679 Industrial Relations Seminar

Prerequisites: MG 637, P 619, EC 625 & EC 687. A seminar in industrial relations and the labor-management relations function of the modern work organization. The use of an integrated behavioral, economic, and legal approach permits an applied multidisciplinary synthesis of the employee relations function required in either non-unionized or unionized work organizations.

MG 680 Current Topics in Business Administration

Prerequisite: 15 graduate hours or permission of the instructor. An integrative course that will examine the role of business in society and relate the business firm to its social, political, legal and economic environment. While the exact content of this seminar is expected to vary from semester to semester in accordance with the varied academic interests and professional backgrounds of different faculty handling the course, the basic theme is the role of the business firm as the "keeper" of the market mechanism and the means for organizing resources in the economy.

COURSES

MG 685 Research Methods in Business Administration
Prerequisite: QA 604 or equivalent. Designed to familiarize administrators with the tools and potentialities of social research and to assist them in the presentation, interpretation and application of research data.

MG 690 Research Project
Prerequisite: 15 graduate hours or permission of the instructor. Independent study under the supervision of an advisor.

MG 695 Independent Study I
A planned program of individual study under the supervision of a member of the faculty.

MG 696 Independent Study II
A continuation of Independent Study I.

MG 698 Thesis I
Prerequisite: 15 graduate hours. Periodic meetings and discussions of the individual student's progress in the preparation of a thesis.

MG 699 Thesis II
A continuation of Thesis I.

Department of Marketing

MK 609 Marketing
Prerequisites: EC 603-604. An intensive study of modern marketing fundamentals, a study of the decision-making problems encountered by the marketing executive and the relation of marketing to environmental forces.

MK 616 Buyer Behavior
Prerequisite: MK 609. An examination of the principal comprehensive household and organizational buyer behavior models and the behavioral science theories upon which such applied models are based. The buyer is analyzed at the individual level, at the social level and at the organizational level.

MK 639 Marketing Research and Information Systems
Prerequisites: MK 609, QA 605. A managerial approach to marketing information flow, including recognition of information needs and an overview of marketing research as part of an information system. Special attention to evaluation of research design and measurement methods, effective utilization of research output, and problems encountered in establishing a marketing information system.

MK 641 Marketing Management
Prerequisite: MK 609. The treatment of the basic decision problems of marketing management in terms of a conceptual framework for analysis. Consideration of the role played by human judgments and the mathematical tools available to aid in these judgments in a number of marketing areas, notably market analysis, pricing decisions, advertising decisions, promotional decisions and selection of distribution channels.

MK 643 Product Management
Prerequisite: MK 609. The search for new product ideas and their evaluation; the organization structure necessary to the development and introduction of new products and the management of a product line; the commercial aspects of product design, packaging, labeling and branding; considerations involved in making product deletion decisions; and the social and economic effects of managing product innovation.

MK 644 Consumerism
Prerequisite: MK 609. An analysis of the evolution of the consumerist movement; how and why it has developed; government agencies dealing with consumer problems; the impact of various market structures on the consumer; the impact of consumer-oriented legislation on marketing strategies; and the responsibility of business to the consumer and to society.

MK 645 Distribution Strategy
Prerequisite: MK 609. Analysis of channel strategies; theory and economic justification of distribution channels; direct and indirect methods of control; behavioral states of channel members; costing the channel; and management of changes in distribution.

MK 670 Selected Topics
A study of selected issues of particular interest to the students and instructor. May be taken more than once.

MK 680 Marketing Workshop
This course is centered around a structural model of a business firm. The major objective is to provide the student with an opportunity to develop managerial insights and skills in dealing with marketing problems in a competitive environment. Each of the participants is grouped into decision-making units (companies) and assumes the role of a marketing executive operating a business firm. These executives will be responsible for planning, organizing, staffing, directing and controlling their firm's resources.

MK 690 Research Project
Prerequisite: 15 graduate hours and permission of the instructor. Independent study under the supervision of an advisor.

MK 692 Readings in Marketing

MK 695 Independent Study I
A planned program of individual study under the supervision of a member of the faculty.

MK 696 Independent Study II
A continuation of Independent Study I.

MK 698 Thesis I
Prerequisite: 15 graduate hours. Periodic meetings and discussions of the individual student's progress in the preparation of a thesis.

MK 699 Thesis II
A continuation of Thesis I.

Department of Psychology

P 605 Survey of Community Psychology
An examination of historical roots and current concepts. A social-problems approach to psychological dysfunction. Changing professional roles. Community organization and human service delivery; strategies of intervention and community change.

P 607 Special Problems in Community Psychology
Theory and practice of community psychology with selected problems, populations and settings. Emphasis on community psychology service issues and problems in the Connecticut area.

P 609 Research Methods
Prerequisite: Undergraduate course in statistical methods. Introduction to analytic concepts pertinent to sampling techniques, research design, variable control and criterion definition. Basic problems of measurement, research paradigms, sources of error in research interpretation, problems of variable identification and control, and consideration of the logic of inference.

P 610 Program Evaluation
Prerequisite: P 609. A systematic study of the processes involved in planning, implementing and evaluating organizational programs. The focus is on action research strategies which integrate the entire process from planning to the evaluation of the program.

Practicum Seminars and Field Work:

An apprenticeship or on-the-job role in an ongoing program or center. Emphasis on developing conceptualizations and insights as a result of involvement in the apprenticeship. Placement at a field site for 8 to 10 hours per week. Weekly class meetings serve two purposes: to present specific theoretical material and research findings appropriate to each seminar and to allow students to discuss their field training experiences.

P 611 Practicum Seminar I: The Dyadic Relationship
Content focuses upon one-to-one relationships in community psychology. See general description above.

P 612 Practicum Seminar II: Models of Consultation
Content focuses upon community consultation. See general description above.

P 613 Practicum Seminar III: Systems Intervention
Content focuses upon intervention into and change in community systems. See general description above.

P 614 Field Work I
See general description above. 2 credit hours.

P 615 Field Work II
See general description above. 2 credit hours.

P 616 Field Work III
See general description above. 2 credit hours.

COURSES

P 618 Community Mental Health Philosophy and Concepts
Considerations of the philosophical bases which underlie traditional approaches to mental health. A study of the implied cultural values and attitudes which have determined the locations, the settings, the methods and the objectives of mental health treatment concepts, programs and techniques.

P 619 Organizational Behavior
Analysis of various theories of business and managerial behavior emphasizing the business organization and its internal processes. Psychological factors in business and industry, including motivation, incentives and conflict. A study of research findings relevant to an understanding and prediction of human behavior in organization.

P 620 Industrial Psychology
Psychological theories and research applied to business and other organizations. Problems and methods in selection and placement, training, performance appraisal, motivation and leadership.

P 621 Behavior Modification
Theory and research in behavior modification. Aversive learning, desensitization, operant conditioning. Applications in clinical and non-clinical settings.

P 623 Psychology of the Small Group
Analyses of the behavior and interaction of people in mutual gratification groups, committees, work groups and clubs.

P 625 Developmental Psychology
In-depth exploration of development through the life cycle and the developmental impact of family, neighborhood, schools, work, class, race, sex, etc.; key theoretical concepts; research findings; community intervention.

P 627 Attitude and Opinion Measurement
Prerequisite: P 609. Examination of modern methods of attitude and opinion measurement. Scale, schedule, and interview formats. Respondent sets. Consideration of sampling problems.

P 628 The Interview
The interview as a tool for information gathering, diagnoses, mutual decision making and behavior change. Use of role playing provides the student with insights into nuances of interpersonal relationships. Applications to selection, counseling and other situations.

P 629 Introduction to Counseling
The roles of the client and the counselor in the counseling relation. Examination of underlying assumptions.

P 630 Psychology of Personality
Major personality theories and their implications. Examination of the psychological and organic factors involved in personality development and expression.

P 631 Social Psychology
Current problems in social psychology. Attitude scale construction, attitude change, language as a social phenomenon, patterns of culture, social class, groups, person perception and conformity.

P 632 Group Dynamics and Group Treatment
An exploration of the emerging area of group dynamics. The structure of groups, their development, process interaction analysis, formal and informal groups, group psychotherapy and sensitivity training.

P 633 Problems of Drug Abuse
Discussion of selected issues and current problems in drug abuse.

P 634 Personality Assessment
A critical survey of the theories and issues of personality assessment. Topics include intelligence, achievement and ability assessment. Personality tests and ethical questions associated with psychological testing.

P 635 Assessment of Human Performance with Standardized Tests
Prerequisite: P 609. Theories, assumptions and constraints underlying construction and application of standardized tests employed in clinical, educational, governmental and industrial settings. Emphasis on selection of appropriate standardized tests for specific applications.

P 636 Abnormal Psychology
Etiological factors in psychopathology dynamics and classification of neuroses, psychophysiologic conditions, psychoses, personality disorders, organic illness, retardation and childhood diseases.

P 638 Psychology of Communication and Opinion Change
Characteristics of the source, the situation, and content of messages, along with other variables influencing attitudinal modification. Cognitive factors and social settings in attitude change.

P 640 Industrial Motivation and Morale

Prerequisite: P 619. The meaning of work; theories of motivation. Stimulus deprivation and expectation of reinforcement; job satisfaction and motivation; pay as an incentive; interventions to increase work motivation. Case studies.

P 641 Personnel Development and Training

Prerequisite: P 619 or P 620. Identification of skills and developmental needs, both from an organizational and individual perspective. Techniques for assessment and development of skills, especially at the managerial level. Training approaches. Evaluation of training efforts.

P 642 Organizational Change and Development

Prerequisite: P 619. The nature of organization development, intervention by third-party consultation, change in organization structure and role relationships, managerial grid, participation, conformity and deviation.

P 645 Seminar in Organizational/ Industrial Psychology

Prerequisites: P 609 and P 619. An examination of the professional psychologist at work in organizations. Emphasis on measurement methods, prediction, validation, selection, training, and performance appraisal; practitioners in business, industry, research organizations and government will provide insights into the application of psychological principles and methods.

P 650 Ecological Psychology

An in-depth study of the relationship between molar human behavior and the sociophysical settings in which it occurs. Human behaviors are conceptualized as adaptive responses to environmental and organizational systems that provide their contexts. Particular emphasis will be placed on the ecological match between organizations and their members.

P 660 Contemporary Issues in Organizational/Industrial Psychology

Prerequisite: 12 hours in psychology or consent of the instructor. Indepth investigation of topical areas of concern in organizational/industrial psychology. Topics may include, but are not limited to, the impact of EEOC regulations on selection and promotion; assessment centers; the role of the consultant in organizations; flex-time, day care, and other strategies to accommodate family needs of employees; stress in work settings; women in management. Content will be stated at the time the course is scheduled. Students may petition for a particular topic they feel would fit their academic goals. May be taken twice.

P 670 Selected Topics

A study of selected issues of particular interest to the students and instructor. May be taken more than once.

P 672 Psychology of the Middle and Later Years

A comprehensive consideration of the psychological aspects of the aging process. Sensation, perception, cognition, intelligence, problem solving, memory and sexuality, personality changes. Disengagement, rigidity. Death and its anticipation.

P 678 Practicum I

For students already employed in a managerial or supervisory role. A job-related research project is carried out under faculty supervision.

P 679 Practicum II

Prerequisite: P 678.

P 693 Organizational Internship I

For students without experience at the managerial or supervisory level. Under faculty supervision, the student engages in field experience in an industrial setting.

P 694 Organizational Internship II

Prerequisite: P 693.

P 695 Individual Intensive Study I

Prerequisite: completion of required courses or 24 graduate hours and written approval of department chairman. Provides the graduate student with the opportunity to delve more deeply into a particular area of study under faculty supervision.

P 696 Individual Intensive Study II

Prerequisite: P 695.

P 698 Thesis I

Prerequisite: completion of all required courses or 24 graduate hours and written approval of department chairman. Periodic meetings and discussions of the individual student's progress in the preparation of a thesis.

P 699 Thesis II

Written approval of departmental chairman. A continuation of Thesis I.

COURSES

Department of Public Administration

PA 601 Principles of Public Administration

The development, organization, functions and problems of national, state and local governmental administration.

PA 602 Public Policy Formulation and Implementation

The relationship between public administration and the formulation of public policy is studied. The implementation of public policy by administrators based on the politics of the administrator is examined in terms of interaction between various group representatives, i.e., the legislators, the politician, and pressure group leaders.

PA 604 Communities and Social Change

Interactions among the community as a social organization and education, police and welfare institutions within it; special attention to conceptual frameworks and current research or action programs that particularly affect minority groups.

PA 611 Research Methods in Public Administration

Designed to familiarize administrators with the tools and potentialities of social research, and to assist them in the presentation, interpretation and application of research data.

PA 620 Personnel Administration and Collective Bargaining in the Public Sector

Study of the civil service systems in the United States and the state governments, including a systematic review of the methods of recruitment, promotion, discipline, control and removal. Explores the effects on work relationships of collective bargaining statutes which have been adopted by legislatures. Emphasis is placed on collective bargaining case studies from state and local governments and hospitals.

PA 625 Administrative Behavior

Recommended prerequisite: PA 601. The problems faced by an administrator in dealing with interpersonal relationships and human processes. Analysis of individual and group behavior in various governmental and business settings to determine the administrative action for the promotion of desired work performance. Emphasis given to the public sector. Participation in actual problem situation discussions and case studies.

PA 630 Governmental Accounting

Recommended prerequisite: PA 601. The problems faced by a survey of the essential principles of governmental accounting, budgeting, cost accounting, and financial reporting. The various operating funds, bonded debt, fixed assets, investments, classification of revenue and expenditures, general property taxes and interfund relationships.

PA 632 Public Finance and Budgeting

Recommended prerequisites: PA 601, EC 608, PA 604. State and local expenditure patterns, state and local revenue sources, income taxation at the state and local level, excise taxation, sales taxation, taxation of capital and the property tax. Emphasis on fiscal and economic aspects of federalism and federal-state fiscal coordination. The role of the budget in the determination of policy, in administrative integration, in control of government operations.

PA 634 Problems of Municipal Management

Study of selected problems of city management with emphasis on "housekeeping" and line operations.

PA 635 Statistics for Public Administrators

Provides a basic theoretical treatment of the nature of statistical analysis and its role in economic research design and procedure.

PA 641 Financial Management of Health Care Organizations

Theory and application of financial planning and management techniques in health care organizations. Emphasis is on financial decision making, preparation of short-term and long-term cash, capital, and revenue and expense budgets and financial plans to meet the requirements of HCFA and other third parties.

PA 642 Health Care Delivery Systems

This course deals with a contemporary analysis of health care delivery systems in the U.S. Financial, cost, economic, political and organizational issues will be discussed.

PA 643 Health and Institutional Planning
Designed to develop skills and understanding of the dynamics of health and social planning processes with respect to consumer demand, national and local health goals and the optional location of facilities, services and manpower.

PA 644 Administration of Programs and Services for the Aged
The structure, function and properties of publicly and privately funded programs and service organizations providing health services to the aged. The economic, political, legal and social issues which affect the administration of human service organizations will be studied, with emphasis on administration of health care services.

PA 645 Health Care Economics and Finance
Recommended prerequisite: PA 641. This course integrates the accounting, economics, finance, budgeting, and health insurance principles, concepts and analytical tools which are essential to the decision-making processes of health care organizations.

PA 650 Administrative Law
A search for principles and criteria against which public interest can be balanced with private right in the changing patterns of government, with particular reference to the American system.

PA 660 Urban Planning: Theory and Practice
Explores the concept of physical planning within the urban developmental framework. The function of planning in its relationship to the environment. Comprehensive planning with its many ramifications involving the various sections of our society. Methods for analyzing problems as well as design methods for problem solving.

PA 661 Problems of Metropolitan Areas
Analysis of the problems of government and administration arising from the population patterns and physical and social structures of contemporary metropolitan communities.

PA 663 Urban Housing
Encompassed are the subjects of housing management, planning, finance and policy. Specific topics such as the provision of low-income housing, the use of mortgage insurance, interest subsidies, site planning, rent controls, code enforcement, mortgage markets, and the rise of housing abandonment are stressed.

PA 670 Selected Topics
A study of selected issues of particular interest to the students and instructor. May be taken more than once.

PA 671 Administrative Problems
Exploration of the practical experiences and problem-solving situations in the day-to-day activities of a public administrator.

PA 680 Seminar in Public Administration
Exact material to be covered will be announced.

PA 690 Research Seminar
A core course required of all students. Research seminar must be taken in the fall trimester of the academic year in which the student plans to graduate. Students will undertake a major independent research study and participate in an integrative seminar on research and its uses in public administration.

PA 691 Research Project
Prerequisites: 15 graduate hours, permission of the public administration graduate program coordinator. Independent study for advanced graduate students on selected problems in public administration. May be taken more than once.

PA 692 Readings in Public Administration
Prerequisite: 15 graduate hours or permission of the instructor.

PA 693 Public Administration Internship
Prerequisites: 15 graduate hours, permission of the public administration graduate program coordinator. A supervised work experience in a cooperating public service agency. Students must be available for at least one day per week.

PA 695 Independent Study I
A planned program of individual study under the supervision of a member of the faculty.

PA 696 Independent Study II
A continuation of Independent Study I.

PA 698 Thesis I
Prerequisite: 15 graduate hours. Periodic meetings and discussion of the individual student's progress in the preparation of a thesis.

PA 699 Thesis II
A continuation of Thesis I.

COURSES

Department of Physics

PH 680 Special Topics—Physics
Prerequisite: permission of the instructor. A study of selected topics of particular interest to students and instructor. Course may be taken more than once.

Philosophy

Department of Humanities

PL 601 Business Ethics
The business enterprise seen as the focus of objective and relative values and as part of the endeavor toward a common good.

Department of Political Science

PS 601 Constitutional Law
A study of the relation of the judicial process and constitutional law to the political process in the United States. Judicial review, federalism and separation of powers.

PS 602 Civil Liberties and Rights
An analysis of civil liberties, civil rights, due process, and equal protection of the law. An examination of the role of the public official in the protection, denial or abridgement of the constitutional and legal rights of individuals.

PS 603 International Law
A study of the role of international law in the modern state system with particular reference to individuals; territorial jurisdiction; law of the sea, air and space; and the development of law through international organizations.

PS 604 Human Rights and the Law
An examination of the development of the international and national laws establishing human rights, the laws of war, war/criminality, crimes against humanity, and the application of the universal declaration of human rights of the Helsinki accords, and the concept of the individual as the basis of law.

PS 605 Criminal Law
Scope, purpose, definition and classification of criminal law. Offense against the person; habitation and occupancy. Offenses against property and other offenses. Special defenses. Emphasis on the Connecticut penal code.

PS 608 The Legislative Process
An analysis of the legislative process in the American political system. Stress will be placed on legislative politics in state and local government. Among areas covered will be legislative functions, selection and recruitment of legislative candidates, legislative role orientations, the legislative socialization process, the committee system, the legislators and their constituencies, legislative lobbyists, legislative decision making, legislative-executive relations and legislative organization and procedures.

PS 610 Legal Methods I
A study of procedure and process of the law as it applies in the American system.

PS 612 Contracts, Torts and the Practice of Law
An introduction to the most important components of private law, that is, contracts, torts and civil procedure and their application to business, government and individuals.

PS 613 Political Justice
This course will explore the relationship between legal issues and the political environment in history, including an examination of notable political trials, legislative investigations and regulatory decisions.

PS 615 Jurisprudence
The purpose of this course is to provide the general philosophical framework for all the law courses in the legal studies program. The course will include the background and development of the common law, sources of the law, and the court system. Special problems in Anglo-American jurisprudence are reviewed.

PS 616 Urban Government
An examination of the urban political system. Stress will be placed on the political aspects of urban government structures. Among the areas covered will be formal and informal decision making in urban government, community power structures, types of urban government structures, the politics of inter-governmental relations and the politics of servicing the urban environment (social services, planning agencies, education, housing, transportation, health, pollution control and ecology, revenue sharing, public safety, neighborhood corporations, etc.).

PS 617 Law, Science and Ethics
The intersection of law, science and ethics in a variety of contexts, including experimentation with human subjects, psycho-surgery, genetic engineering, organ transplants, abortion and the right to die.

PS 625 Transnational Legal Structure
An introduction to the basic structure of legal systems in other countries, their relationship to Anglo-American law and their contextual development. Special topics include: legal status of foreign and multinational corporations, rights and responsibilities of aliens, protections for investors, expropriation and procedural due process.

PS 626 Decision Making in the Political Process
An in-depth study of decision making in the American system with special emphasis upon the various types of mechanisms, i.e., executive, legislative, judicial, bureaucratic, organizational and military. The influence of intelligence, economic and psychological factors and social pressures upon decisions and decision makers will be examined.

PS 628 Change and Government
A study of the major processes of change and their consequences for the functioning of government. The course will concentrate upon changes that may occur through violence, evolution or technology, and which may alter the effective operation of government.

PS 633 The Political Process and the Aged
A study of the political process as it relates to the aged. Governmental decision making on federal, state and local levels including legislation and its implications.

PS 635 Law and Public Health
A course for the civil servant or health professional concerned with the laws relating to the public health at the federal, state and local level as well as the practical administration of those laws.

PS 641 The Politics of the World Economy
An examination of the global politico-economic system and the challenges facing world diplomacy. Multinational corporations and political structures designed to coordinate global policies for the monetary and trade systems, international organizations and their impact on third world development, and problems facing industrialized nations will be analyzed.

PS 645 Government and the Industrial Sector
This course examines the various impacts of government regulation on the corporate sector and the major legal and regulatory requirements affecting business and industry.

PS 652 Legal Administration
Examination of the structure and process of legal administration in the United States and the types of issues arising within it. It includes a discussion of the relationship among social, economic and political factors and their effects on administration of law and public policy in contemporary issue areas.

PS 655 Conflict Resolution
A course covering the essential features and methods available within the legal system to resolve disputes, including the uses of law, equity, administrative agencies, bureaucracies, arbitration, mediation, special commission and private self-help. Consideration will be given to the applicability of those methods to various types of disputes and will touch upon the choice of law in instances when no single rule may govern in a federal system.

PS 670 Special Topics
Items of special interest might include: First Amendment problems, energy and the law, law and the environment, labor legislation and the law, law and commercial paper and stock issues. May be taken more than once.

PS 695 Independent Study I
A planned program of individual study under the supervision of a member of the faculty.

PS 696 Independent Study II
A continuation of Independent Study I.

PS 698 Thesis I
Prerequisite: 15 graduate hours. Periodic meetings and discussion of the individual student's progress in the preparation of a thesis.

PS 699 Thesis II
A continuation of Thesis I.

Quantitative Analysis

Department of Management Science

QA 600 Quantitative Analysis
Basic mathematics for solving economic and business problems. Topics include algebra review, equations and inequalities, graphs, exponential and logarithmic functions, an introduction to differential and integral calculus, and matrix algebra. No credit.

COURSES

QA 604 Probability and Statistics
Prerequisites: QA 600 or equivalent. An introduction to business statistics. Topics include data analysis and presentation, frequency distributions, probability theory, probability distributions, decision making under uncertainty, sampling and statistical inference, hypothesis testing, t, chi-square, and F tests.

QA 605 Advanced Statistics
Prerequisite: "B" or better grade for QA 604. A continuation of QA 604. Topics include simple regression and correlation, multiple regression, analysis of variance, the general linear model and an introduction to time series analysis and forecasting techniques.

QA 606 Advanced Management Science
Prerequisites: IE 601, QA 604-605. An examination, from a management viewpoint, of the scope of applicability of the methods and models developed in IE 601, Introduction to Operations Research/ Management Science, and QA 604-605, Probability and Statistics, and Advanced Statistics. Topics include parametric programming and economic interpretation of the dual LP problem, marginal costs and revenues, shadow prices, opportunity costs, incremental costs, costs of deviation from optimal solution point(s), and location or construction of desirable alternate optimal solutions.

QA 607 Forecasting
Prerequisite: QA 605 or permission of the instructor. This course will present a wide range of forecasting methods useful to students and practitioners of management, economics and other disciplines requiring forecasting. The course will focus on quantitative techniques of forecasting and will include: smoothing and decomposition approaches, multiple regression and econometric models, and autoregressive/moving average methods including generalized adaptive filtering and Box-Jenkins methodology.

QA 670 Selected Topics
A study of selected issues of particular interest to the students and instructor. Course includes applied regression analysis, analysis of variance, factor analysis, multivariate analysis, nonparametric statistics and simulation. May be taken more than once.

QA 690 Research Project
Prerequisite: 15 graduate hours or permission of the instructor. Independent study under supervision of an advisor.

QA 695 Independent Study I
A planned program of individual study under the supervision of a member of the faculty.

QA 696 Independent Study II
Prerequisite: QA 695.

QA 698 Thesis I
Prerequisite: 15 graduate hours. Periodic meetings and discussions of the individual student's progress in the preparation of a thesis.

QA 699 Thesis II
Prerequisite: QA 698. A continuation of QA 698, Thesis I.

Science

Department of Biology, Environmental Studies and General Science

SC 601 Ecology for Environmental Engineers
An introduction to the biological aspects of environmental problems. Includes discussion of the concepts of bioecology, organisms (microorganisms, plants, animals) important in pollution control and detection, and human organ systems most affected by pollution.

SC 602 Pollutants and the Aquatic Environment
Prerequisite: SC 601. Discusses the interrelationships among the various kinds of pollutants, the morphology of the lake, river, or coastal area, and the effects on the individual organism and the ecosystem as a whole. Treatment methods using organisms are also discussed.

SC 603 Air Pollution
Prerequisite: SC 601. An introduction to air movements in the atmosphere and their relation to pollutants; the effect of air pollution upon organisms with special emphasis on the effects on human beings.

SC 608 Water Quality
Prerequisite: SC 601 or undergraduate biology major. Recognition of the organisms and substances of polluted waters; the selection of the appropriate methods for collection, testing, and analysis of the data. The functions and interrelations of governmental agencies in controlling water pollution.

SC 610 General Environmental Health

Prerequisite: SC 601 or undergraduate biology major. Principles of public health with general emphasis given to environmental factors such as air and water pollutants, legal standards and preventative measures and their relationships to public health.

SC 612 Freshwater and Marine Biology

Prerequisite: SC 601 or undergraduate biology major. Investigation of relationships between aquatic systems and the organisms living in these systems. Emphasis placed on the manner in which ecological studies of aquatic systems are conducted

SC 615 Life Cycle Nutrition

Prerequisites: Introductory Nutrition, Introductory Biology, Introductory Chemistry, or by special permission. A review of the structures, properties, sources and actions of the major nutrients. Discussion of the relationships of the nutrients to various physiological processes. Emphasis on nutritional needs during the various stages of life. Therapeutic nutritional applications presented where applicable.

SC 616 Geriatric and Advanced Nutrition

Prerequisites: SC 615 or strong background in nutrition. Latest concepts of nutrition discussed. Reports from current journals presented. Special emphasis given to nutritional problems of the aged. Preventative and therapeutic nutrition covered.

SC 621 Microbiology

Prerequisites: SC 301, or permission of the instructor. Use of current literature to view the beneficial and deleterious impacts of microorganisms, from viruses to fungi, on the environment. Topics will be diversified and dependent upon student preference.

SC 622 Bacteriology

Prerequisites: SC 301, SC 302, or permission of the instructor. Study of the characteristics basic to classification of bacteria. Group-by-group study of bacteria with emphasis on the major detrimental and beneficial contributions of each group as they affect man and the environment. Students will be expected to survey recent findings in scientific publications.

SC 642 Physical Aging

Prerequisite: SC 121 or some undergraduate biology. A study of the aging process in man and its effects on the various component systems of the body—muscular, skeletal, endocrine, etc.—in health and disease.

SC 670 Selected Topics

Prerequisite: 9 graduate hours. A study of selected issues of particular interest to the students and instructor. May be taken more than once.

SC 690 Research Project

Prerequisite: permission of the instructor. Independent study under the supervision of an advisor.

SC 695 Independent Study I

A planned program of individual study under the supervision of a member of the faculty.

SC 696 Independent Study II

A continuation of Independent Study I.

SC 698 Thesis I

Prerequisite: 15 graduate hours. Periodic meetings and discussions of the individual student's progress in the preparation of a thesis.

SC 699 Thesis II

A continuation of Thesis I.

Department of Occupational Safety and Health Management

SH 602 Safety Organization and Administration

Intensive study of the occupational safety and health field as it currently exists. History and growth of industrial safety. Motivational and psychological aspects of accident prevention. Legal aspects of safety, including worker compensation and state and federal regulations. Engineering needs, development of voluntary standard systems. Fire prevention, industrial hygiene and future directions.

SH 605 Industrial Safety Engineering

An analysis of the major physical hazards in industrial work and the attendant safety practices employed to eliminate the hazardous condition or minimize the likelihood and extent of injury. This includes the hazards associated with machinery, combustion, electricity, material handling and fire.

COURSES

SH 608 Industrial Hygiene Practices
Recognition of the magnitude and extent of the health hazards characteristic of industrial work. An evaluation of the danger, the control of the hazard, and the protection of the worker.

SH 611 OSH Seminar
The students and OSH faculty will meet once a week for 1-hour throughout the trimester. The student will pick a topic from the current occupational health and safety problems, conduct literature search and prepare a formal talk for 45 minutes with audiovisuals, etc. The student will then present it on assigned date for 45 minutes and will answer any questions for the remaining 15 minutes either from faculty or students. 1 credit hour.

SH 615 Industrial Toxicology
Introduction to environmental and industrial toxicology; toxicologic evaluation; the mode of entry, absorption and distribution of toxicants; the metabolism and excretion of toxic substances; interactions between substances in toxicology; toxicologic data extrapolation; particulates; solvents and metals; agricultural chemicals—insecticides and pesticides; toxicology of plastics; gases; food additives; plant and animal toxins; carcinogens, mutagens and teratogens.

SH 620 Occupational Safety and Health Law
A survey of the major federal Occupational Safety and Health laws with an emphasis on the Occupational Safety and Health Act of 1970 (Public Law No. 91-956) as well as state and federal workman's compensation law. Studies will focus on the Administration of the laws, their major provisions, the enforcement process as well as the federal/state interrelationships in this milieu. 2 credit hours.

SH 630 Product Safety and Liability
An investigation into the legal pitfalls and the human concerns inherent in the marketing and consumption of goods: sellers responsibility, product liability, insurance, labeling requirements, The Consumer Product Safety Act and related acts, the procedures for minimizing legal risk and maximizing human safety and health.

SH 660 Industrial Ventilation
A thorough study of industrial ventilation systems including theory of design, air pollution control, life cycle costs, automatic controls, instrumentation, relevant codes and standards, and the evaluation of system performance.

SH 670 Selected Topics
A study of selected issues of particular interest to the students and instructor. May be taken more than once.

SH 690 Research Project I
Prerequisite: permission of the instructor. Independent study under the supervision of an advisor. 1-3 credits.

SH 691 Research Project II
Prerequisite: SH 690. 1-3 credits.

SH 693 OSH Internship I
This will be coordinated with the local industry or governmental agencies such as OSHA, NIOSH and EPA. It involves practical problems in occupational safety or industrial hygiene and step by step approach on how to solve these problems under the supervision of a practicing professional. At the end of the project a report will be prepared by the student and be presented to the OSH faculty for grade evaluation. 1-3 credits.

SH 694 Internship II
A continuation of Internship 1. 1-3 credits.

SH 695 Independent Study I
A planned program of individual study under the supervision of a member of the faculty. 1-3 credits.

SH 696 Independent Study II
A continuation of Independent Study I. 1-3 credits.

SH 698 Thesis I
Prerequisite: 15 graduate hours. Periodic meetings and discussion of the individual student's progress in the preparation of a thesis.

SH 699 Thesis II
A continuation of Thesis I.

Sociology

Department of Sociology and Social Welfare

SO 601 Minority Group Relations
An interdisciplinary survey of minority groups in the United States with special reference to ethnic, religious and racial factors that influence interaction.

SO 610 Urban Sociology
Prerequisite: PA 604. The problem of urban growth and development. Residential patterns together with the physical development of cities and the redevelopment plans. An examination of the people and their relationships to the environment.

SO 620 Sociology of Bureaucracy
A study of some of the classic conceptualizations of bureaucracy and their relevance to the structure and functioning of American economic and governmental institutions. The course will be designed to give students informational and experiential resources with which they, as planners and managers, can improve their abilities to make effective policy decisions. Strongly recommended for gerontology students.

SO 641 Death and Suicide
In-depth analysis of suicide. Traditional theories of suicide are analyzed regarding the psychological approach as well as the demographic and group analysis of sociology. The goal of the course is both academic and practical, stressing community application. Strongly recommended for gerontology students.

SO 649 Seminar in Health and Social Policy
Prerequisite: consent of instructor. Analysis of the legal, political social, economic and organizational factors in planning and providing healthcare services with emphasis on policy formulation and implementation. Current health policy issues will be discussed.

SO 651 Social Gerontology
Basic introduction to the field of gerontology. Discusses the history and definition of the field, the contributions of academic disciplines to the field, various perceptions of aging, and explores the basic theories, problems and prospects of gerontology. Required of all gerontology students.

SO 652 Seminar in Gerontology
The seminar will focus on a topic or a series of topics crucial to the analysis of the gerontological phenomenon, and will explore interdisciplinary techniques and findings. Required of all gerontology students.

SO 670 Selected Topics
A study of selected issues of particular interest to the students and instructor. May be taken more than once.

SO 695 Independent Study I
A planned program of individual study under the supervision of a member of the faculty.

SO 696 Independent Study II
A continuation of Independent Study I.

SO 698 Thesis I
Prerequisite: 15 graduate hours. Periodic meetings and discussion of the individual student's progress in the preparation of a thesis.

SO 699 Thesis II
A continuation of Thesis I.

Social Welfare

Department of Sociology and Social Welfare

SW 651 Social Work with the Elderly I: Individuals, Families, Groups
This course will deal with the problems of aging, focusing particularly on the individual and the immediate family. Emphasis will be placed on the role of social work in helping the individual and the family to deal with issues of discrimination, medical and psychological problems, parent-child conflicts, death and dying.

SW 652 Human Services and the Elderly II: Programs, Planning, Policies
An introduction to the variety of private and public social service programs available to the elderly. An attempt will be made to identify gaps and propose alternatives for future programming.

BOARD, ADMINISTRATION, AND FACULTY

Board of Governors

Nathaniel A. Amritt, day student, University of New Haven
Henry E. Bartels, president, MRM Industries
James Q. Bensen, former resident manager, Bethlehem Steel Corporation
Roland M. Bixler, president, J-B-T Instruments, Inc.
Kirk F. Blanchard, assistant treasurer, Wyatt, Inc.
Norman I. Botwinik, chairman, president, Botwinik Brothers, Inc.
Mrs. J. F. Buckman
Dr. Ann J. Capecelatro
Norman L. Christensen, president, Separation Science Company
Mrs. Gordon H. Clark
Abbott H. Davis, Jr., vice president-residence, The Southern New England Telephone Company
E. Lucien DeShong, vice president, New Haven Projects, Olin Corporation
Robert B. Dodds, former president, Safety Electrical Equipment Corporation
Edward J. Drew, manager, Quinnipiack Club
John H. Duffy, director of manufacturing, Miles Pharmaceuticals, Division of Miles Laboratories, Inc.
Joseph F. Duplinsky, president, Blue Cross & Blue Shield of Connecticut
John E. Echlin, Jr., account executive, Bache, Halsey, Stuart, Shields, Inc.
Dominic Falcone, evening student, University of New Haven
John D. Fassett, chairman of the board and chief executive officer, United Illuminating Company
Frederick G. Fischer, vice chairman; partner, Ernst & Whinney
John A. Frey, president, Hersey Metal Products, Inc.
Robert N. Giaimo, former U.S. congressman, Third Congressional District, Connecticut
Robert M. Gordon, former president, Raybestos-Manhattan, Inc.
Stephen E. Grodzinsky, associate professor, University of New Haven
John W. Harvey, special lecturer, University of New Haven
Phillip Kaplan, president, University of New Haven
William J. Kottage, Jr., day student, University of New Haven
George E. Laursen, vice president-manufacturing, Health and Beauty Division, Chesebrough-Pond's, Inc.
Harold R. Logan, vice chairman and director, W. R. Grace & Company
Ellis C. Maxcy, former president, The Southern New England Telephone Company
Timothy Mellon
Alexander W. Nicholson, Jr., president, Statewide Insurance Corporation

Peter K. Orne, vice president and general manager, WTNH-TV
Herbert H. Pearce, assistant secretary; president, H. Pearce Company
Mrs. William F. Robinson, Sr., Title IV consultant, State Department of Education
Fenmore R. Seton, president, Seton Name Plate Corporation
Franklin B. Sherwood, professor, University of New Haven
Leon J. Talalay
Anthony Terrasi, day student, University of New Haven
George R. Tiernan, secretary; attorney at law
Robert M. Totton, field underwriter, New York Life Insurance Company
Marjorie Turkoff, evening student, University of New Haven
Cheever Tyler, attorney at law
P. Takis Veliotis, vice president-marine and international, General Dynamics Corporation
Barton L. Weller, chairman of the board, Vitramon, Incorporated
F. Perry Wilson, Jr., senior vice president, The First Bank
Robert F. Wilson, president, Wallace Silversmiths, Inc.
Robert C. Zampano, U.S. district judge

Administration

Phillip Kaplan, B.A., M.A., Ph.D., President
Alexis N. Sommers, B.M.E., M.S., Ph.D., Provost
Walter O. Jewell, A.B., Ph.D., Secretary
William S. DeMayo, B.S., M.B.A., Treasurer
John M. Lupton, Vice President for Development and Institutional Relations
James W. Uebelacker, B.A., M.A., Ph.D., Assistant Provost
Ralf E. Carriuolo, B.A., M.M., Ph.D., Acting Dean of School of Arts and Sciences
Gwendolyn E. Jensen, B.A., M.A., Ph.D., Dean of the Graduate School
Konstantine C. Lambrakis, B.S.E.E., M.S.M.E., Ph.D., Dean of the School of Engineering
Marilou McLaughlin, B.A., M.A., Ph.D., Acting Dean of the School of Business Administration
Richard C. Morrison, A.B., M.S., Ph.D., Dean of the School of Professional Studies and Continuing Education
Samuel M. Baker, Jr., B.A., B.S., M.A., University Librarian
John E. Benevento, B.S., M.S., Director of University Operations
David DuBuisson, B.A., M.P.A., Acting Dean of Admission and Financial Aid
Joseph P. Macionus, B.S., M.P.A., Registrar
Ann Martindale, B.A., M.A., Director of Public Relations
John O'Brien, B.S., M.B.A., Director of Graduate Admissions
Thomas B. Robinson, B.A., M.Ed., Ed.D., Dean of Student Affairs and Services
William A. Rowen, B.A., M.S.Ed., Ed.D., Director of Evening Studies

Faculty 1982-1983

Arnold, Joseph J., Associate Professor, Industrial Engineering
B.S., M.S., Southern Connecticut State College
Bechir, M. Hamdy, Associate Professor, Civil Engineering
B.C.E., Cairo University; M.A.Sc., University of Toronto; Sc.D., Massachusetts Institute of Technology

Bodon, Jean, Assistant Professor, Communication
B.A., Birmingham Southern College; M.A., University of Alabama
Bradshaw, Alfred D., Associate Professor, Sociology
B.A., Ph.D., Syracuse University
Brady, Gene E, Associate Professor, Management Science
B.S., University of Virginia; M.B.A., Wayne State University; Ph.D., University of Oregon
Brody, Robert P., Associate Professor, Marketing
B.A., Wesleyan University; M.B.A., University of Chicago; D.B.A., Harvard University
Brooks, Robert, Assistant Professor, Marketing
B.S., University of Vermont; M.B.A., New York University
Carriuolo, Ralf E., Professor, Humanities
B.A., Yale University; M.M., Hartt College; Ph.D., Wesleyan University
Carson, George R., Associate Professor, Civil Engineering
B.C.E., City College, New York; M.S.C.E., Columbia University
Chandra, Satish, Professor, International Business
B.A., University of Delhi; M.A., Delhi School of Economics; LL.B., Lucknow Law School, India; LL.M., J.S.D., Yale University
Chang, Tian-Pong, Assistant Professor, Electrical Engineering
B.S., M.S., National Chiao-Tung University; M.S.E.E., Ph.D., Purdue University
Chepaitis, Joseph B., Professor, History
A.B., Loyola College; M.A., Ph.D., Georgetown University
Chun, Kee W., Professor, Physics
A.B., University of Pennsylvania; A.M., Princeton University, Ph.D., University of Pennsylvania
Collinson, John, Professor, Humanities
A.B., The Johns Hopkins University; A.M., Harvard University; Ph.D., The Johns Hopkins University
Costello, Francis J., Associate Professor, Industrial Engineering
B.S.M.E., M.S.M.E., Newark College of Engineering
De Mayo, William S., Professor, Accounting
B.S., University of Pennsylvania; M.B.A., New York University
Desio, Peter J., Professor, Chemistry
B.S., Boston College; Ph.D., University of New Hampshire
Devilbiss, Margaret C., Assistant Professor, Sociology
B.A., Keuka University; M.S., Purdue University; Ph.D., Purdue University
Dichele, Ernest M., Assistant Professor, Accounting
B.S., University of New Haven; J.D., Boston College Law School; LL.M., Boston University School of Law
Dinegar, Caroline A., Professor, Political Science
B.A., Cornell University; M.A., Ph.D., Columbia University
Downey, James, Associate Professor, Hotel Management
B.S., Pennsylvania State University; M.S., University of Wisconsin; Ph.D., Purdue University
Dugan, Robert D., Associate Professor, Psychology
B.A., M.A., University of Kentucky; Ph.D., Ohio State University
Dull, James W., Assistant Professor, Political Science
B.A., Wilkes College; M.A., University of Pennsylvania; Ph.D., Columbia University
Dworak, Robert J., Professor, Public Administration

Scalia, Frank A., Consulting Psychologist, Connecticut
Surti, Kantilal K., Chartered Engineer, U.K.
Warner, Thomas C., Jr., Professional Engineer, Connecticut
Wnek, Robert E., Certified Public Accountant, Connecticut; Member of Bar, Connecticut; Member of Bar, Pennsylvania
Wright, H. Fessenden, Registered Chemical Consultant
York, Michael H., Clinical Psychologist, Connecticut
Zern, Martin M., Certified Public Accountant, New York; Attorney at Law, New York

Special Lecturers

Abbagnaro, Peter, Lecturer, Taxation
B.S., Quinnipiac College
Aparo, Joyce E., Lecturer, Public Administration
M.S.W., University of Connecticut
Supervisor, Health Planning, Connecticut Department of Health Services
Barnea, Jacqueline H., Lecturer, Management Science
Ph.D., University of Paris Pantheón—Sorbonne
Bennett, Joseph L., Lecturer, Industrial Engineering
M.S., University of New Haven
Senior Programmer Analyst—ECLECTECH, Associates
Benson, Douglas B., Lecturer, Industrial Engineering
M.S., Union College
Information Service Project Manager, Pepsi Cola Company
Berecz, Victor G., Lecturer, Industrial Engineering
M.S., Yale University
Chief, Software Research & Technology, Norden Division of United Technologies Corporation
Bertone, Carmen M., Lecturer, Psychology
Ph.D., Los Angeles University
Chief, Human Factors Engineering, Sikorsky Aircraft
Betz, J. Michael, Lecturer, Public Administration
M.P.A., University of New Haven
Municipal Finance Officer, Union Trust Company
Bobko, John R., Lecturer, Industrial Engineering
M.S., Rensselaer Polytechnic Institute of Connecticut, Hartford Graduate Center

Borden, Richard, Lecturer, Public Administration
M.B.A., University of Hartford; M.P.A., University of New Haven
Town Manager, Town of Glastonbury
Brignola, Joseph M., Lecturer, Industrial Engineering
M.S., University of New Haven
Systems and Programming Manager, Producto Machine Corp.
Bruce, William C., Lecturer, Economics, Management Science & Legal Studies
J.D., Yale Law School
Lynch, Traub, Keefe & Marlowe, Attorneys at Law
Burt, Harold V. Jr., Lecturer, Management Science
M.S., Polytechnic Institute of New York
Assistant Vice President, United Bank & Trust Company
Butterworth, William J., Lecturer, Accounting
M.B.A., Seton Hall University; C.P.A.
Controller, The Greenwich Shop
Canas, Jose, Lecturer, Accounting
M.B.A., University of Connecticut; C.P.A.
Vice President, Finance-Treasurer/Secretary, ALCO Power Co.
Cascini, Karen T., Lecturer, Accounting & Finance
M.B.A., University of New Haven
Chasan, Joshua, Lecturer, Sociology
Ph.D., University of Pittsburgh
Director, Sage-Advocate
Ciarlone, Richard A., Lecturer, Management Science
M.B.A., University of Maryland
Manager, Decision Support Systems, Avco-Lycoming Corporation
Connolly, John T., Lecturer, Criminal Justice
Ph.B., Holy Cross College; M.A., Fordham University
Retired Chief U.S. Probation Officer, Federal Court, N.Y.C.
Culhane, Michael C., Lecturer, Economics
M.A., FairfieldUniversity
Arbitrator
Curtis, Carey, Lecturer, Accounting
M.B.A., University of Hartford; C.P.A.
Technical Associate, Financial Accounting Standards Board
Dallob, David, Lecturer, Management Science
M.B.A., Hofstra University
Vice President, Operations Development, Division of Sperry-Rand
D'Amore, Robert, Lecturer, Industrial Engineering
B.A., Quinnipiac College
Cost Accounting Manager, Emhart Inc.
Davis, George H., Associate Professor, Psychology
B.A., M.S., Ph.D., Yale University
Director of Counseling, University of New Haven
DeMichiell, Robert, Director of UNH in Southeastern Connecticut
Ph.D., University of Connecticut
DeReamer, Russell, Lecturer, Occupational Safety & Health Management
B.S., Purdue University
Devaney, Earl J., Lecturer, Marketing
M.B.A., University of Massachusetts
Gerald Rosen Company
DiNapoli, Alfred E, Lecturer, Accounting
M.B.A., University of New Haven
Senior Cost Accountant, Eyelet Specialty Co.
Eckenfelder, Donald J., Lecturer, Occupational Safety & Health Management
B.S., Lafayette College
Manager of Loss Prevention, Chesebrough-Ponds Inc.

Erickson, David L., Lecturer, Accounting
M.B.A., University of Cincinnati; C.P.A.
Manager of Accounting, Pepperidge Farms
Everhart, Deborah, Lecturer, Psychology
Ph.D., University of Wisconsin
Assistant Director of Counseling, University of New Haven
Evans, Richard L., Lecturer, Accounting
M.B.A., University of Connecticut
Manager, Deliotte, Haskins & Sells
Feldman, Gerald, Lecturer, Accounting
M.B.A., University of New Haven
EDP Consultant, Seward & Monde, C.P.A.'s
Forbes, Raymond, Lecturer, Psychology
Ph.D., U.S. International University
Director, Organization, Planning & Development
Raybestos-Manhattan, Inc.
Fox, Diana B., Lecturer, Public Administration
M.S.W., Columbia University
Program Supervisor, Fairfield Hills State Hospital
Frascatore, Joseph C., Lecturer, Industrial Engineering
M.S., University of New Haven
Staff Consultant, Hartford Insurance Group
Garrison, Stephen N., Lecturer, Management Science
M.B.A., Clemson-Furman Universities
Executive Vice President, Flexowell Corp.
Geary, John E., Lecturer, Accounting/Finance
M.B.A., University of New Haven
Administrator, Payroll Taxes, Uniroyal Inc.
Gerdine, Philip, Lecturer, Accounting
Ph.D., Boston University
Corporate Executive, General Electric Co.
Ghattas, Reda, Lecturer, Industrial Engineering
M.S.I.E., Rutgers University
Manager, Industrial Engineering Department,
Pratt & Whitney Aircraft
Greenberg, Richard, Lecturer, Accounting
J.D., L.L.M., Boston University
Assistant Attorney General, State of Connecticut
Banking Department
Grodzinsky, Frances S., Lecturer, English
Ph.D., University of Illinois
Grozalsky, Samuel, Lecturer, Accounting
M.B.A., Babson College
Supervisor of Internal Audit, Uniroyal Inc.
Helie, Raymond, Lecturer, Accounting
M.B.A., University of Hartford
Controller, Lightolier, Inc.
Hertel, Eugene S., Lecturer, Industrial Engineering
M.S., North Carolina State University
Information Scientist, Uniroyal Chemical Company
James, William H., Lecturer, Economics
Ph.D., Yale University
Klein, James P., Lecturer, Taxation
J.D., Columbia University; L.L.M., in Taxation, New York University
Attorney, Towers, Perrin, Forster & Crosby
Kraus, John J., Lecturer, Management Science
M.B.A., University of Pennsylvania
Manager, Policies & Procedures, United Technologies Corp.

Kubic, Thomas A., Lecturer, Forensic Science
J.D., St. John's University; M.S., C.W. Post
Detective/Criminalist, Nassau County Police Department
Kuchar, Charles, Lecturer, Finance
M.B.A., University of New Haven
Senior Portfolio Review Analyst, Barclays American Business Credit
Lamberti, James T., Lecturer, Industrial Engineering
M.S., Rutgers University
Supervisor, Pratt & Whitney Aircraft
Landry, Roger, Lecturer, Management Science
M.B.A., University of Connecticut
Director of Systems Development, St. Mary's Hospital
Lanza, Gerald J., Lecturer, Industrial Engineering
M.S., University of New Haven
Principal Software Engineer, Bunker Ramo Corp.
Lavarini, Charles E., Lecturer, Industrial Engineering
M.S., University of Arizona
Lerner, Peter M., Lecturer, Political Science
J.D., Southern Methodist University of Law
Levitin, Moshe, Lecturer, Accounting
M.B.A., Baruch College, C.P.A.
Loughlin, James C., Lecturer, Economics
Ph.D., Clark University
Marchese, Michael J., Lecturer, International Business
Master of International Management, American Graduate School of International Management
Vice President, International Management, Union Trust Company
Markle, Arnold, Lecturer, Criminal Justice
L.L.B., Boston University
State's Attorney for New Haven County
Mathew, Philip I., Lecturer, Economics
Ph.D., University of Connecticut
Mathur, Harish N., Lecturer, Electrical Engineering
M.S.E.E., University of Maryland
Principal Engineer, General Data Comm Industries, Inc.
Maurice, Barbara, Lecturer, Management Science
M.A., University of Connecticut
McPherson, Stephen B., Lecturer, Public Administration
M.B.A., University of New Haven
Controller, Hospital of Saint Raphael
Moser, Philip B., Lecturer, Management Science
M.B.A., University of New Haven
Systems Analyst, Berol U.S.A.
Nann, Dorothy, Lecturer, Management Science
M.S., University of Connecticut
Research Specialist, Southern New England Telephone Company
Noble, Michael T., Lecturer, Management Science
J.D., University of Connecticut Law School
Attorney, Combustion Engineering Inc.
Oaks, Jose, Lecturer, Accounting & Finance
M.B.A., New York University; C.P.A.
Financial Manager, United Technologies Corporation
O'Connor, Frank, Lecturer, Sociology
M.S.W., University of Connecticut
Social Worker, Yale-New Haven Hospital
Ostroske, Kenneth, Lecturer, Accounting
J.D., University of Connecticut; C.P.A.
Tax Manager, Arthur Young & Company

O'Mahony, Michael, Lecturer, Industrial Engineering
M.S., Fordham University; M.A., Alabama University
Project Manager, General Electric Company
Pabilonia, James, Lecturer, Accounting
M.S., University of Connecticut
Account Executive, Merrill Lynch
Pae, Ki-Tai, Lecturer, Economics & Management Science
Ph.D., University of Connecticut
Perlini, Robert A., Lecturer, Industrial Engineering
M.B.A., University of Hartford
Pinto, John D. Jr., Lecturer, Industrial Engineering
M.A.S., Boston University
Program Manager, Input-Output Computer Systems
Poulson, Christian E., Director of Resource Management, UNH in Southeastern Connecticut
M.A., Yale University; M.B.A., University of New Haven
Pratesi, Edward E., Lecturer, Finance
M.B.A., University of New Haven; C.P.A.
President, Real Estate Ventures, Inc.
Puleo, Joseph A., Lecturer, Accounting
M.B.A., City University of New York; C.P.A.
Reffner, John A., Lecturer, Criminal Justice
Ph.D., University of Connecticut
Reid, Thomas A., Lecturer, Psychology
Psy.D., University of Illinois
Director, Hamden Mental Health Service
Rubin, David, Lecturer, Accounting
M.B.A., University of Cincinnati; C.P.A.
Ryack, Bernard L., Lecturer, Industrial Engineering
Ph.D., University of Massachusetts
Assistant Director, Human Factors Department, Naval Submarine Medical Research Laboratory
Ryba, Walter G. Jr., Lecturer, Economics
Ph.D., Fordham University; J.D., University of Connecticut
Salwan, Vern C., Lecturer, Finance
M.B.A., University of New Haven
Financial Analyst, Grolier, Inc.
Sandel, Susan, Lecturer, Sociology
Ph.D., Union Graduate School
Coordinator of Psychosocial Programming, Sound View Specialized Care Center
Santello, Dolph, Lecturer, Public Administration
D.P.A., Nova University
Staff Manager, Information Systems Department
Southern New England Telephone Company
Schwartz, Robert, Lecturer, Political Science
J.D., Rutgers Law School
Assistant Administrator, Yale-New Haven Hospital
Shapazian, Kenneth C., Lecturer, Finance
M.B.A., University of Connecticut
Manager, Eastern Data Systems Center, General Dynamics Corporation
Smith, W. Reed, Lecturer, Management Science
B.S., Marietta College
Manager, Operations Research/Economist, Uniroyal Chemical Company
Sobolewski, Rosemary, Lecturer, Industrial Engineering
M.S., University of New Haven
Director and Coordinator of the Computer Programming Training, Easter Seal Rehabilitation Center

Sotir, Thomas, Lecturer, Management Science
M.B.A., Xavier University
Director of Industrial Relations, Electric Boat Division, General Dynamics Corporation
Stein, Richard, Lecturer, Accounting
L.L.M. (Taxation), University of Cincinnati;
J.D., University of Cincinnati
Sylvia, Edwin A., Lecturer, Psychology
M.A., University of Southern Mississippi
Chief, Management Development and Training, Electric Boat Division, General Dynamics Corporation
Taranto, Armand C., Lecturer, Management Science
M.B.A., University of Hartford
District Staff Manager, Southern New England Telephone Co.
Terrance, Dwight, Lecturer, Industrial Engineering
B.S., State University of New York at Buffalo
Tobin, Joseph M., Lecturer, Business Law
J.D., Fordham University
Tobin & Levine, Attorneys at Law
Tolonen, Karl, Lecturer, Environmental Sciences
Ph.D., Yale University
Ecological Consultant to the New Haven Water Company
Tomascik, Robert, Lecturer, Industrial Engineering
B.A., University of Connecticut
Information Systems Specialist, Southern New England Telephone Co.
Tylaska, Theodore T., Lecturer, Electrical Engineering
Ph.D., University of Houston
Project Engineer, Naval Underwater Systems Center
Naval Underwater Systems Center
Usher, Theron, Lecturer, Electrical Engineering
D.Eng., Yale University
Principal Engineer, Upholtz-Dickie Corp.
Washburn, Robert, Lecturer, Management Science
Ph.D., Cornell University
Weber, David, Lecturer, Economics
Ph.D., Brown University
Welsh, Walter, Lecturer, Accounting
L.L.M. (in Taxation), New York University School of Law;
J.D., University of Connecticut Law School
Williams, Richard C., Lecturer, Industrial Engineering
M.B.A., Boston University
Director, Product Company Coordination, The Continental Group
Wilson, Glenn T., Lecturer, Finance
M.B.A., Columbia University
Actuary/Real Estate Investment, Aetna Life & Casualty
Zietlow, David, Lecturer, Management Science
M.L.I.R., Michigan State University
Supervisor, Personnel, Sikorsky Aircraft
Zottola, Armand, Lecturer, Economics
Ph.D., Catholic University of America

Certificate To Be Signed By Applicant

The information supplied on this application is complete and true to the best of my knowledge. All materials and supporting records submitted by me or on my behalf in connection with this application or my attendance will not be released to anyone other than authorized university personnel without my consent.

It is understood that incorrect or falsified information will be grounds for disapproval of this application or dismissal from the university. The undersigned agree(s) to pay all financial obligations if admitted to and attending the university, including obligations incurred if financial aid is terminated, reduced or postponed for any reason.

The undersigned also authorize(s) the Office of Public Relations of the university to publish the applicant's picture, address, major, honors, sports or other activities for public relations purposes should the applicant decide to attend the university in any capacity. This publicity authorization may be rescinded by notifying the Office of Public Relations in writing within 30 calendar days of admission to the university.

Applicant's Signature _____ Date _____

The University of New Haven does not discriminate in admission or employment on the basis of sex, race, religion, age, national origin, or physical handicap. An equal opportunity affirmative action institution.

RECOMMENDATION FORM

To be completed and returned directly to:

UNIVERSITY OF NEW HAVEN GRADUATE SCHOOL
ADMISSIONS SECRETARY
WEST HAVEN, CONNECTICUT 06516

Name of applicant _____ Undergraduate college _____

Program to which applicant is applying _____

TO THE RESPONDENT: The above-named person has applied for admission to the Graduate School of the University of New Haven. Please provide us with your estimate of the qualifications of this candidate and of the reasonableness of his or her academic goals. It will help us if you indicate how long and in what capacity you have been acquainted with the candidate. If possible, compare his or her competence, motivation and intellectual ability with others you have known with similar goals. A candid, thoughtful statement, free of exaggeration will be most useful to us. Please use reverse side of this sheet when necessary.

In conformity with the Family Educational Rights and Privacy Act of 1974 we cannot regard letters of recommendation as confidential unless students waive their right to inspect such letters. If you wish the school to keep this information confidential, please have the applicant sign the waiver on the back of this page.

please turn over

Recommendation, cont'd.

I: ☐ recommend strongly ☐ recommend ☐ recommend with reservation

☐ do not recommend this candidate for graduate study at the University of New Haven.

Name _____

Position _____

Address _____
